Appendix: Visioning Workshop Summary Future Land Use Map (current adopted)

*Note on the preparation of the Comprehensive Plan: The EAR-Based Comprehensive Plan Amendments were commenced by Iler Planning Group in conjunction with Kimley-Horn and Associates, Inc. and Architectural Design Consortium, this final version of the Comprehensive Plan was completed by Michele Mellgren, & Associates, Inc.

**The goals, objectives and policies in these elements have been completely re-written and underlined; the strikethrough language follows the new underlined language.

INTRODUCTION

Under State law, the municipal Comprehensive Plan is the ultimate regulatory authority governing all land development activities within the jurisdiction of North Miami - either existing or occurring in the future. The City of North Miami adopted its first Comprehensive Plan in 1989. On September 13, 2005, the City adopted its Evaluation and Appraisal Report (EAR) of the Comprehensive Plan which recommended substantial revisions to update the plan to current conditions and the City's redevelopment objectives. This update to the Comprehensive Plan reflects recommendations in the City's 2005 EAR and current City goals and objectives, as well as requirements from the first EAR round.

The City's Land Development Regulations (LDR), which contains zoning, subdivision and other local development regulations, takes its purpose and direction from the Goals, Objectives and Policies adopted in this Comprehensive Plan. The Land Development Regulations must be fully consistent with the adopted Comprehensive Plan and also further its Goals, Objectives and Policies.

The specific authority and requirement for municipalities to do comprehensive planning in Florida derives from Chapter 163, Florida Statutes. In 1985, the State Legislature amended Chapter 163 through the adoption of the Local Government Comprehensive Planning and Land Development Regulation Act. This Act substantially increases the requirements for local land use plans, associated infrastructure and other plan elements as well as mandates that local governments adopt land development regulations to implement the policies of the local comprehensive plan. The Comprehensive Planning and Land Development Regulation Act is implemented primarily via Rules 9J-5 and 9J-11 of the Florida Administrative Code, as amended. This Comprehensive Plan has been prepared to be fully consistent with Chapter 163, F.S., and Rule 9J-5, as required by State law.

Consistent with State requirements, the City's new Comprehensive Plan is divided into two (2) components:

- **Volume I: Goals, Objectives, and Policies (GOPs)**
- **Volume II: Data, Inventory, and Analysis (DIA) Reports**

This is the "Comprehensive Plan: Volume I - GOPs" document, which must be formally adopted by ordinance by the City Council. The "Comprehensive Plan: Volume II - Data, Inventory, and Analysis (DIA) Reports" is a separately bound document and is used to provide supporting data and conclusions as the foundation for the Goals, Objectives, and Policies. The DIA section of the Comprehensive Plan is not formally adopted by the City Council.

The Goals, Objectives and Policies contained herein are organized into eleven (11) plan elements (chapters). Each element addresses an important aspect of land development and growth in North Miami including, but not limited to, future land use, transportation, housing, infrastructure, parks and recreation, public schools facilities, intergovernmental coordination, economic development and capital improvements. Nine of these elements are mandated by Chapter 163 F.S. and Rule 9J-5, and the other two (parks and recreation and economic development) are optional elements. The Future Land Use Element also contains the official Future Land Use Map (FLUM) for the City, and specific definitions for the various future land use categories are referenced in the FLUM. The City's official Zoning Map and Land Development Regulations must be consistent with the FLUM and accompanying land use category specifications contained in the Future Land Use Element.

The Comprehensive Plan for the City of North has been prepared in accordance with State requirements to encourage significant opportunities for public involvement throughout the process. These opportunities included City Council Visioning Workshops with public attendance and a Community Visioning workshop held to develop consensus for the long-range vision of the community. The topics for the workshops were: land use, parks and recreation, transportation, redevelopment, urban design, education, economic development, post-storm recovery, and conservation. The comments and recommendations from these workshops are incorporated throughout the Comprehensive Plan.

The intent of the Goals, Objectives, and Policies contained within this Comprehensive Plan is to provide the overall policy framework from which zoning and other land development regulations can be developed. Together, the Comprehensive Plan and implementing tools will ensure that the development patterns for future land uses within North Miami match the community vision and quality-of-life expectations of its residents.

The Comprehensive Plan was considered and approved by the Planning Commission (Local Planning Agency) on July 12, 2007, and the City Council on July 25, 2007, and then transmitted to the Florida Department of Community Affairs (DCA) for consideration pursuant to the rules and requirements under State law. The City received formal review comments from the DCA in their Objections, Recommendations, and Comments Report (ORC) dated _____. The recommendations from the State and their reporting review agencies are addressed in the final Comprehensive Plan formally adopted by the City Council on _____.

NORTH MIAMI'S PLACE IN SOUTH FLORIDA

Approximately 23 percent of Florida's approximately eighteen million residents live in the State's two most populated counties - Miami-Dade and Broward. The City of North Miami is strategically located halfway between the two County seats, Miami and Fort Lauderdale.

Not only is the City well placed in terms of potential markets and labor pools, but in terms of accessibility. It lies adjacent to Interstate 95 (the major north/south highway), the Golden Glades Interchanges and N.W. 7th Avenue, all of which provide easy access to the rest of Miami-Dade and Broward Counties. Major transportation hubs include the Port of Miami, Miami International Airport, Broward County's major Air- and Sea-ports, and the Florida Turnpike.

Freight traffic is easily accommodated via the Florida East Coast railway line running through the heart of North Miami's Industrial Area. Projected expansions of the FEC railway to support commuter trains further linking Miami-Dade and Broward Counties, have not yet come to fruition.

Additionally, the City is served by numerous arteries including Federal Highway #1 also known as Biscayne Boulevard, N.W. 125 Street, N.E. 6th Avenue, Federal Highway #44 1, N.E./N.W. 135 Street, West Dixie Highway and Broad Causeway. The latter is heavily utilized by residents of North Miami's two affluent bayfront neighborhoods, Keystone Point and Sans Souci, as well as residents of nearby Bal Harbour and Bay Harbour Villages.

The City, which boasts a population of 60,312 people living in a 9.98 square mile area, has struck a working balance between modernization, industrialization, and diversification on the one hand and an excellent residential environment on the other. Of the City's total land area; approximately 4 percent is allocated to commercial uses and approximately 3 percent to light industrial uses. With a growing population the City now plans to undergo redevelopment through initiatives from the newly created Community Redevelopment Agency (CRA). The creation of the CRA will assist in attracting new development at higher intensities that will likely spur economic development. Land use shifts in the City will also introduce mixed-use categories encouraging the creation of mixed-use downtown districts in the City.

Some History

North Miami can be traced back one hundred years to a settlement called Arch Creek. Historical sites such as the Arch Creek Natural Bridge link North Miami to its interesting past. By the turn of the century, Arch Creek was a flourishing rural

town where crops such as tomatoes, beans and pineapples grew abundantly. Visitors arriving at the Arch Creek train station discovered a one-room school, a church, and a narrow Main Street. From 18 homes then to more than 22,000 housing units now, North Miami continues to flourish. Newcomers today find nearly 20 houses of worship, public schools from elementary to university level, plentiful shopping and easy access to other parts of the region and the world.

North Miami's households are diverse in nature and size. Traditional families and single households co-exist harmoniously. The average household size is 2.85 according to the 2000 Census and the population's median age, for both men and women is 32. Regardless of whether they choose to rent or own, potential residents can select from a variety of housing choices, ranging from residences to condominiums, to apartments, to townhouses.

Services and Amenities:

The City offers much in services and amenities. The City-wide water, sanitary sewer, and storm drainage networks rank among the best in South Florida. The same is true for the City's garbage and trash collection system, free sidewalk maintenance programs, and extensive range and variety of recreational and educational facilities.

Excellent land-based and marine-based protection is provided to City residents by the North Miami Police Department, among the top ranked in Miami- Dade County. Additionally, a professional team of full-time Code Enforcement Officers work hard to ensure that the City's quality of life is maintained.

North Miami's recreational facilities and programs, run by the North Miami Parks and Recreation Department, have been the recipient of national awards attesting to their quality and high standards. The many facilities can be found in the Parks and Recreation Element included in this Comprehensive Plan. The City offers a variety of green spaces and is home to more than 20 passive and active parks, including the 1,033 acre Oleta River State Recreational Area.

The North Miami Athletic Stadium, a 5000 seat multi-purpose complex providing soccer and football fields for the high schools in the area, provides an Olympic quality running track.

Recreational programs range from supervised playground activities for young children to a variety of sports such as aquatics, athletics, football and soccer. There are special summer programs such as Summer Nature Camp and Aquatics Camp. Special interest and cultural events abound with weekend parades and festivals and monthly exhibits at the nationally recognized North Miami Museum of Contemporary Art (MOCA).

The North Miami Library has a collection of approximately 120,624 total volumes of print and non-print material. In addition, the library offers a variety of programs

to serve the residents and business community. These include: lectures, classes, films on specific topics, books by mail for the homebound of all ages. The Library literacy collection is used extensively by tutors and their students. A 60,000 sq. ft expansion is planned for the North Miami Library, partly funded by the developers of the Biscayne Landing development.

There is a wealth of educational opportunities in the City ranging from elementary to university level. In fact, North Miami is one of the cities in the Miami-Dade and Broward region which has a State university campus within its corporate boundaries. The City's educational facilities include four elementary schools, a middle high school, a senior high school, two charter schools, eight private schools, the North Miami Campus of Florida International University (FIU), and Johnson and Wales University. FIU offers both undergraduate and graduate programs and contains a major library facility, classrooms, residential housing, Olympic-sized swimming pool, tennis courts, and is renowned and ranked nationwide for the quality of its hotel management program. The City is also home to Johnson and Wales University.

Also within easy reach are Miami-Dade Community College, one of the largest community colleges in the nation, Barry University, St. Thomas University, which includes a Law School with, among others, an International Law program, and Florida Memorial College, one of the oldest universities and historically Black colleges in the State of Florida.

The residents of North Miami and neighboring areas also have access to quality health care. Within its boundaries lie Villa Maria, a facility, State renowned for its quality, which offers nursing home and rehabilitative services to the elderly. Additionally, the North Miami Health Center, a hospital facility which provides a full range of services on the premises, including pediatrics, obstetrics, psychiatry and an excellent substance abuse control program, is located just outside of the City limits.

Conclusion

The City of North Miami, incorporated in 1926 as the Town of Miami Shores, and once one of the fastest-growing cities in the country, is a modern and vibrant community. The City has undergone important demographic, social, and economic changes, challenging local planners and officials to address new needs and demands. The purpose of this document is to ensure the City's unique qualities are preserved and to guide the development of programs that will improve those areas requiring attention. Implementation of this Comprehensive Plan will help to mitigate the effects of projected population increases and changes in make-up and to meet the rising expectations of the population, making use of the available physical, social, and cultural resources.

STATEMENT OF LEGISLATIVE INTENT

This Statement expresses the legislative intent of the City Council of the City of North Miami with regard to the Comprehensive Plan. It is applicable to the City of North Miami Comprehensive Plan in its entirety and is declared to be incorporated by reference in each element thereof.

1. Nothing in this Comprehensive Plan shall be construed or applied to constitute a temporary or permanent taking of private property or the abrogation of vested rights as determined to exist under applicable law.
2. Nothing in this Comprehensive Plan shall be construed or implied to constitute an abrogation or removal of any private, regulatory, or governmental covenant or special condition in affect on any private or public property located within the City of North Miami.
3. This Comprehensive Plan is intended to set general guidelines and principles concerning its purposes and contents. The Plan is not a substitute for specific implementation mechanisms that are contained in the City of North Miami's Land Development Regulations (LDR).
4. The City Council recognizes that any application for development approval may bring into conflict and necessitate a choice between different goals, objectives, policies, priorities, and provisions of the Plan. While it is the intent of the City Council that the Future Land Use Element be afforded a high priority, other elements must be taken into consideration given the City Council's responsibility to provide for the multitude of needs of the City's growing and diverse community. Recognizing that the City Council and City agencies will be required to balance competing Goals, Objectives, and Policies of this Plan, the primary intention of the Comprehensive Plan is to protect the public health, safety and welfare.
5. The terms "shall" and "will" are construed as mandatory in this Comprehensive Plan, subject, however, to this Statement of Legislative Intent. The term "should" is construed as directory and not mandatory. Wherever implementation responsibility is not explicitly stated within a particular objective or policy in this Plan, that responsibility lies with the City of North Miami to the extent that the objective or policy specifies implementation.

CITY OF NORTH MIAMI

Future Land Use

SOURCE: MICHELE MELLGREN & ASSOCIATES, INC. 2007

1. Future Land Use Element

GOAL 1

Encourage redevelopment in order to enhance the economic base of the City, improve the aesthetic quality of the built environment and provide a range of housing and employment opportunities to accommodate, serve and employ the projected population, while protecting established single family neighborhoods.

Future Land Use

Objective 1.1

Establish land use designations that guide redevelopment through transit oriented development urban form principles, densities and intensities along major roadway corridors, which are NW 7th Avenue; NE 6th Avenue; Dixie Highway; Biscayne Boulevard; NE 125th/123rd Street; and, NE 135th Street.

Monitoring and Evaluation:

- Creation and adoption of new Land Development Regulations by December 2009.

Policy 1.1.1

The following land use categories, with corresponding heights and densities, and subject to the provisions of Policy 1.1.7, are established:

<u>USE</u>	<u>DENSITY/INTENSITY</u>	<u>HEIGHT IN FEET</u>
<u>RESIDENTIAL LOW</u>	<u>5.1 du/ac</u>	<u>not to exceed 35 ft</u>
<u>RESIDENTIAL LOW-MEDIUM</u>	<u>12 du/ac</u>	<u>not to exceed 40 ft.</u>
<u>RESIDENTIAL MEDIUM</u>	<u>16.3 du/ ac</u>	<u>not to exceed 75 ft</u>
<u>RESIDENTIAL HIGH</u>	<u>25 du/ ac</u>	<u>not to exceed 110 ft*</u>
<u>RESIDENTIAL OFFICE</u>	<u>n/a</u>	<u>n/a</u>
<u>COMMERCIAL/OFFICE</u>	<u>n/a</u>	<u>not to exceed 55 ft</u>
<u>MIXED USE LOW</u>	<u>25 du/ ac</u>	<u>not to exceed 55 ft</u>
<u>MIXED USE MEDIUM</u>	<u>40 du/ ac</u>	<u>not to exceed 75 ft</u>
<u>MIXED USE HIGH</u>	<u>45 du/ ac, up to 60 du/ac</u>	<u>110 ft, up to 130 ft</u>
<u>NEIGHBORHOOD REDEVELOPMENT OVERLAY & CENTRAL CITY DISTRICT NODE</u>	<u>See Policy 1.12.1</u>	<u>110 ft in Central City District Node and 90 ft elsewhere, up to 130 ft or 110 ft respectively</u>
<u>REGIONAL ACTIVITY CENTER (RAC)</u>	<u>See Policy 1.12.1</u>	<u>n/a</u>
<u>INDUSTRIAL</u>	<u>see note</u>	<u>see note</u>
<u>COMMUNITY FACILITIES, EXCEPT FOR UNIVERSITIES</u>	<u>n/a</u>	<u>not to exceed 55 ft</u>
<u>INSTITUTIONAL</u>	<u>n/a</u>	<u>not to exceed 110 ft</u>

<u>USE</u>	<u>DENSITY/INTENSITY</u>	<u>HEIGHT IN FEET</u>
<u>UTILITIES</u>	<u>n/a</u>	<u>n/a</u>
<u>OPEN SPACE/RECREATION</u>	<u>n/a</u>	<u>n/a</u>
<u>WATER</u>	<u>n/a</u>	<u>n/a</u>
<u>CONSERVATION</u>	<u>n/a</u>	<u>n/a</u>
<u>WETLANDS</u>	<u>n/a</u>	<u>n/a</u>

Note: Industrial uses within the Industrial land use classification shall be limited to 55 feet in height. As stated in the Permitted Uses section of this Comprehensive Plan, mixed uses are permitted within the Industrial land use designation. Mixed uses within the Industrial land use classification shall be limited to the density/intensity and height specified for the Mixed Use High land use designation.

* Any residential use category immediately north of the Village of Biscayne Park (121st Street boundary), may not exceed their current entitlement and is subject to strict design standards further established in Permitted Uses section of this Element.

Policy 1.1.2

By December 2009, the City shall adopt revised Land Development Regulations establishing zoning districts that implement the adopted Future Land Use Map designations, including, corresponding intensity, density, use and urban form standards. The Land Development Regulations shall require buffering and/or compatible transitions between single family neighborhoods and higher intensity uses through regulation of building scale, design, building placement, open space, and use.

Policy 1.1.3

The densities and intensities set forth in this Future Land Use Element cannot be changed without the concurrence of a supermajority of the City Council.

Policy 1.1.4

By December 2009, the City shall adopt regulations in the Land Development Regulations that establish the maximum impervious areas allowed.

Policy 1.1.5

By December 2009, adopt regulations in the Land Development Regulations that support and implement the City's housing policies and programs.

Policy 1.1.6

The City shall ensure facilities and services are available to serve proposed redevelopment through its concurrency management system.

Policy 1.1.7

In the event of partial or total destruction of any lawfully existing structure exceeding the maximum height or density contained in Policy 1.1.1, the structure may be restored or reconstructed to its original height and density upon a finding by the City Council that the structure, as rebuilt, would be consistent with the intent of the Comprehensive Plan. In addition, any project, building or structure previously approved by the City Council, through the adoption of any resolution or

ordinance, shall be vested in its right to be developed at its previously approved height and/or density, notwithstanding the maximum heights or densities contained in Policy 1.1.1.

Policy 1.1.8

The City shall study the feasibility of adopting an Accessory Dwelling Unit Ordinance by December 2009 to address overcrowding and to increase the availability of affordable housing for extremely low income, very low income, low income, or moderate income persons, in the retention of existing accessory dwelling units consistent with the intent of Florida Statute 163.31771.

Policy 1.1.9

The City shall utilize the Neighborhood Redevelopment Overlay to encourage the creation of a range of housing options to accommodate future growth.

Policy 1.1.10

The City shall conduct a study by December 2008 to determine the feasibility of annexing unincorporated County owned properties that are contiguous to the City's boundaries and currently utilize the City's water and sewer services.

Transit-Oriented Development

Objective 1.2

The City shall aim to implement the recommendations of the 2005 Transit Oriented Development Study to create a pedestrian environment to reduce automobile dependence and encourage utilization of alternative modes of transportation.

Monitoring and Evaluation:

- Commencement of corridor plans by December 2008.
- Adoption of land development regulations that establish urban development and design standards.
- Adoption of land development regulations that establishes a Transit Oriented Development Master Plan with the creation of a TOD Overlay District inclusive of the RAC recommendation, by Ordinance with incentives to encourage the provision of alternate modes of transportation.

Policy 1.2.1

By December 2008, the City shall implement applicable strategies from the Transit Oriented District Master Plan and incentives for achieving transit oriented development along designated corridors. One such strategy may be the dedication of easements to provide for adequate sidewalk width and the placement of bus shelters to promote mass transit.

Policy 1.2.2

By December 2008, the City shall commence preparation of corridor plans for NE 6th Avenue; Dixie Highway; NE 135th Avenue; and, NE 125th Street from Biscayne

Boulevard to NE 10th Avenue. The preparation of the corridor plans shall be coordinated with the recommendations of the Transit Oriented District Master Plan.

Policy 1.2.3

The City shall take active measures to discourage the overhead placement of major transmission lines along the City's major roadway corridors.

Land Development Regulations

Objective 1.3

The City's Land Development Regulations (LDR) shall provide clear guidance on land development and conform to comprehensive plan goals, objectives and policies.

Monitoring and Evaluation:

- The LDR should reflect updated Comprehensive Plan policies by December 2009.

Policy 1.3.1

The Land Development Regulations shall allow for a clear and easy-to-follow development review process.

Policy 1.3.2

Prior to approval of plans for new development or redevelopment, the City shall review for compliance with all applicable regulations including Cone of Influence land use restrictions and applicable environmental regulations.

Policy 1.3.3

Prior to issuance of permits for new development and redevelopment projects, the City shall ensure that measures for the protection of affected natural resources are provided for.

Policy 1.3.4

Implement the adopted impact fees ordinance through land development regulations requiring land dedication or payment of park impact fees in order to maintain the adopted LOS standards for Parks and Recreation.

Policy 1.3.5

Places of worship are allowed in all land use categories on the FLUM; however, the Land Development Regulations shall establish compatibility measures where places of worship are located within or adjacent to residential neighborhoods.

Policy 1.3.6

Home occupations may be approved in all residential land use categories as a special exception use provided the activity is secondary and incidental to the primary residential use, maintains a residential appearance, does not adversely impact the surrounding neighborhood and complies with all other applicable criteria contained in the City's Land Development Regulations.

Policy 1.3.7

Community residential homes shall be permitted as provided in Chapter 419 of the Florida Statutes. Congregate living facilities, group homes, nursing homes facilities and similar facilities shall be allowed in all residential land use categories provided they are consistent with the maximum allowable density of the Future Land Use Map and the LDR. A maximum of 2.5 occupants in these types of facilities shall be considered one (1) dwelling unit for purposes of determining allowable density.

Policy 1.3.8

All lawful existing land uses are deemed to be compatible with this Future Land Use Element provided such uses are in full compliance with their respective valid development orders and approvals, and the use does not cause substantial public harm, as determined by the City Council. In addition, currently valid development orders, development permits and vested rights approvals are also deemed to be compatible with this Future Land Use Element provided they have and maintain valid concurrency/capacity reservations for all required public facilities, including roadways, and the proposed use will not cause substantial public harm, as determined by the City Council.

Policy 1.3.9

The City shall examine the possibility of an inclusionary zoning ordinance, mandating the creation of affordable housing units in proposed developments or providing options such as payment in lieu of, with fees payable to a Housing Trust Fund established for the creation of affordable housing units in the City.

Policy 1.3.10

The City shall consider the feasibility of a linkage program, commissioning a study to analyze the effects of the employment sector in increasing the need for additional housing.

Urban Design**Objective 1.4**

The City shall identify methods of creating a sense of place and encourage citywide implementation of urban design guidelines.

Monitoring and Evaluation:

- Adopt urban design guidelines by December 2009.
- Adopt regulations that regulate urban form along major corridors by 2009.
- Explore the feasibility of the creation of a North Miami Public Art Program in the Arts Overlay District by July 2008.
- By 2009, conduct a feasibility study on burying all utility lines.
- Adoption of corridor plans that address streetscape improvements

Policy 1.4.1

By December 2009, the City shall adopt guidelines for unified urban design, architectural, and landscape regulations for major corridors to further assist in creating a sense of place throughout the City. During the creation of the urban

design guidelines, the City should consider the use of Universal Design in new construction, residential rehabilitation and remodeling to simplify life for everyone by installing products, and making the built environment more usable by as many people as possible and to benefit people of all ages and abilities .

Policy 1.4.2

The City should create an Urban Design and Architecture Review Board to implement the urban design guidelines developed for the City, ensuring conformity of development and redevelopment to said guidelines.

Policy 1.4.3

Parks, plazas, pedestrian access, civic and cultural activities and amenities shall be employed along major corridors including the Neighborhood Redevelopment Overlay.

Policy 1.4.4

The City should explore the feasibility of a North Miami Public Art Program in the Arts Overlay District using grants, County funds or development impact fees and public art requirements in development and redevelopment initiatives.

Policy 1.4.5

The City shall enhance way finding markers in the City by providing gateway and entrance features to announce arrival into the City.

Policy 1.4.6

By December 2009, the City shall develop sign regulations that specifically address mixed use developments.

Policy 1.4.7

By December 2009, the City should conduct a feasibility study on burying all utility lines.

Policy 1.4.8

By December 2009, the City shall address landscape and streetscape requirements as it applies to the beautification of the City and existing development and redevelopment.

Policy 1.4.9

The City should enhance and promote the Arts Overlay District with the Museum of Contemporary Art as the anchor.

Policy 1.4.10

By December 2010 the City will coordinate with the South Florida Regional Planning Council to identify opportunities for North Miami to participate in the State Road 7 collaboration process.

Community Redevelopment

Objective 1.5

The City shall utilize the adopted Community Redevelopment Agency Plan, as may be amended, to guide the redevelopment of identified urban infill areas, especially within the Neighborhood Redevelopment Overlay, to promote economic revitalization of blighted neighborhoods.

Monitoring and Evaluation:

- The preparation of a land assembly methodology by December 2010.
- Implementation of a financial and relocation strategy for businesses located in the Neighborhood Redevelopment Overlay by July 2010.
- The completion of a feasibility study for a Creative Arts center or theater in the City Arts District by December 2010.
- This objective shall also be measured by the implementation of its policies.

Policy 1.5.1

By 2010, the City shall assist the Community Redevelopment Agency (CRA) to prepare a methodology for land assembly to achieve goals described in the Community Redevelopment Agency Plan, as amended.

Policy 1.5.2

The City should utilize market studies of the redevelopment area that reflect real estate market demands to determine future land use changes in the Community Redevelopment Area. The market study shall also evaluate whether the height limits within the City are appropriate for the recommended target businesses.

Policy 1.5.3

The City should encourage the creation of a financial strategy to strengthen businesses in Neighborhood Redevelopment Overlay and develop incentives for the retention and attraction of businesses in said district.

Policy 1.5.4

The City should encourage the creation of a displacement plan in accordance with the Federal Uniform Relocation Assistance and Real Property Act as related to the City and CRA policies.

Policy 1.5.5

By December 2010, the City should conduct a feasibility study for the creation of a Creative Arts center or theater in the City Arts District.

Policy 1.5.6

By January 2010, the City shall establish streamlined development review procedures for timely development in the Community Redevelopment Area in accordance with the adopted Land Development Regulations.

Policy 1.5.7

The City shall facilitate development in the CRA to promote mixed-use development, encourage mass transit, reduce the need for automobile travel, provide incentives for quality development and give definition to the urban form. A principal means of implementing this Policy shall be the creation of the Neighborhood Redevelopment Overlay, the Transit Oriented Development Overlay District, and its implementing land development regulations and programs.

Policy 1.5.8

The City shall continue to identify areas of slum and blight in the community, and rank these areas in order of priority, and develop a schedule which will ensure all such areas are studied and solutions are identified.

Policy 1.5.9

The City should encourage the use of Crime Prevention Through Environmental Design (CPTED) standards in the redevelopment of the City, enhancing the safety of the City and limiting design factors which abet crime.

Policy 1.5.10

Encourage mixed use developments along NW 7th Avenue that incorporate Transit Oriented Development and green design standards that enhance both the aesthetic and economic vitality of the NW 7th Avenue corridor and help to create a sense of place.

Parking**Objective 1.6**

The City shall provide for efficient and attractive parking areas to enhance the economic environment and protect neighborhood character.

Monitoring and Evaluation:

- The creation of a Parking Master Plan by December 2009.
- This objective shall also be measured by the implementation of its policies.

Policy 1.6.1

By December 2009, the City shall conduct a parking study to assess parking needs citywide and create an inventory of existing parking facilities in the City and include recommendations for future parking and suggested locations.

Policy 1.6.2

The City shall develop a Parking Master Plan by December 2009 with the intention to:

- Utilize, to the maximum extent feasible, the joint use of parking among land use types in residential and business areas.
- Design parking areas for existing and future neighborhoods and business use that are safe, attractive and space efficient.
- Construct parking areas and structures to support downtown businesses and mixed-use developments.

Policy 1.6.3

The City should implement the recommendations of the Transportation Master Plan by encouraging parking management strategies such as metered parking, shared use parking including time restrictions, and establish regulations for mixed-use and multi-family developments to reduce the need for additional parking structures in the Neighborhood Redevelopment Overlay and the Central City District.

Neighborhood Planning**Objective 1.7**

The City shall maintain and continuously improve neighborhoods through effective code enforcement, community outreach and implementation of neighborhood beautification programs.

Monitoring and Evaluation:

- Bring 85 percent of code violations into voluntary compliance by December 2009.
- By June 2008, appoint a member of City staff to act as a Neighborhood Improvement Coordinator.

Policy 1.7.1

The City should appoint a staff designee as a Neighborhood Improvement Coordinator to ensure that issues and concerns from all neighborhoods have been properly documented and expressed.

Policy 1.7.2

The City should encourage equal access to its residents and encourage participation in community activities from disenfranchised neighborhoods, to ensure that all residents are well represented in affairs affecting the City.

Policy 1.7.3

The City should develop a Community Aesthetics program in conjunction with the City's Code Enforcement department to enforce appropriate standards for maintenance, appearance and occupancy of residential areas.

Policy 1.7.4

The City should maintain a minimum ratio of one code enforcement officer for every square mile of developed property.

Policy 1.7.5

The City appointed designee shall implement a neighborhood beautification program, "Keep North Miami Beautiful" to organize volunteers to assist elderly and disabled homeowners in property improvement and maintenance. In conjunction with this program, the City shall also encourage residents to clear litter and trash from vacant lots, improve dilapidated buildings and decrease the number of abandoned and old car bodies located on individual lots.

Policy 1.7.6

The City shall strengthen the social fabric of its neighborhoods by supporting community policing and community watch organizations to reduce opportunities for criminal activity.

Policy 1.7.7

The City should utilize neighborhood design standards as adopted in the land development regulations to enhance neighborhood preservation.

Hurricane Evaluation and Disaster Preparedness**Objective 1.8**

The City shall coordinate with Miami-Dade County, the South Florida Regional Planning Council and the State of Florida in addressing the evacuation, structural integrity and disaster-preparedness needs of North Miami.

Monitoring and Evaluation:

- By January 2009, the City shall develop an Emergency Plan.

Policy 1.8.1

The City shall coordinate with the Miami-Dade County and the South Florida Regional Planning Council in implementing the approved Local Mitigation Strategy, by assessing the vulnerability of governmental, medical and public safety sites and structures in the City to storm damage, and in developing an action plan, if necessary, to address wind stability and flood protection for key buildings.

Policy 1.8.2

The City shall continue to work with Miami-Dade County to ensure that City employees are well-trained in the programs, procedures and policies required during a disaster emergency and the longer-term post-disaster redevelopment process.

Policy 1.8.3

The City should undertake a study to consider alternate methods for maintaining traffic signals and cellular phone service after storms.

Policy 1.8.4

By January 2009, the City should develop a City Emergency Plan addressing disaster-preparedness, hurricane evacuation, and post-disaster redevelopment plans, procedures and personnel duties.

Policy 1.8.5

All proposed large-scale amendments to this Comprehensive Plan and/or zoning applications shall be evaluated for their impact on hurricane evacuation routes and times, and effect on currently available off-site shelter capacities. Roadway improvements and shelter improvements shall be required, if deemed necessary, to mitigate negative impacts and phased with new residential development.

Environmental Sustainability

Objective 1.9

To preserve the existing environment by encouraging and requiring native plants and green space in development and redevelopment projects and to encourage the use of alternative fuels in City owned vehicles.

Monitoring and Evaluation:

- The creation of an approved plant list by July 2010.

Policy 1.9.1

By July 2010, the City shall amend its LDR to include an approved plant list and prohibit the planting of exotic invasive species in new development and redevelopment projects.

Policy 1.9.2

Include in the LDR appropriate regulations to properly address local topography, flooding frequency, soil and other applicable environmental conditions in development approvals. In addition, provide for adequate drainage and stormwater management, open space, vehicle parking and safe, convenient on-site traffic flow.

Policy 1.9.3

Ensure that a variety of parks, recreation, and open space facilities area available to City residents.

Policy 1.9.4

The City should consider investing in a fleet of fuel efficient cars to carry out the daily tasks of the City while being as energy and fuel efficient as possible.

Green Building and Sustainability

Objective 1.10

To encourage sustainable development throughout the City and implement green building requirements for development and redevelopment projects to reduce energy usage, landfill waste and emissions, create a healthy indoor environment, conserve building materials and resources, and promote water efficiency.

Monitoring and Evaluation:

- Adoption of minimum LEED design and construction standards, and/or any nationally recognized green standards acceptable to the City, by December 2009.

Policy 1.10.1

By December 2008, the City shall adopt minimum requirements in its LDR for sustainable development by implementing nationally recognized green standards acceptable to the City, such as the standards of the Leadership in Energy and

Environmental Design (LEED) green building rating system as adopted by the U.S. Green Building Council; and address all resource constraints that may be applicable to its implementation.

Policy 1.10.2

The City shall consider the feasibility of providing tax incentives, reduced parking requirements, density and height bonuses or expedited permitting for buildings proposing to be built under LEED standards, especially for buildings proposed on the tiered LEED levels of Platinum, Gold or Silver; and/or any nationally recognized green standards acceptable to the City.

Policy 1.10.3

The City shall require all newly developed public buildings in the City to be designed and constructed to the standards of LEED Silver and all City funded projects to be at a minimum LEED Certified and/or to any nationally recognized green standards acceptable to the City.

Policy 1.10.4

The City should prepare an ordinance in coordination with the CRA requiring all buildings in the redevelopment area to have LEED certification, with an allowance for exception in cases of undue hardship, as determined by the City Council.

Policy 1.10.5

The City should consider the applicability of other green building standards, such as standards of the Florida Green Building Coalition, to create an ordinance unique to the City of North Miami encompassing the requirements of Objective 1.10.

Schools and Collocation with Public Facilities

Objective 1.11

To assist the Miami-Dade County School Board and respective local charter school developers in providing high-quality elementary, secondary and college level education facilities and resources necessary to meet the future needs of North Miami's youth and adult population.

Monitoring and Evaluation:

- This objective shall also be measured by the implementation of its policies.

Policy 1.11.1

The City shall ensure that public schools are allowed in all land use categories shown on the adopted Future Land Use Map and all zoning districts contained in the LDR.

Policy 1.11.2

As provided for in the Interlocal Agreement between North Miami and the Miami-Dade County School Board, the City will work with the School Board to plan future public school sites in the City and ensure adequate lands are available, proximate

to neighborhoods, to accommodate the present and future student population of the City.

Policy 1.11.3

The City should utilize all feasible opportunities to collocate public facilities, such as parks, libraries, recreational and community centers, with schools.

Policy 1.11.4

Consistent with the provisions of the Interlocal Agreement between North Miami and the School Board, the City will consider the individual and cumulative impacts of land use plan amendments and rezoning applications that increase residential density on existing and planned public elementary and secondary schools, and solicit input from the Miami-Dade County School Board on local school impacts prior to the hearings for subject amendments or applications.

Policy 1.11.5

The City will provide expedited development review process for all proposed schools within North Miami.

Policy 1.11.6

As part of the Interlocal Agreement between North Miami and the School Board, the City shall establish a joint process for collaborative planning and decision-making on population projections and public school siting to accomplish coordination between the City's adopted Comprehensive Plan and the long range plans of the School Board.

Policy 1.11.7

The City will encourage universities, colleges and non-profit education providers to establish college-level and adult education facilities in North Miami.

Policy 1.11.8

The City will work closely with the Miami-Dade County School Board to investigate methods to apply to the development approval stage to ensure that charter schools in the City remain in operation, or if forced to close, an alternative plan is triggered to make sure the quality and size of the school is replicated in another nearby location.

Policy 1.11.9

The City shall encourage the creation of educational campus development plans and to the extent feasible ensure that plans are consistent with urban design guidelines and uses as outlined in the Future Land Use Map.

Neighborhood Redevelopment Overlay

Objective 1.12

The Neighborhood Redevelopment Overlay (NRO) shall be designated as the City's urban core, and the City shall direct growth into the Overlay area in a manner

that will achieve the redevelopment, economic development, housing choice, and multi-modal transportation objectives and policies of the Comprehensive Plan.

Monitoring and Evaluation:

- Creation of new Land Development Regulations, to specify in detail how following policies of Redevelopment Overlay shall be implemented, by December 2009.

Policy 1.12.1

The maximum allowable development within the NRO shall be governed by the future land use plan map designations therein, and as follows:

- A pool of 1,800 floating dwelling units and 375,000 s.f. of commercial use are reserved for the Central City District (CCD) Node. A pool of 2,200 floating dwelling units and 375,000 s.f. of commercial use is established for use anywhere within the NRO. This pool may be used to facilitate mixed-use development, and either higher intensities or additional land uses that are not permitted by the underlying map designations.
- A secondary pool of 1,000 unassigned dwelling units is established within the NRO. Potable water supply and treatment capacity limitations necessitate that the potable water supply reserved for the secondary pool of dwelling units may be allocated to land use plan amendments in the remainder of the City for additional redevelopment. For each additional dwelling unit approved via plan amendment outside of the NRO, one dwelling unit shall be debited from the secondary pool.
- The maximum permitted height within the CCD Node shall be 110 feet, with additional 40 feet for following policies contained under Objective 1.2 and 1.10; 90 feet in other locations within NRO with additional 40 feet for following policies contained under Objective 1.2 and 1.10, subject to the intensity transition policies herein.
- Permitted uses within mixed-use, residential, commercial and community facility categories are allowed in this district. Density may not exceed 90 du/ac depending on availability of floating units.

Policy 1.12.2

Mixed-use shall be encouraged along the main corridors within the NRO, namely Dixie Highway, 125th Street and NE 6th Avenue. To this end, the land development regulations shall specify ground floor design to accommodate retail, service and entertainment uses.

Policy 1.12.3

Mixed-use is required within the CCD Node, wherein ground floor uses shall be limited to commercial retail, service or entertainment, and upper floors shall contain at least one additional use. All buildings on lots with main corridor frontage shall contain at least two fully inhabitable floors.

Policy 1.12.4

A minimum of 20 percent district-wide open space shall be provided within the NRO. Such open space shall be usable by the general public in the form of parks,

plazas, pocket parks and other urban open space types as shall be defined in the land development regulations. Landscaped areas that are not part of a park or plaza shall not count towards required open space. Water area may count towards required open space if located within a park, plaza or other open space recognized by the land development regulations.

Policy 1.12.5

Off-site open space provision is allowed. To this end, several small, triangular-shaped parcels along Dixie highway that are unsuitable for intense development should be utilized for open space purposes to the extent feasible.

Policy 1.12.6

Properties in the redevelopment area that do not front any of the main corridors shall be developed according to transition area regulations of the land development regulations, which shall be guided by the transition principles herein. Transition areas shall occur between the more intense mixed use and commercial corridors and existing low-density residential neighborhoods

Policy 1.12.7

The City should consider adopting form-based land development regulations that specify acceptable transitions within the NRO. Form-based regulations prescribe certain aspects of building placement, spacing, building mass, types of building frontages, parking location, and access in order to affect a specified development pattern. Form-based regulations may be the tool used to manage the transition between high intensity structures and outlying single family residential neighborhoods.

Policy 1.12.8

Guiding principles for transition zones shall include the following:

- Orderly transition from higher to lower buildings to protect the character of existing single-family neighborhoods outlying the NRO.
- North-South corridors should be treated with architectural and massing consistency, such that each north south corridor has an identity.
- Generally, for east-west transitions, avenues should be used to separate multiple-family dwellings from single-family neighborhoods, rather than mid-block transitions. Lots fronting avenues, however, should be treated equally on both sides.
- North-south transitions should occur along the latitudinal centerline of the block, so that both sides of any given street are treated similarly.
- Acceptable transitions adjacent to single-family neighborhoods outlying the NRO should be single-family detached and attached dwellings, two-family dwellings made to appear as single-family detached dwellings, and multiple-family dwellings that appear as single-family attached dwellings. Buildings adjacent to single family residential neighborhoods outlying the NRO should be no higher than three floors. When abutting a single-family residential lot outlying the NRO, yards and setbacks along the common lot line should be equal to or greater than that of the single-family lot.

Landscaped alleys may also be used to accomplish the setback and provide separation.

- Appropriate transitional uses between main corridors and single-family neighborhoods outlying the NRO shall include office, gallery, studio, compatible and small-scale community facilities, multiple-family residential and attached single-family residential

Policy 1.12.9

Parking requirements may be reduced for mixed-use buildings within the NRO and CCD Node. Land development regulations shall specifically address the reduction. Shared parking between adjoining buildings or off-site parking and centralized parking should be allowed.

Policy 1.12.10

The City and CRA should coordinate efforts to provide public parking as an incentive to encourage redevelopment.

Policy 1.12.11

Safe and secure bike parking should be required. Well lit and shaded bus stops should be provided. Motorcycle parking may be provided in lieu of some car parking spaces.

Policy 1.12.12

All redevelopment shall be sensitive to the community character enhancement, specifically transit and pedestrian friendliness. Interconnected sidewalks and shade from shade trees, awnings, canopies or other shading devices are paramount.

PERMITTED USES IN FUTURE LAND USE CATEGORIES

Objective 1.13

Land use categories are further defined as follows:

Policy 1.13.1

RESIDENTIAL

The areas designated Residential on the Future Land Use Map are intended primarily for residential dwellings, but other land uses related to a residential environment, including schools and places of worship, may also be appropriate.

Uses permitted in areas designated residential are as follows:

1. Residential dwelling units, subject to the limitation for a parcel as shown on the Future Land Use Map, and subject to the density and intensity limitations set forth in Policy 1.1.1. Subject to unit availability per Policy 1.12.1, low-medium, medium and high density residential designations may allow a density bonus not to exceed an additional 25 du/ac if developed in accordance with the policies contained under objectives 1.2 and 1.10 as further defined in the City's Land Development

- Regulations. Developments within the NRO are subject to the density and height bonuses in accordance with the policies contained under Objective 1.12 as further defined in the City's Land Development Regulations.
2. Nonprofit neighborhood social and recreational facilities.
 3. Home occupations that are listed as permitted uses in the LDR conducted with mail, telephone and computer use only, with no customers, clients or employees on site at any time.
 4. Active and passive parks.
 5. Community facilities, such as schools, places of worship, in-home child and adult day care, nursing homes, governmental administration, police and fire protection facilities, and libraries.
 6. Ancillary uses and activities such as clubhouses and private restaurants owned by a homeowners' association, neighborhood community centers, small daycare centers, low-impact public facilities and utilities, and parks and recreational facilities.
 7. Small-scale public facilities and utilities intended to serve the immediate needs of the residential community may be permitted on compatible sites in all residential land use categories subject to adequate design and buffering as determined by the City.

Restriction on Height:

1. Buildings and structures immediately north of the Village of Biscayne Park (121st Street boundary), shall not exceed 35 feet in height, for the first 100 feet north of 121st Street. Thereafter the height may increase at the rate of one foot vertical for every two feet horizontal, not to exceed the maximum height allowed by the underlying land use designation.

Policy 1.13.2

COMMERCIAL/OFFICE

The areas designated Commercial/Office on the Future Land Use Map are intended to provide land area for business, office, retail, service and other commercial enterprises.

1. Retail uses, including restaurants.
2. Office and business uses.
3. Professional offices and businesses.

4. Community facilities such as schools, museums, places of worship, child and adult day care centers, nursing homes, governmental administration, police and fire protection facilities, and libraries.
5. Passive parks and open space.
6. Nonprofit neighborhood social and recreational facilities.

Restriction on Height:

1. All developments fronting on the Biscayne Boulevard commercial corridor beginning at NE 123rd Street north to NE 135th Street shall maintain a maximum height of 55 feet and all future land use amendments shall conform to the 55 ft. height restriction subject to LDR as further defined.

Policy 1.13.3

CENTRAL BUSINESS COMMERCIAL

Permitted uses shall be the same as Commercial/Office designation.

Policy 1.13.4

MIXED USE

The areas designated Mixed Use on the Future Land Use Map are intended to provide a mix of uses that will encourage pedestrian activity, by providing retail uses to serve the residential population. Mixed uses shall contain no ground floor residential uses.

Uses permitted in areas designated Mixed Use are as follows:

1. Residential dwelling units, subject to the limitation for a parcel as shown on the Future Land Use Map, and subject to the density and intensity limitations set forth in Policy 1.1.1. Mixed use low, medium and high may allow an additional density bonus not to exceed 15 du/ac, if developed in accordance with the policies contained under Objective 1.2 and 1.10 as further defined in the City's Land Development Regulations. A minimum of 75 percent of the ground floor gross area of a development in the Mixed Use land use designation shall contain retail uses. Mixed use development within the NRO or CCD Node are subject to the density and height bonuses in accordance with the policies contained under Objective 1.12 as further defined in the City's Land Development Regulations.
2. Commercial and office uses, subject to the limitation for a parcel as shown on the Future Land Use Map, and subject to the density and intensity limitations set forth in Policy 1.1.1.

3. Home occupations that are conducted with mail, telephone and computer use only, with no customers, clients or employees on site at any time.
4. Hotels and similar lodging. The number of lodging units permitted on a parcel shall not exceed double the number of residential units permitted.
5. Community facilities designed to serve the residential area, such as schools, museums, places of worship, child and adult day care centers, nursing homes, hospitals, governmental administration, police and fire protection facilities, and libraries.
6. Active and passive parks and open space.
7. Non profit neighborhood social and recreational facilities.
8. Planned Unit Development (PUD).

Policy 1.13.5**INDUSTRIAL**

The Industrial land use designation shall be applied only to those lands proximate to the FEC Railway. The Industrial designation is designed to provide areas for light and heavy industrial uses and, because of its proximity to the FEC Railway, mixed uses.

Uses permitted in areas designated Industrial are as follows:

1. Light and heavy industrial uses.
2. Education, scientific and research facilities, research laboratories, and medical or dental laboratories.
3. Wholesaling.
4. Office uses.
5. Governmental administration, and police and fire protection facilities.
6. At such time that commuter ridership is programmed on the FEC Railway lines, Mixed Use-High as described in Policy 1.1.1 and subject to the uses permitted under the Mixed Use land use designation.
7. Parks and open space.
8. Nonprofit neighborhood social and recreational facilities.
9. Entertainment.

Policy 1.13.6**COMMUNITY FACILITIES**

The Community Facilities land use designation is intended to provide a full range of community uses to serve the City's population.

Uses permitted in the Community Facilities designation are as follows:

1. Community Facilities uses such as schools, places of worship, hospitals, governmental administration, police and fire stations, libraries, community theaters, community centers, museums, civic centers, nursing homes, and parks and recreational facilities.

Policy 1.13.7**COMMUNITY FACILITIES - UNIVERSITIES**

The Community Facilities - Universities land use designation is intended to provide universities a flexibility of uses and heights from the more restrictive Community Facilities use.

Uses permitted in the Community Facilities - Universities designation are as follows:

1. Community Facilities uses such as class rooms, student/faculty residences, training facilities, research centers, cafeterias, offices and other supporting facilities, including but not limited to libraries, theaters, health care, and parks and recreational facilities.

Policy 1.13.8**UTILITIES**

The areas designated Utilities on the Future Land Use Map are intended to provide for utility services to meet the current and future needs of North Miami.

Uses permitted in the Utilities land use designation are as follows:

1. Utilities such as water and wastewater treatment plants, pumping stations, electrical power plants, substations, solid waste disposal and transfer stations.
2. Other uses determined to be ancillary to the permitted uses described in (1) next above.

Policy 1.13.9**OPEN SPACE/RECREATION**

1. The primary purpose and intent of the Open Space/Recreation land use designation is to accommodate open space recreation uses to serve the public recreation needs.

2. Uses permitted in areas designated Open Space/Recreation are as follows:
3. Passive recreational uses, including but not limited to nature centers; trails; bikeways; scenic areas; feeding stations; aquatic preserves and picnic areas.
4. Active recreational uses including but not limited to playgrounds; swimming pools; and, athletic fields and courts.
5. Boat ramps and docks.
6. Concessions only when accessory to the above uses. Examples of concessions are refreshment stands, pro shops, souvenir shops and rental facilities.

Policy 1.13.10**CONSERVATION**

The Conservation land use designation is intended to protect natural reservations, wetlands and major reserve water supply areas.

Policy 1.13.11**WATER**

The Water land use designation is intended to record and protect existing natural or man made water bodies in the City.

Policy 1.13.12**Regional Activity Center**

The Regional Activity Center (RAC) designation is intended to encourage and promote large-scale development and redevelopment as well as small parcel infill development and redevelopment that facilitate a balanced mix of land uses by providing maximum flexibility for development and redevelopment activities. In accordance with Chapter 28-24.014(10)(b)2, F.A.C., a Regional Activity Center in the City of North Miami shall be a compact, high intensity, high density multi-use area designated as appropriate for intensive growth by the City and may include: residential use; commercial; office; cultural and community facilities; educational facilities; recreational and entertainment facilities; hotels or motels; transportation facilities; utilities; and appropriate industrial activities. The major purposes of this designation are to facilitate mixed use development, encourage mass transit, reduce the need for automobile travel, provide incentives for quality development and give definition to the urban form.

Policy 1.13.12.1

Chapter 380.06(2)(e), Florida Statutes, and Chapter 28-24.014(10), Florida Administrative Code, authorize local governments to designate areas as Regional Activity Centers where the local government seeks to encourage higher intensities

of development by increasing the threshold of development size required to undergo State review as a Development of Regional Impact (DRI), referred to "Chapter 380 Regional Activity Centers." Additionally, Policy 2.1.12 of the Strategic Regional Policy Plan for South Florida authorizes the designation of "Regional Development Districts" to implement the provisions of Chapter 380.0651(3)(d)(3) and (3)(g)(2), Florida Statutes, which provide for the designation of geographic areas highly suitable for increased DRI review threshold intensity.

The designation of a specific area and boundaries as a Chapter 380 regional activity center for the purpose of increasing DRI review thresholds does not change the City of North Miami Land Use Plan map designation of any land, nor does it change the uses or intensities of development authorized by the Future Land Use Plan Element of the City's Comprehensive Plan. It only changes the circumstances under which proposed development in the designated area would have to be reviewed through the Ch. 380, F.S., DRI process.

For an area to qualify as a Regional Activity Center, the following criteria must be met:

1. The type of land uses permitted within each Regional Activity Center and the density of residential uses shall be specified within the City Land Use Plan.
2. Regional Activity Centers shall include mixed land uses of regional significance.
3. Each Regional Activity Center shall be a defined geographical area described in the City Future Land Use Plan text and delineated on a map that is an exhibit to the City Future Land Use Plan.
4. Regional Activity Centers shall be proximate and accessible to interstate or major arterial roadways.

The following area has been designated Regional Activity Center within the City of North Miami Land Use Plan:

North Miami Urban Infill Regional Activity Center

General Location: The Regional Activity Center (RAC) totals approximately 1,739 acres in area. The RAC area is generally bound by Biscayne Bay to the east, NE 163rd Street to the north, Biscayne Boulevard to the west, and NE 135th Street to the south, excluding property not located within the city limits of North Miami. The boundaries of the proposed Regional Activity Center also include the area west of Biscayne Boulevard generally bound by 151st Street to the north, NE 18th Avenue to the west, FEC rail corridor to the east and NE 137th Street

and NE 140th Street to the south. The proposed RAC boundaries are identified on the FLUM (Map 1-5)

Policy 1.13.12.2

The permitted uses and density and intensity of uses within the RAC shall be governed by the underlying land use designations of the subject property.

The North Miami Urban Infill Regional Activity Center is designated to be a Chapter 380 Regional Activity Center and, subject to amendment of the Strategic Regional Policy Plan for South Florida by the South Florida Regional Planning Council, as a regional development district (a geographic area specifically designated as highly suitable for increased threshold intensity) for the purpose of increasing DRI thresholds.

FUTURE LAND USE ELEMENT

GOAL 1:

~~TO PROVIDE THE MEANS THROUGH WHICH THE INTEGRITY OF THE RESIDENTIAL, COMMERCIAL, AND INDUSTRIAL DISTRICTS CAN BE MAINTAINED OR, WHERE NEEDED, BE IMPROVED TO THE MINIMUM ACCEPTABLE LEVEL.~~

OBJECTIVE 1.1:

~~Continue to enforce in perpetuity the City's Code of Ordinances as they apply to property upkeep and maintenance standards from a minimum ratio of one enforcement officer for every square mile of developed property.~~

OBJECTIVE 1.1.1:

~~Maintain a minimum of five (5) full-time Code Enforcement Officers.~~

OBJECTIVE 1.2:

~~One year following plan adoption, and then yearly thereafter, determine the need for additional Code Enforcement personnel to maintain the integrity of the City's residential, commercial and industrial areas, based on the number of violations investigated, and based on a maximum Level of Service standard of 12,000 investigations per field officer per year.~~

POLICY 1.2.1:

~~If the annual review indicates that the number of violations investigated exceeded an average of 1,200 for the year, for each of the Code Enforcement Officers assigned to field work, conduct a study to determine the cause(s) for the increased demand for code enforcement activity, and identify alternate solutions to the problem(s), such as an enhanced program of community education and increased public relations efforts by Planning and Code Enforcement.~~

OBJECTIVE 1.3:

~~Prior to approval of plans for new developments or major redevelopments, review same to ensure that they take into consideration site topography and soil conditions, that they will not detrimentally impact the City's established minimum Level of Service standards, and that they comply with all applicable regulations including Cone of Influence land use restrictions and applicable environmental regulations.~~

POLICY 1.3.1:

~~Require that new facility upgrading or services that must be provided in connection with new development or (re)development to meet the City's established minimum level of Service Standards, be provided by the developer as a condition to issuance of the necessary development orders, approval or permit(s), and be in place prior to impacts of development.~~

POLICY 1.3.2:

Require that all new development and redevelopment, minor or major, comply with all applicable laws, including zoning, building, environmental regulations, subdivision control, stormwater management, open space requirements, traffic flow requirements, and parking.

POLICY 1.3.3:

Review all proposed development to ensure it complies with all the use density/intensity regulations set forth in the City's Zoning Code, as may be amended from time to time, provided, however, that the density of multi-family residential shall not exceed 25 units/acre, unless otherwise approved by the voters by referendum.

OBJECTIVE 1.4:

Prior to issuance of permits for new development and redevelopment projects, ensure that measures for the protection of affected natural resources are provided for.

POLICY 1.4.1:

Coordinate the review and permit issuance for new development and redevelopment projects with the appropriate City, County, and State agencies, and ensure implementation of pertinent lawful measures to ensure that the City's natural and historic resources are protected.

OBJECTIVE 1.5:

Ensure that sufficient and suitable land area is available for the expansion of utility facilities in connection with any proposed development requiring such expansion.

POLICY 1.5.1:

Require the appropriate parties to dedicate land, where such is necessary, to construct new utility facilities in connection with proposed development requiring such expansion.

GOAL 2:

TO ENCOURAGE THE EXPANSION AND REDEVELOPMENT OF OLDER STRIP COMMERCIAL DISTRICTS

OBJECTIVE 2.1:

Allow for the expansion of the N.W. 119th Street commercial strip district to N.W. 120th Street such that the district will have a depth of one full block, by or before the year 2000.

POLICY 2.1.2:

Create special district regulations for this area that will promote its redevelopment and at the same time improve conditions for the adjacent residential district, such as specifically, no access onto N.W. 120th Street; a minimum 10' wide continuous bermed and landscaped buffer from the property line in facing N.W. 120th Street; a solid, continuous masonry wall along the 10' setback line; and, permanent swale improvements on the south side of N.W. 120th Street.

OBJECTIVE 2.2:

~~Allow expansion of the N.W. 7th Avenue commercial district, on the west side, further to the west by two lots, by or before the year 2000, as follows: allow utilization of the lots closest to the alleyway for the provision of additional commercial off-street parking for existing and proposed future businesses; and allow utilization of the lots closest to the single-family residential area for Residential Office uses where additional parking areas are neither needed nor desired in connection with the N.W. 7th Avenue business district.~~

POLICY 2.2.1:

~~Create special district zoning regulations for the area proposed commercial off-street parking that will promote its redevelopment in a controlled and orderly fashion. Examples of typical and desired district regulations are: no buildings or structures in the designated parking area; a minimum 10' wide landscaped and continuous bermed buffer from any property line contiguous to residentially used property, with a solid, continuous 6' high masonry wall along the 10' setback line.~~

POLICY 2.2.2:

~~Create special district zoning regulations for the area proposed for Residential Office (R.O.) uses to ensure the adjacent low-density residential uses are protected from any adverse impacts, and to ensure adequate access and parking are provided in connection with said R.O., uses. Examples of typical and desired district regulations are: all off-street parking shall be provided in the rear of the property; only a circular driveway and required landscaping shall be permitted in the front of the property; only professional offices for attorneys, insurance agents, advertising specialists, engineers, planners, architects and the like, but excluding medical and dental clinics, will be permitted in an R.O. designated zone.~~

POLICY 2.2.3:

~~Consider, on a case-by-case, rezoning petitions to accommodate within the area designated for commercial parking, accessory drive-thru facility uses, using as one of the criteria whether or not the facility would eliminate the need for additional parking.~~

GOAL 3:

~~TO ENCOURAGE THE REDEVELOPMENT OF THE NORTHWEST 7TH AVENUE CAPTIVE STRIP, LOCATED BETWEEN 1-95 AND N.W. 7TH AVENUE AND BETWEEN N.W. 119TH AND N.W. 143RD STREETS.~~

OBJECTIVE 3.1:

~~Adopt a new zoning designation and land use regulations for this district which includes both commercial and light industrial uses no later than six (6) months following plan adoption.~~

POLICY 3.1.1:

~~Implement the district's land use regulations when reviewing (re)development plans for structures or land within the district.~~

GOAL 4:

~~TO PROMOTE THE EXPANSION OF THE EXISTING CENTRAL BUSINESS DISTRICT AND ELIMINATE EXISTING LAND USE INCOMPATIBILITIES BETWEEN COMMERCIAL AND RESIDENTIAL~~

OBJECTIVE 4.1:

~~Consider and act on rezoning petitions to expand the Central Business District as they are filed for the parcels described under item 4) of the Land Use Narrative of this element so that: adequate buffers may be created between residential and commercial; deterioration of the fringe residential may be averted; and parcel aggregation for larger scale development may be facilitated.~~

POLICY 4.1.1:

~~Create and implement new zoning criteria and development incentives which will accelerate the district's physical and economic redevelopment.~~

OBJECTIVE 4.2:

~~Create a buffer between the Central Business District and the adjacent low-density residential district along N.E. 126th Street and N.E. 8th Avenue by or before the year 2000, by allowing for the rezoning, from the present single-family residential designation to Residential Office (R.O.), of those properties which have direct frontage on the north side of N.E. 126th Street, between N.E. 8th and N.E. 10th Avenues, or which have direct frontage on the east side of N.E. 8th Avenue, between N.E. 126th and N.E. 129th Streets.~~

POLICY 4.2.1:

~~Create and implement special district regulations for the area proposed for Residential Offices (R.O.) uses as detailed in Policy 2.2.2 herein, with the exception that off-street parking may be provided in the front of the building.~~

GOAL 5:

~~TO ELIMINATE EXISTING LAND USE INCOMPATIBILITIES BETWEEN RESIDENTIAL AND COMMERCIAL AND BETWEEN LOW AND HIGH DENSITY RESIDENTIAL~~

OBJECTIVE 5.1:

~~Subsequent to plan adoption, review and act on petitions for the rezoning of the property described below, or initiate the rezoning of same by the year 2000, whichever occurs first.~~

~~Property #5 located on the northwest corner of N.E. 135th Street and N.E. 6th Avenue from low-density residential to office-commercial.~~

~~Property #6 comprising the two blocks between N.E. 127th and 129th Streets, and between N.E. 16th Avenue and the F.E.C. railway from low-density residential to medium-density residential.~~

~~Property #7 comprising the north 112 (app.) of the Parcel bounded by N.E. 16th Avenue, the F.E.C. Railway, and Arch Creek Road from high-density residential to office commercial.~~

~~Properties #8, one located on the southwest corner of N.E. 123rd Street and N.E. 19th Avenue, from high-density residential to office commercial, and the other located at 1905-07 N.E. 12-3 rd Street, from medium-density residential to office commercial.~~

~~POLICY 5.1.1:~~

~~Review existing zoning regulations vis-a-vis the proposed land use changes, and develop additional zoning criteria to address special concerns.~~

~~GOAL 6:~~

~~TO FACILITATE THE DEVELOPMENT OF THE THREE (3) LARGE VACANT PARCELS OF LAND DESCRIBED IN THE NARRATIVE UNDER LAND USE CHANGES NUMBERED 9 AND 10 FOR P.U.D.~~

~~OBJECTIVE 6.1:~~

~~By or before the year 2000, consider and act on, or initiate by the year 2000, whichever occurs first, the zoning to P.U.D. of the 30-acre privately owned parcel located south of N.E. 151st Street in the Interarna Tract, and the zoning to Public Use P.U.D. of the 330-acre city-owned tract also located in the Interarna Tract (38 acres of which are located just north of N.E. 151st Street and the remaining 292(+) acres to the south). At the time of zoning application, the reviewing bodies shall consider a Precise Plan for development and the various support studies and documents required in the respective P.U.D. and Public Use P.U.D. land use regulations and shall base their recommendations and final action on the desirability of said Precise Plan, vis-a-vis the City's economic development needs, the area's environmental characteristics, and use compatibility of the proposed development with adjacent areas. Appendix 2 reflects existing P.U.D. regulations applicable to the 30-acre Bessemer parcel.~~

~~POLICY 6.1.1:~~

~~Develop district regulations for the Public Use P.U.D. to be applicable to the City-owned 330 acres, drawing upon the current Public Use and current P.U.D. zoning regulations.~~

~~POLICY 6.1.2:~~

~~Ensure that development of these parcels is reviewed by all the appropriate State, County and City agencies.~~

~~GOAL 7:~~

~~TO MONITOR LAND USE TRENDS AND CONDITIONS IN RESIDENTIAL NEIGHBORHOODS SO AS TO MAINTAIN THE QUALITY OF LIFE~~

OBJECTIVE 7.1:

~~Within a two-year period following ordinance adoption, identify areas of blight in the community, rank these areas in order of priority, and develop a schedule which will ensure all such areas are studied and solutions identified within a five-year period.~~

POLICY 7.1.1:

~~Implement appropriate measures to upgrade the neighborhood(s).~~

OBJECTIVE 7.2:

~~By 1991, conduct a detailed study of the high density residential area located generally between N.E. 131st and 135th Streets and between N.E. 6th and 7th Avenues.~~

POLICY 7.2.1:

~~Establish data base through inventory of unit and people density, building conditions, parking and other infrastructures, neighborhood amenities, landscaping and open space, and traffic circulation.~~

POLICY 7.2.2:

~~Develop and implement measures to upgrade the area's quality of life.~~

OBJECTIVE 7.3:

~~By year 1996 allow the establishment of new public schools within areas designated low density residential (zoned R-3 and R-3A), area designated medium or high density residential (zoned R-4, R-5 and R-6), areas designated "public educational", and areas designated "public facilities."~~

POLICY 7.3.1:

~~Implement the appropriate zoning mechanisms as needed.~~

EAR-Based Comprehensive Plan Amendments

Volume I: Goals, Objectives, and Policies Transportation Element

2. Transportation Element

GOAL 1:2A

Provide for a safe, convenient, effective and efficient motorized and non-motorized transportation system, which is intricately related to the land use pattern and improves the level of mobility of all of the city's residents and visitors.

Roadway Level of Service

Objective 1.1:2A.1

~~To the maximum extent controllable by the City of North Miami, All roadways within the City and identified in this Element shall operate at or above~~ be monitored and analyzed for mobility based upon the roadway level of service (LOS) standards contained in this Element.

Monitoring and Evaluation:

- Level of service of all roadways within the City.

Policy 1.1.1:2A.1.1

~~The minimum acceptable peak period operating level of service standard for all State and County City, County, and State roads within North Miami identified in this Element shall be the following:~~

1. Where no public mass transit service exists, roadways shall operate at or above LOS standard is E (100 percent% of capacity).
2. Where mass transit service having headways of 20 minutes or less is provided within ½ mile distance, roadways shall operate at no greater than 120 percent of their capacity.
3. Where extraordinary transit service such as express bus service exists, parallel roadways within ½ mile shall operate at no greater than 150 percent of their capacity.

Policy 1.1.2:2A.1.2

~~Notwithstanding the foregoing, as required in Chapter 163.3180(10) of the Florida Statutes, the following level of service standards established by rule by the Florida Department of Transportation (FDOT), are adopted by the City of North Miami as its minimum level of service standards for the Florida Intrastate Highway System (FIHS) roadways within the City:~~

1. Limited access state highways shall operate at or above Level of Service D, except where exclusive through lanes exist, roadways may operate at Level of Service E.
2. Controlled access state highways shall operate at or above Level of Service D, except where such roadways are parallel to exclusive transit facilities or are located inside designated Transportation Concurrency Management

- Areas (TCMA), roadways may operate at Level of Service E.
3. Constrained or backlogged limited and controlled access state highways operating below the foregoing minimums must be managed to not cause significant additional deterioration.

Policy 1.1.4: ~~2A.1.3~~

In connection with future development, all roadway, transit, bicycle and/or pedestrian improvements shall be built by the respective developer(s), in accordance with the City's adopted ~~subdivision~~ Land Development Regulations, and ~~in place completed prior to issuance of a final certificate of occupancy~~ under construction within three years after the local government approves a building permit that results in additional traffic.

Policy 1.1.5: ~~2A.1.4~~

Issuance of all development orders for new development or significant expansions of existing development shall be contingent upon compliance with the level of service standards contained in Policy 1.1.1, Policy 1.1.2 and Policy 1.1.3, except as otherwise noted within the City's Comprehensive Plan coordinated with the City's efforts in maintaining mobility within the City boundaries. The City will require all new developments to invest in improvements related to transit infrastructure and other non-motorized modes.

Policy 1.1.6: ~~2A1.5~~

The City shall preserve existing rights-of-way to the extent that they continue to be necessary, and require that new rights-of-way be dedicated in perpetuity in connection with future development, where they are necessary to preserve the City's minimum level of service standards.

Transportation Concurrency Exception Area (TCEA)

Objective 1.2: ~~2A.2~~

A Transportation Concurrency Exception Area (TCEA) is hereby established and designated for the entire City of North Miami and shown in Exhibit 1. There shall be no traffic concurrency requirements for development applications within this area. In return, the City will continue to actively pursue the goals and objectives contained herein to create a sustainable development pattern within the City supportive of public transit and non-motorized travel modes such as bicycle and pedestrian linkages multimodal strategies identified in this Element and the Capital Improvements Element to maintain mobility within the City.

Monitoring and Evaluation:

- Implementation of mobility strategies in support of the TCEA.

Policy 1.2.1:

~~Within ninety (90) days of acceptance for the TCEA Designation by the Department of Community Affairs (DCA), the City shall amend its Land Development Regulations to~~

~~acknowledge the existence of the TCEA and its citywide exception to traffic concurrency.~~

Policy 2A.2.1

The City shall amend the Land Development Regulations to implement the objectives of the TCEA and the Community Redevelopment Area (CRA) Plan.

~~Policy 1.2.2:~~

~~If the City allows the private development of City-owned land within the RAC, then the City shall ensure that the City participates in the economic benefits of such development through such mechanisms as rental fees, a sharing in the net profits from the sales or leases of residential units, sharing in the lease proceeds from improvements on the City-owned land and/or lease payments for the City-owned land itself. The City will segregate and utilize a portion of the revenues from these sources to fund mobility improvements that will provide transit alternatives for the residents, employees and visitors of and to the RAC.~~

Policy 2A.2.2

The City is developing economic incentives for allowing private development within the Regional Activity Center (RAC). The City will commit to utilize a portion of the revenues from developments within the RAC to fund TCEA mobility strategies.

Policy 1.2.3:

~~Prior to the submittal of the 2005 Evaluation and Appraisal Report (EAR), the City will identify funding mechanisms for the cost of studies, plans and programs contained herein as well as targeted physical mobility improvements to serve the residents, employees and visitors of and to the RAC which might include, among other alternatives:~~

- ~~• a transit impact fee program that would provide dedicated funds for improving public transit serving new development within the Transportation Concurrency Exception Area~~
- ~~• ½ penny sales tax allocated by the County under the *Peoples Transportation Plan* for targeted mobility improvements including pedestrian, bicycle and mass transit linkages~~
- ~~• demonstration grant available from the Florida Department of Transportation to provide monies for funding the first three years of the local transit circulator service~~
- ~~• Transportation Enhancement Funds administered through District 6 of the Florida Department of Transportation for non-vehicular transportation improvements~~
- ~~• grant monies available from the Miami-Dade County MPO under their municipal grant program for transportation related studies within Dade County.~~

Policy 2A.2.3

The City will continue to identify targeted mobility strategies and funding opportunities to serve the residents including:

1. Establishing a transit impact fee program to improve public transit within the Transportation Concurrency Exception Area.
2. Utilizing the proceeds from the ½ penny sales tax allocated by the County under the *Peoples Transportation Plan* for TCEA mobility strategies.
3. Continuing to improve service headways, operations and route coverage of the NoMi Express.
4. Utilizing transportation enhancement funds administered through FDOT District 6 for TCEA mobility strategies.
5. Pursue grants available from the Miami-Dade County MPO.

Policy 1.2.4:2A.2.4

The City shall implement funding mechanisms for mobility improvements would be implemented strategies through amendments to the Land Development Regulations, if as appropriate.

Policy 1.2.5:

~~Prior to submittal of the 2005 Evaluation and Appraisal Report (EAR), the City shall amend its Land Development Regulations to establish the procedures for implementing identified funding mechanisms for transit improvements.~~

Policy 2A.2.5

The City shall amend its Land Development Regulations to establish the procedures for implementing identified funding mechanisms for transit improvements.

Policy 1.2.6:2A.2.6

~~The City, in cooperation with other appropriate public and private agencies, shall initiate methods strategies to decrease automobile travel on or encourage the more efficient use of encourage local traffic to use alternatives to the Florida Intrastate Highway System (FIHS) within the boundaries of the City's TCEA through implementation of plans, studies, programs and physical improvements identified as part of the policies contained herein, including:~~

- ~~• Identification of Identifying funding mechanisms to implement mobility improvements strategies (i.e. bicycle, pedestrian and mass transit linkages) within the TCEA.~~
- ~~• Prioritization Prioritizing for transportation projects within the TCEA that most favor alternative modes of travel to the single-occupant automobile TCEA mobility strategies within the City's Capital Improvements Program.~~
- ~~• Application Applying to the FDOT to partner in developing a Transportation Management Initiative (TMI) for the entire City as one means to mitigate peak hour traffic impacts through transportation demand management (TDM) programs such as carpooling, ridesharing, flex hours, etc.~~
- ~~• Creation of a transportation master plan for the City to improve the quality-of-life for residents by providing viable mobility alternatives to the automobile~~
- ~~• Operation of Operating a local transit circulator service having numerous connections to Miami-Dade County transit system.~~
- ~~• Continued improvements to sidewalks within the City to encourage pedestrian alternatives and improve pedestrian access to transit and commercial facilities~~
- ~~• Improvements to roadways within the City to include bicycle facilities that could encourage bicycling as a viable alternative to the automobile~~
- ~~• Implementation of the 'transit node' designation within the City to target compact, mixed-use development and redevelopment for specific areas of the TCEA that would promote transit-oriented design principles~~

Policy 2A.2.7

The City shall implement the recommendations of the 2005 Transportation Master Plan (TMP) to support the TCEA and related mobility strategies including, but not limited to:

1. Improving sidewalks within the City and enhancing the connections to transit facilities.
2. Appointing a bicycle/pedestrian coordinator to work with the community to increase walking and bicycling.
3. Developing a bicycle route network and creating a bicycle suitability map for distribution to residents.
4. Proactively work with Miami-Dade Transit to integrate the NoMi Express with Miami-Dade Transit Services.

Policy 2A.2.8

The City shall implement the recommendations of the 2005 Transit Oriented Development (TOD) Feasibility Study including, but not limited to:

1. Designating transit-oriented districts.
2. Developing a TOD district master plan that includes design guidelines, development incentives, and transit infrastructure.
3. Creating a transit oriented overlay district in the land development regulations that establishes an appropriate mix of land uses, densities, and site designs within the district.

Policy 2A.2.9

By December 2009, the City shall initiate a city-wide parking master plan to establish parking strategies to promote the TCEA and other transportation goals.

Transportation Agencies Coordination: FDOT, MPO, Miami-Dade County**Objective 1.3:2A.3**

The City shall coordinate with the Florida Department of Transportation (FDOT), local Miami-Dade Metropolitan Planning Organization (MPO), and Miami-Dade County to ~~implement capacity improvements (motorized and non-motorized) to the State and County road system within, and adjacent to, the City of North Miami so that the desired future growth patterns along these corridors shown in~~ coordinate the City's transportation system with the agencies' respective plans and programs consistent with the Future Land Use Map (FLUM) ~~may be adequately supported.~~

Monitoring and Evaluation:

- Coordination with FDOT, Miami-Dade MPO and Miami-Dade County to achieve City's transportation goals.

Policy 1.3.1:2A.3.1

The City will work with officials at the FDOT, ~~local Miami-Dade~~ MPO, and Miami-Dade County to promote the inclusion of projects in their plans, programs and development regulations that adequately provide future capacity for moving people safely and efficiently through the City.

Policy 1.3.2:2A.3.2

The City will solicit the expenditure of County Road Impact Fees on facilities that best benefit the City of North Miami through participation in the MPO's policy and technical coordinating committees.

Policy 1.3.3:2A.3.3

On an annual basis the City shall develop and maintain a 5-Year Capital Improvements Program ~~for~~ which schedules transportation improvements within the City.

Policy ~~1.3.4:~~2A.3.4

On an annual basis, the City shall inventory and prioritize transportation projects within the TCEA that most favor alternative modes of travel to the single occupant automobile for inclusion in the City's Capital Improvements Program.

Policy ~~1.3.5:~~2A.3.5

By January ~~2005~~ 2010, the City of North Miami will apply to the Florida Department of Transportation to partner in developing a Transportation Management Initiative (TMI) ~~for the entire City. This will include consideration of ways to mitigate peak hour traffic impacts through~~ Transportation Demand Management (TDM) programs such as carpooling, ridesharing and flex hours to reinforce the use of travel modes other than the automobile, especially public transit.

Policy ~~1.3.6:~~

~~By January 2005, the City will apply to the Miami-Dade County MPO for a grant to help fund a transportation master plan for North Miami that accommodates local mobility needs while enhancing the character of the community. The focus of the master plan will be to improve the quality of life for City residents by providing viable alternatives to the automobile. When complete, this plan will be adopted by the City Council and integrated into the City's Comprehensive Plan.~~

Policy ~~1.3.7:~~2A.3.6

The City will coordinate with officials at Miami-Dade Transit, the Miami-Dade MPO, and the Florida Department of Transportation to ensure that safe, continuous pedestrian and bicycle linkages are provided with in all future projects within one-quarter (1/4) ¼-mile of all transit stops located within the TCEA to connect residents and visitors with public transit for completing higher order trips.

Policy ~~2A.3.7~~

The City will continue to work with the FDOT on safety initiatives for major state roads, including, but not limited to, US 1, NE 125th Street, and interchanges with Interstate 95.

Policy ~~2A.3.8~~

The City will promote bicycle and pedestrian safety amongst local students by partnering with the Florida Department of Transportation to provide the *Florida Traffic and Bicycle Safety Education Program*, a school based program which teaches elementary and middle school students traffic safety principles through classroom instruction and on-bike safety skills.

Policy ~~2A.3.9~~

The City shall use its position as a voting member on the Miami-Dade Metropolitan Planning Organization (MPO) Governing Board to advocate for the City's transportation initiatives to encourage the implementation of transportation projects within the City of North Miami.

Neighborhood Impacts of Mobility Strategies

Objective 1.4: ~~2A.4~~

~~Development and expansion of the City's transportation system~~ Implementation of the City's mobility strategies should be done in a way that does not adversely minimize or mitigate impacts on community and neighborhood integrity.

Monitoring and Evaluation:

- Assessment of impacts of mobility strategies on the community.

Policy 1.4.1:~~2A.4.1~~

The City will preserve and protect the character of neighborhoods ~~from the avoidable intrusion of major thoroughfares and expressways by designating in an official map defined by the City of North Miami Neighborhood Map (2004) establishing the boundaries of established neighborhoods within the City limits.~~ The City will require that all capacity improvements, including mass transit, bicycle and pedestrian enhancements, be considered prior to moving forward with any road widening project that impacts ~~that~~ the character of the established adjacent neighborhoods. In partnering with neighborhood leaders of ~~impacted areas,~~ the City shall ensure that all future thoroughfares and expressway projects ~~brought forth by State, County and City agencies~~ include opportunities for community input and consider design elements that ~~could be incorporated into the construction plans that~~ favor safe, balanced, livable streets that accommodate various modes of travel.

Policy 1.4.2:~~2A.4.2~~

Major thoroughfares and intersections should be located and designed in a manner that would tend not to sever or fragment land which is, or could otherwise be, ~~developed as a~~ well-defined neighborhood.

Policy 1.4.3:~~2A.4.3~~

The City of North Miami will act upon citizen requests for traffic calming within residential neighborhoods in accordance with the procedures set forth under City Administrative Rule 130-14, outlining the procedures for the installation of speed humps within the City. Upon completion of a successful neighborhood petition and appropriate engineering study, the City Manager will review the conclusions and reasonable recommendations contained within the final report and make a determination if traffic calming measures will be installed.

Policy ~~2A.4.4~~

The City of North Miami will protect neighborhoods from unreasonable traffic impacts by utilizing traffic calming measures such as, but not limited to, street closures, signalization, site modifications, access controls, stop signs, and traffic separators.

Street Maintenance

Objective 1.5:2A.5

The City shall continue to maintain and improve, as appropriate, the approximately 100 ~~128~~ miles of municipal streets.

Monitoring and Evaluation:

- Maintenance of the 128 miles of municipal streets.

Policy 1.5.1:2A.5.1

Municipal streets will be scheduled for resurfacing at a rate of seven ~~five (5)~~ miles per year.

Policy 1.5.2:2A.5.2

In the review of development applications, the City's Building & Zoning Division shall require that the location of driveways on municipal streets comply with the Miami-Dade County's Public Works Standards Manual.

Policy 2A.5.3

The City of North Miami shall improve the aesthetics of roadway vistas through the planting of trees and the sodding of swales and other visual accents.

Pedestrian Facilities**Objective 1.6:2A.6**

Increase the amount of pedestrian activity on streets within the TCEA by providing adequate facilities to promote a pedestrian environment.

Monitoring and Evaluation:

- Analysis of pedestrian facilities and pedestrian activity within the TCEA.

Policy 1.6.1:

~~By January 2005, the City shall complete an inventory of existing sidewalks on all arterial, collector and local streets within the TCEA and place such an inventory in a geographic information system (GIS) to assist City staff identify gaps and priorities.~~

Policy 2A.6.1

The Pedestrian Facilities Map containing an inventory of existing sidewalks on all arterial, collector and local streets in a geographic information system (GIS) will be annually updated and maintained.

Policy 1.6.2:2A.6.2

~~By January 2007, the City will complete a citywide pedestrian facilities study for providing an interconnected pedestrian system within the TCEA that connects local residents and visitors to the area with transit stops and close-by destinations. Upon completion of the study, The City will act implement on the conclusions and reasonable recommendations of the 2005 Transportation Master Plan (TMP) and to include targeted~~

improvements for the pedestrian environment in the City's Capital Improvement Plan.

Policy ~~1.6.3:2A.6.3~~

By January ~~2005~~ 2010, the City will coordinate with members of the Florida Department of Transportation and Miami-Dade County to target pedestrian-friendly enhancements for the intersection of Biscayne Boulevard and NE 151st Street, such as brick crosswalks, intersection paver treatments, pedestrian-scale lighting and/or signal timing modifications, to better connect the east and west portions of the proposed Regional Activity Center.

Municipal Sidewalks**Objective ~~1.7:2A.7~~**

To the maximum extent possible, the City shall ensure the installation of the remaining ~~fifteen (15)~~ ten miles of sidewalk along municipal streets by 2008 and new sidewalks on improved County and State roads.

Monitoring and Evaluation:

- Installation of remaining ten miles of sidewalks along municipal streets.

Policy ~~1.7.1:2A.7.1~~

The City shall enforce the Code of Ordinances provision that requires construction of a sidewalk where one does not exist by adjacent property owners in connection with improvements totaling in excess of \$5,000.00.

Policy ~~1.7.2:2A.7.2~~

A local improvement taxing district will be created for sidewalk construction when, and if, requested by adjacent property owners.

Policy ~~1.7.3:2A.7.3~~

The City shall request that sidewalks be installed and/or repaired as part of any State or County highway widening or improvement project.

Policy ~~2A.7.4~~

By January 2008, the City will amend its Land Development Regulations to require redeveloped areas, and new developments when applicable, to provide pedestrian access into and through the developments.

Bicycle Facilities**Objective ~~1.8:2A.8~~**

Increase bicycle usage bicycling within the TCEA by providing adequate and safe facilities ~~to promote a bicycling environment.~~

Monitoring and Evaluation:

- Amount of bicycling within the City or bicycle LOS.

~~Policy 1.8.1:~~

~~By January 2005, the City shall complete an inventory of existing bicycle facilities within the TCEA and place such an inventory in a geographic information system (GIS) to assist City staff identify gaps and priorities.~~

Policy 2A.8.1

The Bicycle Facilities Map containing an inventory of existing bicycle facilities on all arterial, collector and local streets in a geographic information system (GIS) will be annually updated and maintained.

Policy 1.8.2:2A.8.2

By January ~~2007~~ 2010, the City will complete a citywide bicycle facilities study for providing an interconnected bicycle system within the TCEA that connects local residents and visitors to the area with transit stops and close-by destinations. Upon completion of the study, the City will act on the conclusions and reasonable recommendations to include targeted improvements to the bicycle environment in the City's Capital Improvement Plan.

Policy 1.8.3:2A.8.3

The City will work with representatives for Miami-Dade Transit to increase the number of MDT bus routes operating within the City that participate in the Agency's Bike and Ride Program.

Policy 1.8.4:2A.8.4

By January ~~2006~~ 2008, the City will amend its Land Development Regulations to require bicycle parking facilities to be included ~~be provided~~ for all new development and redevelopment of non-residential uses ~~on a site~~.

Policy 2A.8.5

By January 2008, the City will amend its Land Development Regulations to require redeveloped areas, and new developments when applicable, to provide bicycle access into and through the developments.

Policy 2A.8.6

By December 2008, the City will conduct a study of all municipal parking lots and provide bicycle parking facilities and appropriate signage in areas where there are deficiencies.

Bicycle Facilities Maintenance and Expansion**Objective 1.9:2A.9**

The City shall continue to ~~study, identify and construct a~~ improve the bicycle path system to serve primarily a recreational function within the general area including the Interama Tract, Florida International University Biscayne Bay Campus and Oleta River State Recreation Area.

Monitoring and Evaluation:

- Maintenance and expansion of the bicycle path system within FIU and Oleta River State Park.

Policy ~~1.9.1:~~2A.9.1

By the year 2008, the City shall develop, in cooperation with private and public entities, a bicycle path system east of Biscayne Boulevard. The project would be completed upon receipt of Federal, State or County funding.

Policy ~~1.9.2:~~2A.9.2

The City will participate in bicycle planning programs of the Miami-Dade MPO and District VI of the FDOT.

Rights-of-Way Acquisition**Objective 2A.10**

The City shall preserve existing rights-of-way and designate future rights-of-way as necessary, and require that future rights-of-way be dedicated as part of the development process.

Monitoring and Evaluation:

- Maintenance and acquisition of rights-of-way.

Policy 2A.10.1

The City shall ensure through its land development regulations that procedures for protecting existing rights-of-way and acquiring future rights-of-way are clearly established.

GOAL 2:-B

Develop a safe, convenient and efficient public transportation system within North Miami for residents, businesses, and visitors, with particular emphasis on adequate service for the local “transportation disadvantaged” population within the City.

Public Transit Service**Objective 2.1:2B.1**

Increase utilization of transit service by local residents, employees and visitors to help ~~reduce~~ minimize motor vehicle use and reduce traffic congestion.

Monitoring and Evaluation:

- Increase in transit ridership.

Policy 2.1.1:2B.1.1

The City of North Miami shall encourage MDT to consider improvements to the existing transit system including, but not limited to, increased routes, frequency of service, accuracy of scheduling and timed transfers at select major land uses within the City ~~such as designated commercial districts.~~

Policy ~~2.1.2:2B.1.2~~

The City of North Miami will coordinate with members of MDT and the Citizens' Independent Transportation Trust (CITT) to implement public transportation improvements, including but not limited to public transit, as identified in the *Peoples Transportation Plan*. ~~Funding for these improvements will come from the half-cent sales tax referendum approved by Miami-Dade County voters in 2002.~~

Policy ~~2.1.3:~~

~~The City will act on the conclusions and recommendations contained in the City of North Miami Transit Circulator Plan prepared in March 2002 and release a Request for Proposals (RFP) by 2004 soliciting an outside firm to operate the service depicted in Exhibit 2.~~

Policy 2B.1.3

The City will prepare a long term plan for the local transit circulator service within the City. The City will work towards increasing the route coverage and frequency of service for the transit circulator. The City will use the transit circulator to serve the transit dependent population.

Policy ~~2.1.4:2B.1.4~~

The City of North Miami will, through its seat on the MPO and participation in the South Florida Regional Transportation Authority (RTA), coordinate with members of Miami-Dade Transit, the member counties and cities, and the local Miami-Dade MPO concerning their study of the FEC railroad as a potential future premium transit corridor connecting Downtown Miami with Broward County to the north, especially as it relates to exploring the feasibility of linking ~~the mix of transit supportive land uses proposed in the~~ Regional Activity Center with the possible dedicated premium transit corridor. ~~To this end, the City of North Miami will send one representative to serve on the technical advisory committee being formed for the Office of Public Transportation Management's Alternatives Analysis/Major Investment Study for the Northeast Corridor, scheduled to begin in late 2003. Upon completion of the study The City will act in coordination~~ coordinate with other agencies on regarding the conclusions and reasonable recommendations contained within the report produced by the Alternatives Analysis/Major Investment Study.

Policy ~~2.1.5:2B.1.5~~

The City of North Miami will coordinate with members of the Miami-Dade County MPO, Office of Public Transportation Management and the City of North Miami Beach concerning their study to identify potential locations to move the bus transfer station currently at the 163rd Street Mall. To this end, the City of North Miami will send one representative to serve on the technical advisory committee formed for this study.

Policy 2B.1.6

The City will coordinate with Miami-Dade Transit (MDT) authorities for increased interaction between the two services in terms of transfer stops and route schedules to

make it convenient for transit riders to transfer between the two services for local and regional transit trips. The City will work with MDT to develop transit mobility strategies.

Policy 2B.1.7

The City shall amend the Land Development Regulations to implement transit friendly site and building design guidelines within public transit corridors and TOD districts. The Land Development Regulations shall also contain land use guidelines for areas adjacent to transit corridors that support compact mixed use development accessible and oriented to transit facilities.

Transit Modal Split

Objective 2.2:2B.2

Increase the transit modal split for all work trips within the City of North Miami.

Monitoring and Evaluation:

- Increase in transit modal split.

Policy 2.2.1:2B.2.1

The City of North Miami shall work with Miami-Dade Transit and the Office of Public Transportation Management to improve transit service within the City ~~and make public transit a more viable alternative to automobile travel.~~

Policy 2.2.2:2B.2.2

The City of North Miami will provide incentives, such as increased allowable density or reduced parking requirements, to developers of all residential, commercial and/or general office land uses that place public transit facilities within their parcels.

Emergency Transit Plan

Objective 2.3:2B.3

Coordinate with Miami-Dade Transit and the Miami-Dade Emergency Management Department to help ensure development of an emergency transit plan that will provide timely evacuation of the Coastal High Hazard Area during tropical storms and hurricanes.

Monitoring and Evaluation:

- Coordination efforts and/or development of an emergency transit plan.

Policy 2.3.1:2B.3.1

The City Manager shall appoint a City employee to meet with the Miami-Dade Emergency Management Department at least every six months to coordinate on evacuation plans and related issues and report back to the City Manager.

Policy ~~2.3.2:2B.3.2~~

Timely evacuation operations shall be established to commence four (4) hours after an evacuation order is issued by the County Administrator.

GOAL ~~3:2C~~

Preserve and enhance desirable development patterns that support the City's vision to provide for a safe, convenient and efficient motorized and non-motorized transportation system to satisfy the transportation needs of the City's residents and visitors through the implementation of the City's Capital Improvement Plan (CIP) and the Community Redevelopment Agency (CRA) Plan.

Transportation / Land Use Coordination**Objective ~~3.1:2C.1~~**

The transportation system shall be coordinated with the Future Land Use Map (FLUM) and the goals, objectives and policies of the Future Land Use Element to ensure that transportation facilities and services are available to adequately serve existing and proposed population densities, land uses and housing and employment patterns.

Monitoring and Evaluation:

- Consistency between the transportation element and the future land use map (FLUM) and future land use element (FLUE).

Policy ~~3.1.1:2C.1.1~~

~~In connection with future development, The City shall require that adequate and safe internal circulation improvements be provided and take into consideration the provision that pedestrian pathways paths be in place prior to issuance of final certificate of occupancy.~~

Policy ~~3.1.2:~~

~~By January 2006, the City shall provide a local transit circulator service within one quarter (1/4) mile of fifty percent (50%) of all medium and high density residential areas identified in the City's Future Land Use Map.~~

Policy ~~2C.1.2~~

~~The City will continue to maintain and expand the local transit circulator service, NoMi Express, within 1/4-mile of 50 percent of all medium- and high-density residential areas identified in the City's Future Land Use Map.~~

Policy ~~3.1.3:~~

~~Prior to submittal of the 2005 Evaluation and Appraisal Report (EAR), the City will complete a land use and transportation planning study aimed at establishing transit nodes within the TCEA as "transit oriented centers". Upon completion of the study, the City will act on the conclusions and reasonable recommendations from the report to designate geographic specific areas within the City as transit oriented centers.~~

~~Furthermore, at the completion of the study, the City will incorporate guidelines into its Comprehensive Plan as amended policies to encourage transit oriented design principles within these established transit nodes and will coordinate with Miami-Dade Transit, the Office of Public Transportation Management and the Miami-Dade County MPO to ensure adequate transit service is focused in these areas. Ideally, these transit oriented centers would evolve into having a 24-hour presence by providing housing, restaurants and cultural activities to encourage use beyond working hours and create a sense of place within the community.~~

Policy 2C.1.3

The City shall implement the recommendations of the City of North Miami Transit Oriented Development (TOD) Feasibility Study (2005). The City will designate specific geographic areas within the City as TOD districts. The City will include transit supportive strategies into its Land Development Regulations and coordinate with Miami-Dade Transit, the Office of Public Transportation Management and the Miami-Dade County MPO to ensure adequate transit service is focused in the TOD districts. Ideally, these TOD districts would evolve into having a 24-hour presence by providing housing, restaurants and cultural activities to encourage use beyond working hours and create a sense of place within the community.

Policy 3.1.4:

~~By January 2006, the City will amend its Land Development Regulations to implement guidelines for establishing transit oriented centers within the City and provide incentives to developers of all residential, commercial and/or general office land uses within the City's established transit nodes oriented centers whom include transit oriented design principles in their development plans and whom include design features consistent with the plans, studies and evaluations identified in Objective 1.9 and Policies 1.6.2, 1.8.2, 1.9.1, 2.1.3, 2.1.4, 2.1.5 and 3.1.3 contained herein.~~

Policy 2C.1.4

The City shall amend the Land Development Regulations to implement guidelines for establishing TOD districts within the City and provide incentives to developers of all residential, commercial and/or general office land uses within the established TOD districts that include TOD principles and design features determined appropriate by the City.

Policy 3.1.5:2C.1.5

The City will work with the Miami-Dade County MPO and the Florida Department of Transportation to prioritize pedestrian, bicycle, and transit projects within their work programs and transportation improvement plans ~~to serve transit nodes established within the TCEA.~~

Policy 3.1.6:2C.1.6

The City will work with the Miami-Dade County MPO, the Florida Department of Transportation and other transportation agencies that recommend transportation

projects within the City of North Miami to ensure that the improvements further the City's Comprehensive Plan.

State and County-Maintained Roadways

Objective 3.2:2C.2

The City shall monitor traffic volumes on existing State- and County- maintained roads that cross North Miami and require in connection with future development that roadway improvements be undertaken by the developer as a condition to issuance of necessary permits to ensure that the goals, objectives, and policies of this Element are met.

Monitoring and Evaluation:

- Annual monitoring of traffic volumes on State- and County-maintained roadways and assessment of investment in roadways associated with future development.

Policy 3.2.1:2C.2.1

~~In connection with future development, and at the City's plan review stage, The City shall require that specific improvements to State and County roads be coordinated with the applicable respective agencies by the developer(s) and that the necessary improvements, which are to be made conditions of issuance of related development orders or permits, be carried out in conjunction with construction of the development and in place prior to the impacts of development.~~

Policy 2C.2.2

By 2008, the City will undertake a traffic impact analysis with the assistance of Miami-Dade County MPO to analyze the effects of the Redevelopment Plan on State and County maintained roadways.

Policy 2C.2.3

The City will attempt to mitigate all traffic impacts to State and County maintained roads as required.

Community Redevelopment Plan

Objective 3.3:2C.3

The City shall work in conjunction with the Community Redevelopment Agency to maintain consistency between the transportation system and the goals of the Community Redevelopment Area (CRA) Plan.

Monitoring and Evaluation:

- Assessment of the level of coordination between transportation system and the CRA plan.

Policy 3.3.1:2C.3.1

The CRA Plan will include a parking study aimed at providing safe, efficient and attractive public parking within the redevelopment areas by implementing strategies like joint parking between adjacent uses and construction of parking areas and structures.

Policy 3.3.2:2C.3.2

The CRA Plan will include streetscape design and other urban design concepts and elements for redevelopment areas aimed at increasing the attractiveness of the City and creating an identity for the CRA.

Policy 3.3.3:2C.3.3

The CRA Plan will include transit related improvements and infrastructure investments within the higher density areas of the CRA in order to promote transit usage.

Policy 2C3.4

The CRA will design a circulation plan, road typology, profiles and nodes, that will promote City identity, define the City limits, and enhance the driving experience at arrival/gateway points, major traffic-way Boulevards within the CRA streets.

EAR-Based Comprehensive Plan Amendments

Volume I: Goals, Objectives, and Policies Housing Element

3. Housing Element

GOAL 1:

GOAL 3A

To ensure that housing in the City is decent, safe and sanitary to serve the needs of the City's present and future residents.

Improve Existing Housing

Objective 1.1 3A.1

~~By the year 2000, the~~ The City shall ensure decent, safe and sanitary housing by continuing to eliminate or have caused the improvement of improve any existing housing that does not meet the City's minimum housing standards ~~established by Dade County.~~

Monitoring and Evaluation:

- Conduct inventory of current housing stock by 2009 to assess number of homes that do not meet minimum housing standard and,
- Rehabilitation of a minimum of 100 homes using CDBG,SHIP, HOME, CRA and other funds by December 2009.

Policy 1.1.1: —

~~The City shall allocate funds in its operating budget, no later than 1995, to provide for at least one full-time housing enforcement officer.~~

Policy 1.1.2 3A.1.1

The City shall continue to apply for local, State and Federal funding to enhance and revitalize existing ~~for neighborhoods improvements~~ and/or housing rehabilitation programs.

Policy 1.1.3: 3A.1.2

The City shall monitor the on-going use of Federal, State and local subsidy programs to ensure those residents and/or property owners taking advantage of such, are provided ~~within~~ with an opportunity for living and/or maintaining housing within the City while maintaining respect for established housing location patterns, standards and codes.

Policy 1.1.4: 3A.1.3

The City shall ~~develop no later than one year after plan adoption~~ maintain a series of materials for dissemination to the residents containing information on existing rules and regulations which aim to preserve the quality of the housing and quality of the City's neighborhoods.

Policy 3A.1.4

The City should actively pursue innovative strategies to preserve the existing housing stock through tools such as a Community Land Trust and a Shared Appreciation Model Program. By 2009, the City should conduct a feasibility study on the potential benefits of said tools and partner with other relevant housing organizations and agencies to work toward its implementation as may be determined to be necessary or beneficial to the City.

Policy 3A.1.5

By 2009, the City shall consider the conversion of the deferred loan concept of Community Development Block Grant, (CDBG) State Housing Initiatives Partnership (SHIP) and HOME Investment Partnership Program funded programs to a revolving loan program to ensure future funding availability for the provision of affordable housing, preservation of the City's housing stock and extended affordability periods.

Policy 3A.1.6

By 2009, the City shall examine the feasibility of amending the adopted Housing Guidelines and the City's Land Development Regulations to encourage the use of Universal Design in new construction, residential rehabilitation and remodeling to simplify life for everyone by installing products, and making the built environment more usable by as many people as possible and to benefit people of all ages and abilities.

Policy 3A.1.7

The City Housing staff should maintain a database to actively manage the number of homes rehabilitated using local, State and Federal subsidy programs to ensure effective implementation of housing funds.

Policy 3A.1.8

By December 2009, the City should rehabilitate a minimum of 100 homes using CDBG, SHIP, HOME, CRA and other funds.

Policy 3A.1.9

The Housing Division shall continue to implement the City's housing guidelines, which address various housing programs offered by the City to rehabilitate, and improve the quality of the City's housing stock, thus enhancing and preserving existing neighborhood character.

Policy 3A.1.10

In conjunction with Transportation Element Policy 2A.4.4, the City of North Miami will protect neighborhoods from unreasonable traffic impacts by utilizing traffic calming measures such as, but not limited to, street closures, signalization, site modification, access controls, stop signs, speed bumps, and traffic separators.

Former Objective 1.2 and corresponding polices have been renumbered and placed under Objective 3A.3

Code Enforcement

Objective 3A.2

To ensure that the minimum housing standards are upheld through regular enforcement of the City's code of ordinances.

Monitoring and Evaluation:

- Eighty five percent reduction in the number of homes that do not meet minimum housing standards as evaluated by the Code Enforcement Department by December 2010.
- Creation of a property information system to track code deficiencies by January 2009.

Policy 3A.2.1

The City and the CRA shall make every effort to allocate funds in their respective operating budgets to provide for full-time code enforcement officers, provided that any CRA funding would be for the purpose of providing an enhanced level of code enforcement services that would be above the level of service standard that the City provides in the CRA area. (former Housing Element Policy 1.1.1, revised)

Policy 3A.2.2

In concurrence with Future Land Use Element Policy 1.7.4, the City shall ensure that a minimum of one code enforcement officer for every square mile of developed property is maintained.

Policy 3A.2.3

In concurrence with Future Land Use Element Policy 1.7.3, the City should develop a Community Aesthetics program in conjunction with the City's Code Enforcement Department to enforce appropriate standards for maintenance, appearance and occupancy of residential areas.

Policy 3A.2.4

By 2009, the City's Code Enforcement Department should undertake measures to ensure efficiency of the Code Enforcement Department, by bringing 85 percent of non-compliant houses into compliance.

Policy 3A.2.5

By January 2008, the Code Enforcement Department should implement a property information system to track deficiencies in housing, buildings at risk of abandonment, code violations, tax arrearages and crime complaints.

Historic Preservation

Objective 1.2: 3A.3

Continue to coordinate with the Miami-Dade County Office of Historic Preservation Office to ensure the preservation of historically or architecturally significant housing in residentially zoned districts for residential uses.

Monitoring and Evaluation:

- Inventory of historically significant housing by December 2009.

Policy 1.2.1: 3A.3.1

When a building permit is applied for to renovate or remodel housing listed by the Miami-Dade County Office of Historic Preservation Division as historically or architecturally significant, the City shall refer the applicant to said Division Office for plan review and approval. This procedure will also enable the applicant to determine whether State or Federal funding is available to assist with the proposed renovation or remodeling.

Policy 3A.3.2

The City shall conduct a local inventory of architecturally and historically significant sites and housing by December 2009, in conjunction with data received from the Florida Master Site File.

Policy 3A.3.3

The City should implement a historic preservation program for the preservation of units identified in the City's inventory of significant housing and establish land development regulations to guide the preservation, rehabilitation and demolition of historically significant housing units.

Housing Unit Sustainability

Objective 1.3 3A.4:

~~By the year 1990,~~ The City shall ~~and~~ continue to institute the appropriate measures to extend the usefulness, sustainability, and economic life of the existing housing stock by requiring structural and aesthetic improvements to the same.

Policy 1.3.1 3A.4.1

Review and revise, those portions of the City's Code, relating to maintenance standards in residential neighborhoods that are in need of revision.

Policy 1.3.2: 3A.4.2

Encourage private (re)investment in housing by making available to interested individual homeowners general information on housing rehabilitation programs, in order to ensure that the City's housing stock remains viable for its future as well as current residents.

Policy 1.1.3:3A.4.3

Make available to interested homeowners the advice of professional City staff concerning topics such as, energy conservation measures in the home, and neighborhood enhancement programs to include, tree planting in the swales, tree matching programs, and City administered sidewalk maintenance programs.

Policy 1.3.4:3A.4.4

The City shall partner with Encourage local banks to establish loan pools making available to City residents low interest money loans for housing rehabilitation and other improvements, in order to ensure the healthy condition of the City's housing stock for current and future generations.

Policy 3A.4.5

The City shall continue to pursue and maintain funding for the Disaster Mitigation/Recovery Strategy Program to assist with post-disaster repairs and encourage the timely repair of homes damaged as a result of disaster activity.

Reduction of Overcrowded Units**Objective 3A.5:**

The City shall create a methodology for alleviating overcrowding through existing home rehabilitation and new housing development in coordination with the CRA.

Monitoring and Evaluation:

- By December 2009, obtain a 15 percent reduction in the number of overcrowded households.
- Assessment of the housing stock to determine new number of overcrowded units following the 2010 US Census.
- Commencement of feasibility study on accessory dwelling units by December 2009.

Policy 3A.5.1

The City and CRA shall encourage, through their redevelopment activities, additional resident employment opportunities, including job training and job new creation, in order to assist very-low and low income households in addressing the issues of overcrowding and cost burden.

Policy 3A.5.2

In conjunction with affordable housing development policies contained herein, the City shall address the issue of a lack of affordable housing by conducting a feasibility study including, but not limited to accessory dwelling units in an attempt to create additional affordable units, thus reducing overcrowding of existing units.

Policy 3A5.3

The City shall study the feasibility of adopting an Accessory Dwelling Unit Ordinance by December 2009 to address overcrowding and to increase the availability of affordable

housing for extremely low income, very low income, low income, or moderate income persons, in the retention of existing accessory dwelling units consistent with the intent of Florida Statute 163.31771.

Special Needs Housing

Objective 1.4-3A.6:

The City will continue to provide the same opportunity for the location of group homes, foster care facilities, and special needs housing in residential settings as it has provided in the past.

Monitoring and Evaluation:

- Maintenance of zoning classifications that allow special needs housing.

Policy 1.4.1: 3A.6.1

The City will maintain at least one residential zoning classification within which certain classifications of group homes will be allowed as a special exception.

Policy 1.4.2: 3A.6.2

As part of developing the City's Land Development Regulations and in compliance with State law, the City shall adopt requirements that provide for the location and equitable distribution of group homes, small scale affordable elderly rental facilities, and foster care facilities licensed or funded by the Florida Department of Children and Family Services within existing residential neighborhoods.

~~The City shall continue to review and act on special exception applications for establishment of Adult Congregate Living Facilities (Level V or above) seniors in the applicable residential district in accordance with established review criteria and standards.~~

Policy 1.4.3: 3A.6.3

The City shall review and hold public hearings on applications for establishment of other types of group homes in residential districts and determine their appropriateness based on the particular district's character.

Policy 3A.6.4

The City should continue to facilitate in-house processing of proposed developments intended for persons with special housing needs such as the elderly and disabled persons. (Former Policy 2.3.7)

Policy 3A 6.5

Promote assisted living facilities (ALFs), group homes, and adult day care facilities in the residential and mixed use areas of the City subject to state law.

GOAL 2:**GOAL 3B**

To provide adequate housing and affordable housing opportunities for the existing population and anticipated population growth.

Development Review**Objective 2.1:3B.1**

~~Within one year of Plan adoption, the~~ The City shall further continue to streamline the regulatory processes to avoid unnecessary costs and delay in housing development.

Monitoring and Evaluation:

- Establish and maintain site plan application processing time in a development review flow chart.

Policy 2.1.1: 3B.1.1

The City should work closely with the development community so it may proceed through administrative requirements in a timely fashion.

Policy 2.1.2: —

~~Monitor, and amend as necessary, the City's Zoning Ordinance so it is clear, easy to understand, and readily available for public use.~~

Policy 3B.1.2

The City should reduce policy barriers by streamlining the administrative approval and permitting process and provide incentives for developers proposing affordable housing developments to eliminate excessive requirements, such that increased private sector participation to meet the projected housing needs may be attained. (Former Housing Element Policy 2.3.5, revised)

Policy 3B.1.3

In concurrence with Future Land Use Policy 1.1.6, the City shall adopt Land Development Regulations that support and implement the City's housing policies and programs by December 2009.

Policy 3B.1.4

Allow deferred payment of City impact fees in cases of hardship, as approved by the City Council, to encourage the provision of new or rehabilitated affordable housing units and for other housing units that promote green building initiatives. (Former Housing Element Policy 2.3.6, revised)

Policy 3B.1.5

Home occupations and live/work units are encouraged while maintaining the character of residential neighborhoods and where consistent with the Land Development Regulations to continue the jobs/housing balance.

Policy 3B1.6

The City shall encourage the development of moderately priced live/work units within the Neighborhood Redevelopment Overlay district to provide housing options for essential service workers.

Housing Need and Development**Objective 2.2:3B.2**

Through 1995, the The City shall continue to be active in identifying the housing needs of the community through periodical housing needs assessments and continue to develop appropriate programs for providing housing.

Monitoring and Evaluation:

- Annually monitor housing need, cost burden, housing demand, median income and median housing price indicators to reflect residents' ability to afford housing in the City.
- By 2009, complete a housing study to analyze the demographic changes and links to housing to maintain an adequate jobs/housing balance.

Policy 2.2.1:3B.2.1

Institute within the existing administrative framework the capability to monitor the housing supply, demand, needs, and trends, including housing opportunities and constraints for very-low, low, and moderate income residents, in order to properly direct housing programs.

Policy 2.2.2:3B.2.2

The City shall partner ~~Work~~ closely with the appropriate County, and other government agencies on loan, rehabilitation, and related housing programs which may be utilized by eligible residents to upgrade the housing stock.

Policy 2.2.3:3B.2.3

Work with the local realtors and realty boards to monitor home sales, apartment rental activities, and vacancy rates.

Policy 3B.2.4

By December 2009 the City and the CRA shall conduct an Affordable/Workforce Housing Needs Analysis to have a current assessment of the City's affordable housing needs based upon income and tenure.

Policy 3B.2.5

The City should conduct a feasibility study identifying housing linkages, such as an employer based linkage program to create additional housing as needed in the City with the intention of maintaining an adequate job/housing balance.

Policy 3B.2.6

The City recognizes the need for affordable housing and as such shall continue to expand options toward meeting the needs of the very low, low and moderate income population by developing, on an ongoing basis, model programs for providing safe and adequate affordable housing in the City. In furtherance of this policy the City shall assess the feasibility of utilizing accessory dwelling units to support affordable housing efforts in the City.

Policy 3B.2.7

The City shall allow for a range of housing options in development and redevelopment to maintain a balance of housing options and to avoid undue concentration of very low and low-income housing, subsequently promoting economically disenfranchised neighborhoods.

Policy 3B.2.8

In concurrence with Future Land Use Element, Policy 1.3.12, the City shall examine the possibility of an inclusionary zoning ordinance, mandating the creation of affordable housing units in proposed developments or providing options such as payment in lieu of, with fees payable to a Housing Trust Fund established for the creation of affordable housing units in the City.

Policy 3B.2.9

The City should enhance and continue to promote its first-time buyer program to assist with home purchases.

Policy 3B.2.10

The City should enhance and promote its Homeownership Development Assistance Program to encourage a rental to condominium conversion that provides funds and partnerships with apartment owners for the provision of remodeled units to the City for tenant purchase and relocation.

Policy 3B.2.11

The City shall award density and height bonuses for the provision of affordable housing, “green” initiatives consistent with the US Green Building Council’s LEED Green Building Rating System as amended and/or the nationally recognized green standards acceptable to the City, and the provision of transportation mitigation strategies.

Partnership with External Agencies**Objective 2.3:3B.3**

Encourage partnerships with public and private sector agencies involved in the provision of affordable housing and participate in establishing local housing programs that will assist the City in meeting the current and projected demand for affordable housing. Through the use of the mechanisms identified in the policies below, assist public agencies and the private sector in increasing the number of affordable housing units

~~needed to meet year 2000 projected population demands. by 50% by the year 1995, and the additional remaining demand by the year 2000.~~

Monitoring and Evaluation:

- Conduct “think-tank” meeting with City staff and local non-profits, County, State and Federal housing agencies by December 2009 to discuss affordable housing strategies and identify opportunities in the City.
- Create inventory of eligible homes for rehabilitation to work toward implementation of Munisport agreement, by July 2008.

Policy 2.3.1:3B.3.1

Collaborate with the US Department of Housing and Urban Development (HUD), the Florida Finance Authority, the Miami-Dade County Housing Authority, the Miami-Dade County Office of Community and Economic Development and local banks, to increase the allocation of incentive programs (i.e. low interest rehabilitation loans, HUD property acquisition and disposition program) to present or prospective residents and developers for the renovation and rehabilitation of existing units as affordable housing and for the provision of new affordable units in residential areas.

Policy 2.3.2:—

~~Maintain the residential land use mix proposed in the Future Land Use Element so as to ensure an affordable housing mix as to type, size, location and cost, is maintained.~~

Policy 2.3.3:-

~~Discourage (through denial of rezoning) demolition of existing housing stock other than in cases where the health safety and welfare of the population would be adversely impacted, where such would be replaced with greater density of units, or where such would conflict with the Future Land Use Element of this Plan.~~

Policy 2.3.4:3B.3.2

Provide ongoing education and information ~~and technical assistance~~ regarding the City’s existing housing programs to the private sector such that the required housing demand may be met. Designate a Staff liaison to disseminate information to the private sector on housing development regulations and available incentive programs.

Policy 2.3.5

~~Streamline the administrative approval and permitting process to eliminate excessive requirements, such that increased private sector participation to meet the projected housing needs may be attained.~~

Policy 2.3.6:

~~Allow installment payment plan of City impact fees in cases of hardship, as approved the City Council, to encourage the provision of new or rehabilitated affordable housing units and for other housing units.~~

Policy 2.3.7

~~Facilitate in-house processing of proposed developments intended for persons with special housing needs such as the elderly and the handicapped.~~

Policy 2.3.8:

~~Permit the placement of mobile homes within the City's single-family R-3 and R-3A zoning districts provided that such mobile homes are attached to permanent foundations, meet all applicable building, zoning, and safety codes, are architecturally compatible with surrounding development, and meet all other requirements of the City's land development regulations.~~

Policy 2.3.9: 3B.3.3

For all private residential development undertaken on City-owned land in the Regional Activity Center (RAC) that does not qualify as affordable housing, the City and the developer shall collaborate to establish mechanisms for construction, rehabilitation, and/or funding programs that provide or otherwise assist in the provision of affordable housing units within the City. In the case of the Biscayne Landing project, the developer shall develop or provide for the development, redevelopment, renovation or rehabilitation of an equivalent number of affordable housing units within the City as are to be constructed within the boundaries of the RAC and pursuant to the development agreement between the City and the developer.

Policy 3B.3.4

The City's Housing Division shall create and maintain an inventory of eligible homes for rehabilitation under the Munisport development agreement in coordination with the CRA.

Policy 3B.3.5

The City shall cooperate with the CRA which will administer a residential rehabilitation program.

Policy 3B.3.6

The City shall encourage businesses to offer homeownership assistance to cost-burdened employees.

Policy 3B.3.7

The City shall continue to coordinate with Miami-Dade County Emergency Management to provide short-term emergency shelter opportunities to meet expected demands.

Policy 3B.3.8

The City should coordinate with local, regional and State housing agencies, including non-profits and other interested stakeholders, to conduct a "think-tank" meeting with City staff, residents and stakeholders to discuss potential affordable/workforce housing strategies in the City.

Redevelopment

Objective: 3B.4

To ensure an adequate balance of housing in the redevelopment area, that will ensure a range of housing options by providing the appropriate densities, intensities, height, type, and size that encourage the creation of new housing units.

Monitoring and Evaluation:

- Creation of a displacement plan by July 2010.

Policy 3B.4.1

The City should encourage the creation of a displacement plan in accordance with the Federal Uniform Relocation Assistance and Real Property Act as related to the City and CRA policies and cooperate with the CRA's relocation policy to provide for displaced residents by July 2010.

Policy 3B.4.2

Through mixed-use redevelopment activities, the City shall encourage workforce housing that is accessible to employment opportunities, shopping, and public transportation, incorporating the mobility principles outlined in the Transit Oriented Development Study.

Policy 3B.4.3

In the redevelopment process the City shall require developers of both market rate and affordable/workforce housing to utilize principles of sustainable design by implementing environmentally friendly and green building design standards as further defined in the LDR.

EAR-Based Comprehensive Plan Amendments

Volume I: Goals, Objectives, and Policies Infrastructure Element

4. Sanitary Sewer, Solid Waste, Drainage, Potable Water, and Natural Groundwater Aquifer Recharge, Aquifer Recharge Infrastructure Element

SANITARY SEWER

GOAL 2:4A

To provide an adequate sewage collection system for service area customers and maintain an agreement with Miami-Dade County to dispose of all sewage collected.

Sewage Collection

Objective 2.1:4A.1

Continue in perpetuity to provide sufficient sewage collection capacity for 100 percent of the customers within the existing service area.

Monitoring and Evaluation:

- Provision of sewage collection system to meet sewage collection demands within the service area and maintain excess capacity to serve future growth.

Policy 2.1.1: 4A.1.1

Allocate funds to renew and replace existing sewage pumping equipment, sewage collection lines, and individual lateral lines, as they reach their useful life.

Policy 2.1.2:4A.1.2

Maintain the capacity of the sewage collection and disposal system at a level of service (LOS) Level of Service standard not to exceed 200 gallons of 185 gallons per capita per day.

Policy 4A.1.3:

By 2009, the City shall complete a sanitary sewer master plan to guide future sanitary sewer system upgrades, to match infrastructure improvements with the build-out of the Future Land Use Map, and to reduce demand on the sewage collection and disposal system on a per capita basis.

Additional Sewage Collection Capacity

Objective 2.2:4A.2

Provide additional sewage collection capacity in connection with new development outside the City limits, by requiring the respective developers to upgrade the sewer system, such that the current level of service standard is not impacted detrimentally.

Monitoring and Evaluation:

- Maintaining the existing service standard while providing sewage collection to new development within the service area.

Policy 2-2-1:4A.2.1

In connection with issuance of development orders, approvals, or permits the City shall require developers to upgrade the capacity of existing systems, or build new system to meet the needs of the development., to ensure a minimum LOS of 100 gallons/capita/day is maintained. All work to meet the standards set forth by Florida Department of Environmental Regulation. For new development and redevelopment, sewage flow allocations shall be as follows:

Table 4-1: Sewage Flow Allocations

Type of Establishments	Gallons per day (GPD)
<u>RESIDENTIAL</u>	
Single Family	350 (GPD for 2+ bedrooms) 150(GPD per additional bedrooms)
Townhouse	150 (GPD/bedroom)
Apartment	150 (GPD/bedroom)
Mobile Home	225 (GPD/Mobile Home)
Duplex or Twin Home	(same as single family for entire structure)
Barber Shop	170 (GPD/Chair)
Beauty Salon or Hair Boutique	200 (GPD/Chair)
Bowling Alleys (toilet waste only)	100 (GPD/Lane)
Dentist Offices	
a) Dentist	250 (GPD/Dr.)
b) Wet chair	200 (GPD/Chair)
<u>COMMERCIAL</u>	
Doctor Offices (/doctor)	25 Gal/100 S.F.
Full Service Restaurant (350 GPD Min.)	50 (GPD/Seat)
Bar and Cocktail Lounge	15 (GPD/Seat)
Fast Food Restaurant (350 GPD Min.)	35 (GPD/Seat)
Take-Out Restaurant (350 GPD Min.)	50/100 (GPD/S.F.)
Hotels and Motels	200 (GPD/Room)
Laundries, self-service	225 (GPD/Washer)

Type of Establishments	Gallons per day (GPD)
Office Building	10/100 (GPD/S.F.)
Service Stations	450 GPD
Shopping Centers	10/100 (GPD/S.F.)
Stadiums, Race Tracks, Ball Parks	3 (GPD/Seat)
Stores, w/o Food Service	5/100 (GPD/S.F.)
Theaters	
a) Indoor, Auditorium	3 (GPD/Seat)
b) Outdoor, drive-ins	5 (GPD/Space)
Camper or Trailer Parks	200 (GPD/Space)
INDUSTRIAL	
Factories (exclusive of industrial wastes)	
a) without showers	10/100 (GPD/S.F.)
b) with showers	30/100 (GPD/S.F.)
Churches	3 (GPD/Seat)
Hospitals	250 (GPD/Bed)
Nursing, Rest Homes	150 (GPD/Bed)
Parks, public picnic	
a) with toilets only	200 (GPD/Fixture)
b) with bathhouse, showers and toilets	200 (GPD/Fixture)
Public Institutions (other than Hospitals)	75 (GPD/Person)
Jail, Boarding Schools, etc.	
School	10 (GPD/Person)
Swimming & Bathing Facilities, public	10 (GPD/Person)
Warehouse/Industrial-Speculation Bldg.	10/100 (GPD/S.F.)
Storage or Mini Warehouse	30+10/100 (GPD/S.F.)
Banquet Hall	25 (GPD/Seat)

SOLID WASTE

GOAL 4B:

To provide a solid waste collection service that exceeds the minimum State standards.

Solid Waste Collection

Objective 4B.1:

Attempt to operate complaint free garbage and trash collection system for residents of the City, and maintain a LOS Level of Service which provides collection of 4.5 lbs. per capita per day.

Monitoring and Evaluation:

- Maintenance of the solid waste LOS standard.

Policy 4B.1.1

Provide twice a week backyard garbage collection. Provide front curbside garbage collection twice a week.

Policy 4B.1.2

Provide trash collection once per week to every home. Provide bulk trash collection from the front swale once a week.

Policy 4B.1.3

Provide special collection of large items on-call. Provide curbside recycling once a week.

Business Solid Waste Collection

Objective 4B.2

In perpetuity monitor through a complaint recording system, the collection of waste from business generators by private haulers and or the City, and request modifications to the collection procedures to resolve specific problems which impact the City and its residents.

Monitoring and Evaluation:

- Resolution of specific problems that impact businesses that are generated by private waste haulers.

Policy 4B.2.1

By letter contact haulers to advise them of specific problems and request resolution of problems affecting the City and its residents.

GOAL 5:

~~To institute resource recycling programs.~~

Resource Recovery Program

Objective 5.14B.3

~~Maintain~~ Incorporate a resource recovery program as a component of the City's into the existing solid waste collection service in perpetuity. by 1993.

Monitoring and Evaluation:

- Maintenance of the resource recovery system.

Policy 5.1.14B.3.1

Educate the citizenry in the techniques of separating recyclable resources from other solid wastes through distribution of written materials.

City Recovery Program

Objective 5.2:4B.4

~~Maintain~~ Implement a newspaper, paper, plastic, glass, and aluminum recovery program within City facilities in perpetuity. by 1993.

Monitoring and Evaluation:

- Maintenance of recycling program in City facilities.

Policy 5.2.1:

~~Promote the resource recovery program among City employees, and distribute recovery containers throughout City facilities.~~

Policy 4B.4.1

Promote the resource recovery program among City residents.

Solid Waste Disposal

Objective 4B.5

Coordinate with Miami-Dade Department of Solid Waste Management to ensure that solid waste disposal capacity will continue to be available to serve future growth in the City of North Miami.

Monitoring and Evaluation:

- Execution of an inter-local agreement with Miami-Dade County to dispose of all solid waste generated by the City of North Miami for a period of at least ten years in the future.

Policy 4B.5.1

By 2009, execute an inter-local agreement with Miami-Dade County to dispose of all solid waste generated by the City of North Miami for a period of at least ten years in the future.

NATURAL GROUNDWATER AQUIFER RECHARGE AREAS**GOAL 64C**

To promote and protect natural groundwater aquifer recharge.

Aquifer Recharge**Objective 6.1:4C.1**

Those natural areas which currently serve to recharge the aquifer shall be preserved and protected in perpetuity.

Monitoring and Evaluation:

- Enforcement of land development regulations that protect ground water.

Policy 64C.1.1

In the review of development plans, ~~for swale areas, encourage engineering solutions that would allow for retention of runoff in the swale. require compliance with existing City regulations mandating the 40% percent ratio of previous to impervious land.~~

Policy 64C.1.2

Continue to require, in perpetuity, that developments provide on-site ground disposal of rainwater based on 0.0417 cubic feet of rainwater during any five-minute period for each square foot of impervious area drained.

Policy 64C.1.3

In the building permitting process, review all plans for compliance with the Miami-Dade County regulations that prevent harmful pollutants from being discharged into the aquifer.

Policy 64C.1.4

Require compliance with the Miami-Dade County Wellfield Protection Ordinance, by regulating occupational uses within land located in the Cone of Influence.

Policy 4C.1.5

Identify and protect major natural drainage features and natural groundwater aquifer recharge areas, including areas identified by SFWMD as prime or high groundwater recharge areas.

Policy 4C.1.6

By 2009, amend the land development regulations to include maximum impervious surface coverage allowances for all of the City's zoning districts.

POTABLE WATER**GOAL 14D**

To provide an adequate supply of quality water to service area customers which meets all national water quality standards.

National Water Quality Standards**Objective ~~1.~~14D.1**

Continue meeting or exceeding in perpetuity Federal, State, and County water quality standards.

Monitoring and Evaluation:

- Meet or exceed Federal, State, and County water quality standards.

Policy 14D.1.1

Continue to implement water quality monitoring standards and procedures as set forth by the Federal, State, and County governments.

Water Provision**Objective ~~1~~ 4D.2**

Continue to provide ~~12.5 million gallons of an adequate supply of potable water per day to meet the demands of the service area population by through the year 200 for domestic and commercial water consumption demands at a rate of 16 million gallons per day 2025 by purchasing water from Miami-Dade WASD through the year 2010 and by constructing reverse osmosis water treatment facilities by the years 2010 and 2015.~~

Monitoring and Evaluation:

- Provision of water that meets water service area demands.

Policy 14D.2.1

Maintain the water treatment plant and distribution system such that they operate at adequate levels to meet service population demand.

Policy 14D.2.2

Maintain a level of service standard ~~design flow/standard of 125~~ 165 gallons/capita/day, a minimum pressure at the water meter of 30 p.s.i., and a total storage capacity ~~of 5 million gallons~~ equal to no less than 15 percent of the service area average daily demand.

Policy 14D.2.3

~~Obtain additional~~ Maintain water supply connections ~~to the~~ with Miami-Dade W.A.S.A. ~~WASD's~~ Regional Water Transmission system.

Policy 4D.2.4

Construct reverse osmosis water treatment facilities as scheduled in the Winson Water Treatment Plant Feasibility Study.

Policy 4D.2.5

Coordinate water supply planning with any future redevelopment activities.

Purchase Agreements**Objective 14D.3**

Until the year ~~2010~~ 2000, the City will purchase up to 6 million gallons/day from Miami-Dade County WASD ~~W.A.S.A.~~ through existing connections to meet the ~~projected~~ demands of the water service area.

Monitoring and Evaluation:

- Maintain an agreement to purchase up to 6 million gallons/day of potable water from Miami-Dade WASD.

Policy 14D.3.1

Coordinate with Miami-Dade County WASD ~~W.A.S.A.~~ to ensure the City's current contract with that agency, ~~which assures an unlimited water supply to the year 2002,~~ allows it to purchase up to 6 million gallons/day.

Fire Flow**Objective 14D.4**

By 2010, upgrade the existing water distribution system to meet Miami-Dade County fire flow requirements.

Monitoring and Evaluation:

- Meet Miami-Dade County fire flow requirements.

Policy 14D.4.1

Replace existing inadequate diameter mains with larger mains through assessment districts, funds from the Fire Flow Account and from utility revenues.

Policy 14D.4.2

Install fire hydrants in areas which are deficient.

Policy 14D.4.3

Continue charging fire flow impact fees and deposit these into the Fund to upgrade
City of North Miami Comprehensive Plan Amendments

those portions of the water distribution system as recommended by the Miami-Dade County Fire Department.

Policy 14D.4.4

Continue budgeting the replacement of one 4 mile of two-inch 2" diameter water mains per year.

Contract Maintenance**Objective 14D.5**

The City shall maintain a contract with Miami-Dade County for the rendition of water service for as long as it depends on supplemental potable water or reuse water from Miami-Dade County Water & Sewer Department (WASD). ~~In year 2002 renegotiate existing contract for another 30 years with the Miami-Dade Water & Sewer Authority for an unlimited supply of water and storage capacity to be extracted from the Dade County northwest wellfield located in proximity to the water conservation areas of the South Florida Water Management District.~~

Monitoring and Evaluation:

- Maintenance of contract with Miami-Dade County WASD.

Policy 14D.5.1

The City shall execute water service contracts in time to ensure that no interruption in service occurs.

Water Reduction Mandates**Objective 14D.6**

Ensure that residents within the City comply with SFWMD and Chapter 19 Article 3 of the City's Code of Ordinances South Florida Water Management District, mandates for reductions in water consumption ~~are complied with.~~

Monitoring and Evaluation:

- City's efforts to assist SFWMD with mandates for reduction in water consumption.

Policy 14D.6.1

Provide written notification to water customers of the required mandated water conservation measures and provide for enforcement through the City's Building Division and Code Enforcement Department.

Xeriscaping

Objective 14D.7:

Encourage the use of xeriscaping concepts and native plantings to minimize ~~reduce~~ the need for irrigation.

Monitoring and Evaluation:

- Incorporation of landscaping regulations that encourage the use of xeriscaping and native landscaping.

Policy 14D.7.1

Incorporate into the existing landscaping regulations measures that encourage the use of native, ~~non-irrigation intensive~~ landscaping in both private and public development.

DRAINAGE

GOAL 34E

To ~~provide an adequate~~ maintain a stormwater management system that provides adequate flood protection and upholds water quality standards.

Stormwater Systems

Objective 34E.1

In perpetuity, maintain the efficiency of existing City owned systems, and eliminate systems that may pose a liability to the City and/or the environment. Maintain the ~~The~~ existing systems ~~have with~~ a capacity to dispose of a five-year ~~two-year~~ design storm return frequency with a 24-hour duration ~~is maintained~~.

Monitoring and Evaluation:

- Maintain adequate capacity to dispose of a five-year design storm return frequency with 24-hour duration for existing City-owned system.

Design Storm Minimum LOS

Objective 34E.2

In connection with new development, require construction of new City stormwater systems that provide a minimum LOS Level of Service for disposal of a 25-year ~~two-year~~ design storm with a 72-hour ~~24-hour~~ duration and, if applicable, require construction of permitted storm drain systems that fall under other governmental agencies providing storm drainage disposal service. This standard shall be applicable to development impacting on State owned or maintained facilities. Where applicable, the design of the system shall be approved by the water management division of Miami-Dade County and provide a minimum level of service adopted by Miami-Dade County Resolution R-951-82, as may be amended from time to time.

Monitoring and Evaluation:

- Require that appropriate stormwater disposal systems are constructed prior to the impacts of new development.

Policy 34E.2.1

During the review and approval of site plans for new development, and as a condition of issuance of development orders, approvals or permits, require the appropriate public or private stormwater disposal system that will not pose a potential liability to the City or the environment, be constructed in conjunction with the development, and in place prior to the impacts of development.

Policy 4E.2.2

Maintain stormwater level of service standards consistent with those set by the SFWMD.

Drainage Issues**Objective 34E.3**

Identify drainage problems which fall under the jurisdiction of other governmental agencies, and request that these problems be addressed in their drainage master plan. In conjunction with the request that problems be addressed, the City shall coordinate with the appropriate governmental agencies with the operational or maintenance responsibility, in establishing minimum LOS Level of Service Standards for the facilities.

Monitoring and Evaluation:

- Identification of drainage problems are being address in drainage master plan and establish level of service standards through coordination with appropriate governmental agencies.

Policy 34E.3.1

Coordinate with the local Metropolitan Planning Organization M.P.O. to ensure adequate drainage is proposed for future roadway projects.

Policy 34E.3.2

Monitor citizen complaints and report inadequate drainage areas to the responsible government agencies.

Policy 4E.3.3

Establish water quality standards for stormwater recharge.

Policy 4E.3.4

Existing stormwater outfalls that do not meet or improve upon existing water quality or quantity criteria or standards, or cause negative impacts to Natural Resources of Regional Significance, shall be modified to meet or exceed the existing water quality or quantity criteria or standard.

Policy 4E.3.5

Restore and improve water quality throughout the system by:

1. requiring stormwater treatment and management;
2. protecting wetlands, native uplands, and identified aquifer recharge areas; and
3. implementing best management practices, such as utilization of low phosphorus fertilizers.

Policy 4E.3.6

Protect the habitat and water quality of the Region's Outstanding Florida Water bodies by requiring stormwater discharges to meet applicable non-degradation water quality standards.

Policy 4E.3.7

Restore natural volume, timing, quality, and distribution of water to the Everglades, Florida Bay, Biscayne Bay, other estuaries, and the Atlantic Ocean by:

1. implementing structural and operational modifications to the Central and Southern Florida Project including Modified Water Deliveries to Everglades National Park, the C-111 Project, and the Comprehensive Everglades Restoration Plan;
2. implementing the East Coast Buffer/Water Preserve Areas; and
3. implementing the Lower East Coast Water Supply Plan so that the needs of the natural system are met consistent with ecosystem restoration.

Policy 4E.3.8

Restore and improve marine and estuarine water quality by:

1. improving the timing and quality of freshwater inflows;
2. reducing turbidity, nutrient loading, and bacterial loading from wastewater facilities, septic systems, and vessels;
3. reducing the number of improperly maintained stormwater systems; and
4. requiring port facilities and marinas to implement hazardous materials spill plans.

Policy 4E.3.9

Protect the Biscayne Bay Aquatic Preserve (BBAP) through such measures as:

1. discontinuing all untreated stormwater discharges to the Bay;
2. requiring stormwater treatment systems to meet the required non-degradation water quality standards for this Class III, Outstanding Florida Water body;
3. discouraging development that proposes to fill within the Bay or discharge contaminants to its waters; and
4. connecting developments that are served by septic tanks within the watershed of the BBAP to central sanitary waste treatment facilities to treat pathogens and remove nutrients from the wastewater effluent.

WIRELESS TECHNOLOGY

GOAL 4F

Explore efforts to increase access to information technology for all citizens in North Miami, while making the City a wireless community.

E-Commerce and E-Government

Objective 4F.1

Enhance the growth in E-commerce and E-government, and the trend toward technology convergence by encouraging the development of the infrastructure needed to further their use.

Policy 4F.1.1

Further the cooperation between the City and Miami-Dade County and local universities, colleges, middle and high schools, in applying information technology throughout the community.

Policy 4F.1.2

Encourage the underground placement of existing wired facilities, thus supporting a more reliable information technology.

Policy 4F.1.3

Integrate wireless technology in all City government facilities including parks, library, city hall, etc.

Policy 4F.1.4

Encourage and promote wireless infrastructure in the design of new construction and redevelopment during the Planning and Site Plan review process.

Policy 4F.1.5

Promote regional cooperation in the formation of information technologies alliances.

EAR-Based Comprehensive Plan Amendments

Volume I: Goals, Objectives, and Policies Coastal Management Element

5. Coastal Management Element

GOAL 15A

Protect human life and property in the coastal area of North Miami.

Flood Protection

Objective ~~1.1:5A.1~~

~~Upon Plan adoption, the City shall enforce the minimum floodplain management regulations of the Federal Emergency Management Agency (FEMA) and the City's Flood Damage Prevention Ordinance the Dade County Flood Criteria, whichever is most restrictive for new construction for new and substantially improved buildings.-~~

Monitoring and Evaluation:

- Enforcement of the flood plain management regulations.

Policy ~~1.1.1:5A.1.1~~

~~As part of the existing permitting and zoning approval procedures, the City shall review all plans for construction within the floodplain area to ensure conformity with minimum acceptable standards set forth in Chapter 8.5 of the City's Code of Ordinances.~~

Policy 5A.1.2

The City shall discourage variances under the City's Flood Damage Prevention Ordinance, Chapter 8.5, which shall undergo review by the City's Flood Plain Management Planning Committee - which shall hold frequent meetings.

Policy 5A.1.3

The City intends to maintain the Flood Plain Management Planning Committee as an oversight body to enforce Chapter 8.5 of the City's Code of Ordinances and to review all requested amendments to the provision.

Policy ~~1.1.2:5A.1.4~~

~~The City shall continue to participate in the Community Rating System (CRS) and the National Flood Insurance Programs (NFIP), and disseminate information relative to its provisions.~~

Policy 5A.1.5

In an effort to minimize flood insurance premium rates for North Miami residents, the City shall endeavor to maintain or improve upon it's Class 5 rating to a Class 4 or better - recognized by the Community Rating System as floodplain management activities that exceed the minimum NFIP requirements.

Policy 5A.1.6

To prevent further additions to the list of Repetitive Loss (RL) properties published by FEMA, the City shall remain committed to working on eliminating RL properties within the City to a point that qualifies as a category A or B Community.

Policy 5A.1.7

The City shall also continue to enforce Chapter 8.5 of the City's Code of Ordinances, in an effort to eliminate an increase in the number of RL properties.

Policy 5A.1.8

Continuous attempts should be made by the City to promote the acquisition, or retrofit of RL properties.

Policy 5A.1.9

The City of North Miami adopts the Hurricane Vulnerability Zone (HVZ) as defined in Florida Statutes Chapter 163, and Rule 9J-5.003(57), as the areas requiring evacuation during a Category 3 hurricane event and as the area identified as Storm Surge Evacuation Zone B by the Miami-Dade County Office of Emergency Management.

Policy 5A.1.10

Within the City, the Coastal Planning Area, also known as the Hurricane Vulnerability Zone (HVZ) shall be defined as the land east of Biscayne Boulevard, continuing to the easternmost boundary of the City which extends into the waters of Biscayne Bay.

Hazard Mitigation**Objective 1.2:5A.2**

Upon Plan adoption, the City shall monitor and revise The City shall implement programs and policies in conjunction with Miami-Dade County to protect residents and business from disasters and mitigate hazards.

Monitoring and Evaluation:

- Implementation of programs and policies to protect residents and business from disasters.

Policy 1.2-1:5A.2.1

The City shall implement the existing post-disaster programs and procedures outlined in the City's Hurricane Manual, as amended, and the County's Hurricane Procedures, to identify in identifying immediate actions necessary needed to protect the health, welfare, and safety of its citizens- residents.

Policy 1.2-2:5A.2.2

As part of on-going monitoring and updating procedures, the City shall ensure that all applicable provisions of the hazard mitigation annex of the Miami-Dade County Emergency Operations Plan, and the Miami-Dade County Local Mitigation Strategy

(LMS) from other applicable hazard mitigation reports, are incorporated and/or addressed in local regulatory hazard mitigation procedures.

Policy ~~1.2.3~~5A.2.3

The City shall monitor problems and life-threatening situations resulting from natural disaster occurrences and take the appropriate steps to ensure that the potential for such problems and situations are minimized in the future ~~is lessened~~.

Policy 5A.2.4

The City shall implement the provisions included in the Local Mitigation Strategy to provide for debris clearance as well as immediate repair and replacement of public infrastructure required to protect public health and safety.

Policy 5A.2.5

The City shall make every effort to support and implement the initiatives and projects listed in the Local Mitigation Strategy, including both countywide initiatives and the following proposed hazard mitigation projects located in North Miami:

1. Flood Prevention and Mitigation at Arch Creek East Drainage Basin
2. Flood Prevention and Mitigation: Basins 8 and 9
3. Critical Facilities Hazard Mitigation
4. Non-critical Facilities Hazard Mitigation
5. Embankment Stabilization at Keystone Point Bridge #2
6. Surge Resistance and Flood Mitigation at Keystone Point and Sans Souci
7. Sanitary Sewer Backup
8. Safeguarding Availability of Potable Water
9. Flood Zone Data Maintenance: GIS System
10. Global Positioning System
11. Emergency Portable Stormwater Pumps
12. Gravity Sewer Systems Improvements: Groundwater Infiltration Reduction
13. Emergency Power: Water and Sewer Utility Operations Center
14. Communications and Records Management System
15. Marine Patrol Vessel
16. Security for Police Station
17. Security for City Hall
18. Security for the Winson Water Plant at Sunkist Grove
19. Correct Water Infiltration at City Hall (EOC) Basement
20. Structural Hardening for Police Station

Policy 5A.2.6

The City shall continue to participate in the National Incident Management System (NIMS), which is especially beneficial to local governments as a comprehensive and consistent approach to emergency management at all jurisdictional levels and across all functional emergency management disciplines.

Policy 5A.2.7

In an effort to achieve compliance with NIMS adopted practices, the City shall adopt NIMS at the community level for all government departments and agencies and promote NIMS adoption and use by associations, utilities, non-governmental organizations and the private sector by the year 2010. Furthermore, NIMS should be adopted through executive order, proclamation, resolution, or legislation as the jurisdiction's official all-hazards, incident response system.

Policy 5A.2.8

The City's Marine Patrol shall continue to patrol the waterways of the greater North Miami marine area, and shall increase enforcement of regulations such as Department of Homeland Security initiatives, as well as Federal, State, local and marine laws.

Policy 5A.2.9

The City shall encourage the "hardening" of homes through the City's Housing Rehabilitation Program to strengthen homes against hurricanes and natural hazards and to reduce hurricane damage exposure in the City.

Policy 5A.2.10

The City shall promote and educate the public on strengthening their structures against natural disasters by promoting the hardening of structures in accordance with the Florida Comprehensive Hurricane Damage Mitigation Program (My Safe Florida Home).

Coastal Area Hurricane Evacuation**Objective 1-3:5A.3**

Upon Plan adoption, the review and approval of all plans for future development within the coastal area will consider the impacts of development on hurricane evacuation times to maintain or reduce hurricane evacuation times.

Monitoring and Evaluation:

- The maintenance or reduction of hurricane evacuation times within the coastal area.

Policy 1-3-1:5A.3.1

Review of development proposals within the coastal planning area shall consider vehicular accessibility and internal circulation patterns to minimize so that the time required to evacuate the coastal planning area. site(s) shall be minimized.

Policy 5A.3.2

Direct high-density population concentrations away from the coastal planning area and provide incentives to encourage and promote development within the City's central core/Neighborhood Redevelopment Overlay.

Policy 5A.3.3

The City shall relieve deficiencies identified in the hurricane evacuation analysis and endeavor to integrate regional and local preparation and evacuation procedures into the City's hazard mitigation measures.

Post-Disaster Redevelopment**Objective 5A.4**

Prepare post-disaster redevelopment plans in the coastal area which reduce or eliminate the exposure of human life and public and private property to natural hazards.

Monitoring and Evaluation:

- The implementation of policies contributing to the reduction or elimination of exposure of human life and property to natural hazards by June 2010.

Policy 5A.4.1

Prepare a post-disaster redevelopment plan by 2010 addressing public safety, land use, infrastructure, and public investment concerns. Included in the post-disaster redevelopment plan shall be policies that determine procedures needed to protect the public health and safety and immediate and long-term cleanup and repair activities; as well as the removal, relocation, or structural modification of damaged infrastructure and unsafe structures.

Policy 5A.4.2

Incorporate recommendations found in interagency hazard mitigation reports into the comprehensive plan and post-disaster redevelopment plan.

Policy 5A.4.3

Limit redevelopment in areas known to suffer repeated damage during hurricane and other natural disaster events.

GOAL 2:5B

Protect existing public water dependent and water related uses.

Public Access to Shoreline**Objective 2.1:5B.1**

The City shall proactively work to increase amount of public access to beaches or developed shorelines consistent with public needs. ~~devoted to publicly owned water dependent and water related uses will be expanded by the year 2000.~~

Monitoring and Evaluation:

- The increase of the amount of public access to beaches or shorelines.

Policy ~~2.1.1:5B.1.1~~

~~Through the existing regulatory processes, preserve and develop for the public's enjoyment the 14-acre tract located at Biscayne Bay just north of NE 135th Street.~~

Policy 5B.1.1

The City shall continue to support the implementation of the Arch Creek Bike Path which provides additional access to the 12-acre Arch Creek East Environmental Preserve - an area that will eventually provide additional public shoreline access.

Policy ~~2.1.2:5B.1.2~~

~~The City shall Through the existing regulatory processes, preserve and provide public access open to the public the three (3) spoil islands located in Biscayne Bay within North Miami boundaries.~~

Policy 5B.1.3

Provide transportation or parking facilities for beach and shoreline access.

Provide for Water-dependent Uses**Objective ~~2.2:5B.2~~**

~~Upon Plan adoption, the review and approval of all plans for future development within the coastal area shall consider give consideration to the need for the placement of water-dependent and water-related uses in the appropriate locations. and prioritize shoreline uses.~~

Monitoring and Evaluation:

- Consideration through plan review of future development and water related land uses to ensure compatibility with adjacent land uses.

Policy ~~2.2.1:5B.2.1~~

Through the adopted existing regulatory processes, the City shall ensure that water-dependent and related uses are compatible with adjacent land uses and accessible to upland support services, taking into consideration the protective status of private ownership, compatibility and ~~compatible~~ with established hurricane procedures, and sensitivity ~~sensitive~~ to environmental constraints.

Policy 5B.2.2

The City shall establish priorities for siting water-dependent and water-related land uses.

Policy 5B.2.3

By the year 2010 amend the Land Development Regulations (LDR) and establish performance standards for shoreline development.

Policy 5B.2.4

Institute marina siting criteria that address existing protective status of ownership, hurricane contingency planning, protection of water quality, water depth, availability of upland support services, land use compatibility, environmental disruptions and mitigation actions, availability for public use, and economic need and feasibility.

GOAL 3:5C

Protect, preserve and maintain the natural resources within the coastal area and restrict development activities that would damage or destroy coastal resources.

Protect Coastal Natural Resources**Objective 3.1:5C.1**

~~Upon Plan adoption, the~~ City shall coordinate closely with the Biscayne Bay Management Committee, the Miami-Dade County Department of Environmental Resource Management (DERM), and other appropriate regulatory agencies to maintain or improve, to significantly reduce estuarine environmental quality pollution, and protect, conserve, and enhance living conditions for coastal resources including coastal wetlands, living marine resources, and wildlife habitats.

Monitoring and Evaluation:

- Maintenance or improvement of the estuarine environmental quality and coastal resources through coordination with the agencies listed in this objective.

Policy 3.1.1:5C.1.1

The City shall be an active participant in the Miami-Dade County Shoreline Development Review Committee, to ensure that future development and activities in the City do not negatively impact the identified estuarine systems.

Policy 3.1.2:5C.1.2

The City shall continue to restore those natural resources within the coastal planning area City limits disturbed by activities undertaken by the City, as may be required by law.

Policy 5C.1.3

The City, through its regulatory processes shall limit specific and cumulative impacts of development or redevelopment upon wetlands water quality, water quantity, surface water runoff, exposure to natural hazards, wildlife habitat, and living marine resources.

Policy 5C.1.4

The City shall develop programs to identify, protect, preserve, and establish performance standards for the development and sensitive reuse of historic resources located within the coastal planning area.

Policy 5C.1.5

The City shall continue to participate in the National Pollution Discharge Elimination System (NPDES) and the Total Maximum Daily Loads (TMDL) programs.

Policy 5C.1.6

The City shall establish construction standards consistent with the DERM and the Army Corps of Engineers, which minimize the impacts of man-made structures on beach or dune systems.

Policy 5C.1.7

The City shall continue to protect the natural habitat found in the area known as Arch Creek East Environmental Preserve, 12 acres of City-owned bayfront property containing regionally significant and environmentally important natural communities such as mangrove tidal swamps and wildlife habitats.

Policy 5C.1.8

The City shall enforce the Code of Ordinances provision prohibiting dumping or solid waste deposits in certain protected areas.

Policy 5C.1.9

The City shall adopt landscaping requirements in the Land Development Regulations that restrict certain invasive non-native plants and species - thereby protecting the existing native natural resources.

GOAL 4:

~~Protect the existing and future infrastructure improvements and their ability to serve public demand.~~

GOAL 5D

Limit future infrastructure improvements and other public expenditures in areas vulnerable to destruction by natural disasters.

Coastal Planning Area of Service**Objective 4.1:5D.1**

~~Level of service standards, areas of service, Upon Plan adoption, service areas and the phasing of infrastructure will be developed on an "as-needed" basis to ensure development is adequately served and to ensure compliance with the mandates of State law regarding the provision of infrastructure. The same level of service standards applicable to the other portions of the City shall apply to for the coastal planning area.~~

Monitoring and Evaluation:

- Level of service standards within the coastal planning area are being maintained.

Policy 4.1.1:5D.1.1

All infrastructure improvements needed to serve future developments in the coastal planning area shall be ~~required as a condition of~~ in place prior to the issuance of the necessary development orders, approvals or permit(s), and such improvements shall be in place prior to impacts of development in order to maintain adopted so that the existing levels of service are not lowered.

Policy 5D.1.2

Development in the coastal planning area shall be limited to uses which have historically proven to be less vulnerable to storm damage.

Policy 5D.1.3

Ensure the availability of required infrastructure to serve the development or redevelopment in the coastal planning area at the densities proposed by the future land use plan, consistent with coastal resource protection and safe evacuation. The funding for such infrastructure shall be phased as to coincide with the demands generated by development or redevelopment.

Coastal Planning Area / Hurricane Vulnerability Zone Improvements**Objective 4.2:5D.2**

~~Upon Plan adoption, the location of future infrastructure improvements in designated coastal high-hazard coastal planning areas shall~~ minimize public expenditures that subsidize development except for the restoration or enhancement of natural resources. consider the vulnerability of such improvements to anticipated storm activities, as well as the alternatives for location of such facilities outside of the high-hazard area(s).

Monitoring and Evaluation:

- Infrastructure improvements and public expenditures in coastal planning area, particularly the hurricane vulnerability zone.
- The identification and designation of hurricane vulnerability zone through the monitoring of storm activities.
- The implementation of measures to ensure that unsafe, vulnerable, and/or inappropriately placed land uses are not developed or redeveloped.

Policy 4.2.1:5D.2.1

Monitor storm activities which threaten or cause damage to existing structures and facilities, so that the vulnerability of such can be assessed, and the potential for the identification and designation of potential hurricane vulnerability zones can be evaluated.

Policy 4.2.2:5D.2.2

The development or redevelopment of unsafe, vulnerable, and/or inappropriately located uses shall not be undertaken in designated hurricane vulnerability zones, unless the proper measures have been taken to ensure the safety and soundness of such uses, in accordance with existing law.

EAR-Based Comprehensive Plan Amendments

Volume I: Goals, Objectives, and Policies Conservation Element

6. Conservation Element

GOAL 2:6A

Implement programs and activities to protect and conserve the quality of the City's air and the quality and quantity of the city's water and land resources.

Fuel efficient municipal fleet

Objective 2.1:6A.1

Continue to promote greater air quality in the City and by utilizing through utilization of lower emission vehicles for the municipal fleet and encourage hybrid and alternative fuel vehicles.

Monitoring and Evaluation:

- By December 31, 2008, the City shall compile a list of all city owned vehicles that may be replaced, due to functional obsolescence, with vehicles of lower emissions ratings.
- The City will maintain an economically feasible schedule for replacing the obsolete vehicles in one year, and shall follow the schedule, updating it on an annual basis.

Policy 2.1.1:6A.1.1

Monitor the feasibility and results of the City's on-going program to convert the municipal fleet to a system which uses Compressed Natural Gas (C.N.G.).

The City shall investigate the economic feasibility of converting its fleet to lower emission vehicles, including hybrid and alternative fuel vehicles, to promote better air quality.

Air quality through regulations and intergovernmental coordination

Objective 6A.2

Continue to promote greater air quality in the City through regulations and intergovernmental coordination.

Monitoring and Evaluation:

- A member from the City staff shall attend meetings held by SFRPC regarding the Strategic Regional Policy Plan to keep abreast of the policies and inform the appropriate City staff members about actions to be taken.
- Establish and maintain a data base that documents the number of permitted development and redevelopment projects. On an annual basis determine the number of projects that were approved but did not meet the criteria of Policy 6A.2.3. Analyze the reasons for approval and take actions to eliminate such

occurrences.

Policy 6A.2.1

Coordinate with County and State agencies to ensure Federal air quality standards are not exceeded in order to maintain and improve the existing air quality within the City of North Miami.

Policy 6A.2.2

Coordinate with the South Florida Regional Planning Council (SFRPC) regarding the Strategic Regional Policy Plan (Policy 3.7) to improve air quality through a reduction of transportation and electrical power generation related impacts.

Policy 6A.2.3

Discourage automobile travel through encouragement of mixed-use development along major roadway corridors with mass-transit accessibility, and by ensuring that large developments that generate high-traffic volumes have mass-transit accessibility.

GOAL 6B

Implement programs and activities to protect and conserve the quality of the City's water and land resources.

Maintain Water quality and Protect Wetlands through permitting

Objective 2.2:6B.1

Through the permitting process continue to preserve and maintain identified wetlands and water quality ~~as well as quantity~~ from the impacts of new development or redevelopment.

Monitoring and Evaluation:

- The City shall evaluate its permitting process to ensure that proof of mitigation is obtained prior to the release of building permits.

Policy 2.2.2 6B.1.1

The City shall deny ~~Reject~~ permit applications for new development or redevelopment projects which may ~~impact~~ adversely impact upon existing wetlands, and water quality or water quantity, ~~as determined by the City and other agencies with jurisdiction over said (re)development~~, until satisfactory mitigation and protection measures, ~~satisfactory to the City and other applicable permit-issuing agencies~~, are performance bonded by the developer.

Policy 2.2.3

At the ~~295+ acre~~ Munisport site, in conjunction with any request for Public Use ~~Planned Unit Development~~ in accordance with Ordinance No. ~~798.32~~, Appendix 3, the City shall, at the Plan review stage, require that the needed infrastructure improvements be performance bonded as

~~a condition of permit issuance and require that said needed infrastructures be in place prior to the impacts of development. Public uses allowed shall be compatible with and sensitive to the surrounding environment, including protection and preservation of wetlands, and of the type that will support and meet a public need and promote the general welfare of the citizenry.~~

Policy 2.2.4-6B.1.2

~~Where the City is made aware and verifies that materials entering Biscayne Bay from existing drainage outfalls have measurably measurable degraded the Bay or other natural resources, the City will make every effort to identify the responsible party and take appropriate action seeking to remedy the damage. Every three 3 years following final plan adoption, a visual inspection shall be conducted by the City and a report will be prepared identifying observed pollution problems. This report shall be submitted to the Miami-Dade County Department of Environmental Resource Management (DERM) requesting that a more detailed survey be conducted to identify sources and to recommend remedial action for implementation by the responsible parties. Visual inspections of drainage outfalls will be conducted periodically by the City as part of the National Pollution Discharge Elimination System (NPDES). The City shall coordinate and cooperate with Miami-Dade County on the enforcement of environmental regulations.~~

Policy 2.2.5

~~Coordinate with State DNR the elimination, by 1995, or the N.E. 135th Terrace drainage outfall into the State-owned mangrove preserve located within the City of North Miami boundaries.~~

Policy 2.3.1-6B.1.3

~~Through the permit process, the City shall require development or redevelopment along Biscayne Bay to dispose of stormwater via French drains or other filtration techniques.~~

~~any drainage associated connected with development or (re)development which impacts impacting the Biscayne Bay to be disposed of via French drain or other filtration process.~~

Policy 2.2.6-6B.1.4

~~Proposals to establish or site lawfully permitted land uses within the shoreline, which uses may be water dependent and/or water related, including but not limited to, the siting of new marinas, shall be reviewed by the City, and other appropriate county, state, and/or federal agencies to ensure said uses are sensitive to the environment, will not degrade natural resources, and to the extent applicable, comply with Chapter 33-D of the Miami-Metro-Dade County Code (Ord. #81-19) entitled Biscayne Bay Management. Where damage is anticipated, prevention/mitigation measures shall be committed to and implemented by the responsible party to the satisfaction of the various reviewing~~

and permitting agencies, and to the satisfaction' of the City.

Policy 2.2.7

~~By 1991, establish program educating homeowners in reference to the polluting effect on the Bay and other natural bodies of water in the City, of run-off containing grass clippings, lawn fertilizers, and other similar type material, and identify techniques that can be implemented by homeowners to mitigate this problem.~~

Preserve Water quality and Wetlands through Inter-governmental Coordination

Objective 6B.2

Through intergovernmental coordination continue to protect and preserve identified wetlands and water quality as well as quantity from the impacts of new development or redevelopment.

Monitoring and Evaluation:

- Maintain an updated contact list of agencies responsible for water resource conservation.
- At least one member of the City staff shall attend meetings/coordinate with County, State, WSA and SFWMD. If needed, the permitting or approval process of the City may be modified to meet the standards set by the aforementioned agencies.

Policy 2.2.1:6B.2.1

Closely coordinate with county and state agencies responsible for maintaining and promoting wetland protection, and water quality and quantity in the area.

Policy 6B.2.2

Coordinate with the Miami-Dade Water and Sewer Department and the South Florida Water Management District to conserve potable water resources during periods of low rainfall and droughts.

Policy 2.3.1:

~~Through permit process require any drainage connected with (re)development impacting the Biscayne Bay be disposed of via french drain or other filtration process.~~

Policy 6B.2.3.2.2.3

In conformance with the Biscayne Bay Aquatic Preserve Management Plan, the City shall monitor the shoreline and contact the County, which is responsible for removing ~~has the responsibility to remove~~ excessive trash accumulation as necessary.

Policy 2.2.7 6.B.2.4

The City shall continue to provide education programs to educate residents about ~~By~~

~~1991, establish program educating homeowners in reference to the polluting effect on the Bay and other natural bodies of water in the City, of run-off containing grass clippings, lawn fertilizers, and other similar type material, and present identify techniques that can be implemented by residents homeowners to mitigate this problem. In addition, the City shall continue to coordinate with the SFRPC's Strategic Regional Policy Plan (Policy 14.14 and 14.17) to educate the public.~~

Wellfield protection

Objective 2.4:6B.3

Continue enforcing the Miami-Dade County's Wellfield Protection Ordinance, which restricts certain land uses within the cone of influence of potable water supply.

Monitoring and Evaluation:

- Continue to ensure that no land uses are approved within the cone of influence which are not permitted by Miami-Dade County.

Policy 2.4.1:6B.4.3.1

Restrict local issuance of a business Tax Receipt and building permits within the cone of influence of potable water supply to those uses permitted by Miami-Dade County.

Water Conservation

Objective 6B.4

Implement programs and activities which result in the conservation of potable water resources in North Miami and its service area.

Monitoring and Evaluation:

- Implement water conservation public education programs by December 2008.
- Reduce potable water consumption from its current level of 171 gallons per capita per day to 165 gallons per capita per day by the year 2010.
- The City shall monitor its per capita consumption on a bi-annual basis to ensure that it is making progress towards its water conservation goals.

Policy 6B.4.1

Continue to coordinate with the SFRPC regarding the Strategic Regional Policy Plan (Policy 7.13) to utilize measures such as those outlined in the South Florida Water Management District's Model Water Shortage Ordinance and the Florida Department of Environmental Protection's Florida Water Conservation Initiative to address water usage.

Policy 6B.4.2

Continue to coordinate with the SFRPC regarding the Strategic Regional Policy Plan

(Policy 7.14) to implement water conservation measures including but not necessarily limited to:

1. adoption of local government Xeriscape/Florida friendly landscape ordinances requiring landscaping methods that maximize the conservation of water through the use of site-appropriate plants and efficient watering systems;
2. utilization of native plant material as a first priority in landscaping;
3. implementation of a water conservation public education program;
4. implementation of a leak detection and repair program for public water supply systems;
5. adoption of a water conservation-based rate structure by utilities that provides a financial incentive for users to reduce demand;
6. implementation of water loss prevention programs including the adoption of a rain sensor device ordinance for automatic sprinkler systems;
7. adoption of an ultra-low volume fixtures ordinance;
8. adoption of an irrigation hours ordinance and reduction in the use of potable water for irrigation; and
9. utilization of reuse water wherever and whenever possible based upon the ecological and technical factors involved, and analysis of reclaimed water feasibility by potable water supply utilities.
10. Encouragement of green building design and techniques.

GOAL 1:6C

To protect and conserve the tree canopy and native vegetation in the City from abuse and destruction. ~~TO PROTECT THE TREE CANOPY IN THE CITY FROM ABUSE AND DESTRUCTION~~

Tree canopy

Objective ~~1.1:6C.1~~

Continue to protect trees and the tree canopy in the City through the use of the land development code and enforce standards through code enforcement. ~~By 1992, create an urban Foresters' position in the City budget under the umbrella of the State's Urban Forestry Program to assist with the administration of the City's tree preservation and protection ordinance.~~

Monitoring and Evaluation:

- Establish a tree count database by 2008. Annually evaluate the increase or decrease of native trees and prepare plans and implementation strategies to re-vegetate in case of tree decrease.
- Prepare a policy for native vegetation mitigation by 2008 for a review and approval by City Council.
- Attend meetings with SFRPC regarding the Strategic Regional Policy Plan and educate staff on implementing the policies 6C.1.2, 6C.1.3 and 6.C.1.5. Produce status reports of work done to meet requirements of the plan and present to City Council and SFRPC.

Policy 1.1.1:6C.1.1

Establish land development regulations that protect the overall tree canopy in the City by maintaining records on tree removal and planting in the City. a program no later than 1993, to be administered by the Urban Forester, which shall disseminate to the residents of the City important and valuable information on the preservation and protection of trees and other landscaping.

Policy 6C.1.2

Continue to coordinate with the SFRPC regarding the Strategic Regional Policy Plan (Policy 14.14) to increase public awareness and continue to support programs regarding the importance of maintaining and enhancing the tree canopy and other native vegetative cover to maintain and improve air quality and natural habitat.

Policy 6C.1.3

Continue to coordinate with the SFRPC regarding the Strategic Regional Policy Plan (Policy 14.17) to educate property owners about the environmental benefits of landscaping with native plants.

Policy 6C.1.4

The City shall proactively remove exotic and invasive plants from all City-owned property.

Policy 6C.1.5

Certain exotic pest plants shall not be sold, propagated, or planted within the City. If existing on a site to be developed or redeveloped, they shall be removed prior to development. Certain other exotic plant species (which are documented by the Florida Exotic Pest Plant Council, the Miami- Dade County Park and Recreation Department's Natural Area's Management Program and the Miami- Dade County Department of Environmental Resources Management to be invasive pests in natural areas) may not be planted within 500 feet of the native plant communities that they are known to invade. These species referenced in this policy are listed in Conservation Element.

Policy 6C.1.6

Continue to coordinate with the SFRPC regarding the Strategic Regional Policy Plan (Policy 14.10) to encourage local governments to utilize pervious areas in public rights-of-way as opportunities to re-establish native vegetation, particularly in residential swales.

Policy 6C.1.7

Continue to restrict activities known to adversely affect the survival of endangered and threatened wild life, including mitigation measures for new development destroying native vegetative communities.

GOAL 6D

Implement programs and activities to protect and conserve the City's wildlife and marine habitat.

Protect natural resources

Objective 2.5: 6D.1

Continue to protect the City's natural soils, native vegetative communities, fisheries, and marine and wildlife habitats.

Monitoring and Evaluation:

- Maintain an updated contact list of agencies responsible for protection of natural resources.
- Attend meetings with SFRPC regarding the Strategic Regional Policy Plan and educate staff on implementing Policy 6D.1.7.
- Monitor all developer agreements to assure preservation of natural resources and protection of habitats.

Policy 2.5.1:6D.1.1

Work with adjacent local governments to identify and protect, through the planning, permitting and zoning processes, any unique vegetative communities that cross municipal boundaries.

Policy 2.5.2:6D.1.2

Continue coordinating closely with ~~the Biscayne Bay Management Committee, the Miami-Dade County Department of Environmental Resource Management~~ DERM and other appropriate environmental agencies and on issues such as the identification and designation of environmentally-sensitive lands.

Policy 2.5.3:6D.1.3

Continue the City's current permitting process that requires obtaining the approval of other outside agencies prior to commencement of construction in areas of environmental concerns, or in connection with uses which involve handling and disposal of toxic or hazardous wastes.

Policy ~~2.5.4:~~6D.1.4

~~As requested, c~~Collaborate with the state and the county agencies on programs to increase citizen awareness of the availability and environmental sensitivity of the natural resources located within the parks and preserves ~~managed by these entities, and located within~~ throughout the City limits.

Policy ~~2.5.5:~~6D.1.5

~~By the year 2000 place into full-time operation a~~ As needed, continue upgrading the telemetric monitoring system that will give warning of a possible sanitary sewage overflow occurrence which would either pollute the ground or enter a waterway.

Policy ~~2.5.6:~~6D.1.6

The City shall ensure that any activities, of which it is aware, that may adversely affect the survival of endangered and threatened wildlife will be brought to the attention of the appropriate agencies.

Policy 6D.1.7

Continue to coordinate with the SFRPC regarding the Strategic Regional Policy Plan (Policy 16.4) to enhance and preserve commercial and sports fisheries through monitoring, research, best management practices for fish harvesting, education, and protection of nursery habitat.

GOAL 6E

The City shall coordinate with DERM and adhere to conservation policies in the South Florida Regional Planning Council's Strategic Regional Policy Plan to achieve natural resource conservation and protection

Environmental contaminants**Objective 6E.1**

Continue to coordinate with the SFRPC regarding the Strategic Regional Policy Plan (Policy 3.7) to reduce exposure to environmental contaminants and hazards in the Region's ground, air, and water.

Monitoring and Evaluation:

- Attend meetings with SFRPC regarding the Strategic Regional Policy Plan and educate staff on implementing Policy 6E.1.1 and 6E.1.2. Produce status reports of work done to meet requirements of the plan and present to City Council and SFRPC.

Policy 6E.1.1

Continue to coordinate with the SFRPC regarding the Strategic Regional Policy Plan (Policy 14.2) to improve the quality and connectedness of Natural Resources of

Regional Significance by eliminating inappropriate uses of land, improving land use designations, and utilizing land acquisition where necessary.

Policy 6E.1.2

Continue to coordinate with the SFRPC regarding the Strategic Regional Policy Plan (Policy 14.6) to include adequate buffer zones between development and Natural Resources of Regional Significance. The buffer zones shall provide complementary natural habitat values and functions so that the natural system values of the site are not negatively impacted by adjacent uses

Objective and policy requirements not applicable to City of North Miami Rule 9J-5 of the Florida Administrative Code requires communities to adopt as part of their Conservation Element objectives and policies which address various issues, except where those issues are not reasonably applicable to a particular community. The following objective and policy provisions of Rule 9J-5 are deemed by the City to be inapplicable:

9J5.013 (2) (c) 2 Conservation, appropriate use and protection of areas suitable for extraction of minerals.

GOAL 6F

Implement Programs and Activities to protect the Natural Environment and Conserve Energy.

Objective 6F.1

Continue to promote greater accountability and smart growth initiatives to encourage environmental designs and energy conservation in the design of buildings.

Monitoring and Evaluation:

- By 2008, amend the Land Development Regulations to require “green” initiatives consistent with the United States Green Building Council’s LEED Green Building Rating System as amended.
- Maintain and update list of developments that utilize environmental designs or conserve energy.

Policy 6F.1.1

Support and educate the public on the Low Income Home Energy Assistance Program (LIHEAP) and the Weatherization Assistance Program as a means towards greater energy conservation.

Policy 6F.1.2

Develop community based lighting design guidelines that promote energy efficiency and safety while reducing light pollution or light trespass on adjacent properties and glare.

Policy 6F.1.3

Integrate community energy efficiency goals in the “smart growth” plan review and planning process for municipal services and infrastructure, such as water and sewage treatment and street lighting, public buildings and facilities, and commercial, residential, and industrial uses.

Policy 6F.1.4

By July 2009 the City will include energy efficiency in all affordable housing guidelines.

Policy 6F.1.5

Review and practice environmental safety design techniques for Crime Prevention Through Environmental Design (CPTED) and adopt defensible space design approaches.

EAR-Based Comprehensive Plan Amendments

Volume I: Goals, Objectives, and Policies Parks and Recreation Element

7. Parks and Recreation Element

GOAL 4 7

Provide a high quality and diverse system of public parks and recreation sites that meet the needs of existing and future residents and businesses of the City of North Miami.

~~To ensure that an adequate number of parks, recreation, facilities and open spaces is provided to meet the needs of the citizenry.~~

~~A. PARKS AND RECREATION – OBJECTIVES AND POLICIES~~

~~EXISTING SYSTEM:~~

City Park Level of Service

Objective 4.1 7.1

Ensure that parks, recreation and open space facilities are available to City residents such that a level of service standard of 2.75 acres per 1,000 people is maintained.–

Monitoring and Evaluation:

- Land area for parks, recreation, and open space facilities.

Policy 47.1.1

Closely monitor the parks, recreation, and open space system located within City limits such that the established LOS standard is not lowered.

Objective 7.2

Ensure that a variety of parks, recreation, and open space facilities are available to City residents.

Monitoring and Evaluation:

- The City shall maintain at least one community park, segments of urban trails, and multiple neighborhood parks, tot lots, passive green spaces, sports parks, and special use parks.

Policy 7.2.1

The North Miami Parks, Recreation, and Open Space Master Plan may be used as a guide in the provision of future parks and open spaces.

Park Service Radii

Objective 7.3

The City shall endeavor to provide a one half mile park or open space service radii for all residents by 2025.

Monitoring and Evaluation:

- Percentage of residents living within one half mile of park or open space.

Policy 7.3.1

The City shall identify and give priority to areas of the City lying outside a one half mile park service radius for future consideration of new park development or expansion of existing parks and open space.

Future System:

Parks, Recreation, and Open Space Master Plan

Objective 1.27.4

The City will use the Parks, Recreation, and Open Space Master Plan as a guide in determining priorities for the development of new parks, improvements to existing parks, and methods to increase park accessibility for residents and visitors. By the year 2000, there will be in place a system of parks and recreation facilities that can adequately serve the needs of the population.

Monitoring and Evaluation:

- Consistency of Capital Program with Parks, Recreation, and Open Space Master Plan recommendations.

Policy 1.27.4.1

The City shall develop park and open space improvements as prescribed in the Parks, Recreation, and Open Space Master Plan. The City shall by 2000 improve the recreational facilities at the North Miami Senior High School by adding lights. Project will be completed as a result of receiving state and/or federal aid.

Policy 1.27.4.2

The City shall by 2025 develop greenways along collector streets throughout the City for pedestrian and bicycle access in accordance with the recommended bicycle network map contained in the City's Transportation Master Plan. The City shall by the year 2000 develop in cooperation with private and governmental entities an 11.2 mile bicycle path linking the residential areas of the City with the commercial, industrial, recreational, and cultural/educational destination points City wide. Project will be completed based upon receipt of state, federal, or county funding.

Policy 1.27.4.3

~~The City shall work with the Community Redevelopment Agency to construct a Central Town Square to enhance recreational opportunities in the Central Business District. by the year 2005 develop a recreation center in the central part of the City to fill the gap which now exists. Construction of a recreation center is contingent upon receiving state and/or federal funding or through the passage of a general obligation bond.~~

Policy 7.4.4

~~The City shall work with the Community Redevelopment Agency to construct a Waterfront Park to enhance recreational opportunities.~~

Policy 7.4.5

~~The City shall coordinate with Miami-Dade County to incorporate the County blueway plan into existing and future park development.~~

Policy 7.4.6

~~The City shall develop an Olympic Training Center by 2010 as part of redevelopment of the Central Business District.~~

B. OPEN SPACE OBJECTIVES AND POLICIES**EXISTING SYSTEM:**

~~See Above Under A. for Objective and Policy.~~

FUTURE SYSTEM:**Objective 2.1:**

~~Land currently used for or designated as open space areas will be kept as such until at least the year 2000.~~

Policy 2.1.1

~~The City shall continue to protect, maintain, and on an as needed basis, refurbish and upgrade same, if necessary.~~

Policy 2.1.2

~~The City shall every (5) years after adoption of the Plan review the existing Code provisions for open space allocations within private development and upgrade same, if necessary.~~

Policy 2.1.3

~~The City shall by 1995 improve four (4) additional courtyards in designated residential neighborhoods.~~

Objective ~~2.27.5~~

Ensure that adequate open space and landscaping is provided in connection with new development and redevelopment in accordance with the City's landscaping regulations Land Development Regulations (LDR).

Monitoring and Evaluation:

- Adequacy of new park sites acquired by the City or contributed through development or redevelopment to serve additional demand from development and redevelopment.
- Percent of new development and redevelopment in compliance with on-site recreation and open space requirements.

Policy ~~2.2.7.5.1~~

The City shall continue to enforce the ~~current~~ mandatory open space provisions of the ~~Code~~LDR to ensure existing private development maintains the required on-site open space allocations for the duration of said development, and that future private development will provide the required open space allocations and maintain same for the duration of said development.

Policy 7.5.2

The City shall amend the LDR to establish a park impact fee for new development and redevelopment by December 2008.

Policy 7.5.3

Acquire lands necessary to enhance the City park level of service that (1) achieve cost efficiency; (2) fulfill the spatial and functional needs of the intended uses; (3) enhance the City's appearance; and (4) establish highly visible focal points that reinforce a sense of community.

~~G. ACCESS OBJECTIVES AND POLICIES~~**Park Accessibility****Objective ~~3.17.6~~**

~~By the year 2000 a~~All public recreational facilities shall contain or be served by appropriate facilities that allow access thereto by automobile, by bicycle, by foot and, where applicable, by boat.

Monitoring and Evaluation:

- Availability of parking spaces (including handicap) and bike racks at existing and future parks.
- Completion of transportation system upgrades contained in the City's Transportation Master Plan.

Policy 3-17.6.1

Future parks and recreation facilities shall be constructed such that with adequate parking for automobiles and bicycles is provided, and such that adequate access to for disabled persons the handicapped is also provided.

Policy 7.6.2

Upon completion of park renovations, all public and private parks and recreation facilities shall be provided with bicycle and pedestrian entrances.

Policy 7.6.3

A schedule for providing parking spaces and bicycle racks at recreation sites shall be adopted in the Parks, Recreation, and Open Space Master Plan by December 2008.

Policy 7.6.4

Public parks and facilities shall be designed and constructed with entrances that are compatible with the character and quality of onsite natural resources while removing barriers limiting access to the physically disabled persons.

Policy 7.6.5

Assure that public and private facilities including recreation improvements are designed in a manner that incorporates facilities accessible to the disabled persons and the elderly consistent with the Americans with Disabilities Act (ADA).

Policy 7.6.6

All future bicycle facilities shall be built in accordance with the Florida Department Transportation's Manual of Uniform Minimum Standards for Design, Construction, and Maintenance for Streets and Highways (May 2005 Edition), which establishes a minimum standard for single use and shared use bike paths.

Park Coordination with Other Agencies**Objective 7.7**

During the City's annual review of recreation site and facility needs, the City shall coordinate planning for recreation and open space improvements with important stakeholders such as, Miami-Dade County, Miami-Dade County School Board, adjacent municipalities, major civic groups, the Chamber of Commerce, and the private sector in order to promote recreational and educational opportunities in a cost-effective manner.

Monitoring and Evaluation:

- Number of meetings between the City and non-City entities that provide recreational and civic facilities and programs, with the objective of expanding opportunities of mutual benefit.
- Number of recreation and open space related grant applications developed on an annual basis.

- Number of parks and recreational facilities that are constructed and/or redeveloped.

Policy 7.7.1

Utilize Joint Use Master Lease Agreements with the Miami-Dade County School Board to maximize joint use of school sites for both school and recreational activities in the future.

Policy 7.7.2

Ensure that the advantages of all appropriate local and non-local sources of financial and technical assistance are sought and received. Continually monitor and aggressively pursue local, state, and federal grants to ensure the attainment of recreation objectives in a cost-effective and fiscally equitable manner.

Policy 7.7.3

Coordinate City park planning and natural area or open space acquisition and management with other public agencies at the regional, County, State and Federal levels of government as well as non-profit agencies.

Policy 7.7.4

Coordinate City and Miami-Dade County greenways plans to maximize connectivity between City and County greenway facilities and between residential areas and parks.

Library Level of Service**Objective 7.8**

The City shall provide library services at the Essential quality level, as defined by the Florida Library Association.

Monitoring and Evaluation:

- Quality level maintained by the City library.
- Implementation of a library impact fee by July 2009.

Policy 7.8.1

The City shall follow the Florida Library Association's Standards and Guidelines for Florida Public Library Services in order to maintain an Essential quality level.

Policy 7.8.2

The City shall amend the LDR to require a library impact fee.

Policy 7.8.3

Consistent with the terms outlined in the Munisport agreement, the City shall complete the expansion of the existing Library facility by 2009.

EAR-Based Comprehensive Plan Amendments

Volume I: Goals, Objectives, and Policies Intergovernmental Coordination Element

8. Intergovernmental Coordination Element

GOAL 1:8

Take necessary actions to establish and maintain intergovernmental relationships designed to improve communication and coordination with public and private entities involved in development activities, resource conservation, transportation, and infrastructure, and growth management. To provide adjacent governments and other relevant entities an opportunity to constructively review and comment on portions of the city's comprehensive plan.

Continue and Improve Coordination

Objective 1.1:8.1

The City shall continue and improve upon coordination activities with Federal, State, Regional and County agencies possessing planning and regulatory authority, which affect the City's land use, transportation system, utilities, educational facilities, financial affairs, environmental issues, and other applicable areas. Prior to plan adoption make available to surrounding local governments as well as to Dade County and the Regional Planning Council a copy of the Comprehensive Plan for their review, and address objections or comments in the Plan.

Monitoring and Evaluation:

- Maintain a list of coordination mechanisms and interlocal agreements with other units of local government providing services to the City, but not having regulatory authority over the use of land and with the Plans of adjacent municipalities, the County and adjacent counties.

Policy 1.1.1:

Transmit the proposed plan to surrounding local governments, Dade County, and the Regional Planning Council so it may be reviewed and commented on. All written comments shall be duly noted at the adoption hearing.

Policy 8.1.1

The City shall ensure that an active and effective program of monitoring and communication is maintained with area communities, Federal, State, regional, County and other local governments and agencies. -

Policy 8.1.2

The City shall participate in Federal, State, regional and area workshops, meetings and public hearings relating to topics affecting North Miami and its environs.

Policy 8.1.3

In an effort to further intergovernmental coordination, the City shall continue to participate in coordination with appropriate agencies and provide effective coordination through interlocal agreements, joint planning and service agreements, special legislation and joint meetings or work groups.

Policy 8.1.4

Special coordination emphasis shall be placed on maintaining effective lines of communication with County, regional and State agencies charged with setting levels of service and/or permitting requirements, and initiating maintenance and capital improvement projects for public facilities located in and around North Miami.

Policy 8.1.5

The City's Comprehensive Plan will be consistent, where feasible, with the State of Florida Strategic Plan, the South Florida Strategic Regional Policy Plan, the Miami-Dade County Comprehensive Development Master Plan, the Comprehensive Plans of adjacent local governments, applicable regional water supply plan(s), and applicable campus master plans pursuant to F.S. 1013.30.

Policy 8.1.6

North Miami shall continue to coordinate with the Miami-Dade County School Board to implement the Interlocal Agreement for Public School Facility Planning in Miami-Dade County between the City and the School Board. The agreement addresses the following issues:

1. Joint meetings on a semi-annual basis between the City and the School Board to discuss issues and formulate recommendations regarding public education in the School District;
2. Student enrollment and population projections;
3. Coordination and sharing of information;
4. Periodic review of the Educational Facilities Impact Fee Ordinance to ensure that the full eligible capital costs associated with the development of public school capacity are identified when updating the impact fee structure;
5. Annual reporting by the City to the School Board of growth and development trends in the City;
6. Traffic circulation in and around school sites;
7. Supporting infrastructure;
8. Public education facilities site plan review;
9. Local Planning Agency, Comprehensive Plan amendments, rezonings, and development approvals;
10. Co-location and shared use;
11. Dispute resolution;
12. Oversight process; and
13. School site selection, significant renovations, and potential school closures.

Policy 8.1.7

The City should pursue resolution of development and growth management issues with impacts transcending the City's political jurisdiction including issues of Federal, regional and State significance with the appropriate agencies. Issues to be pursued include, but are not limited to, the following:

1. Impacts of development proposed in the Comprehensive Plan on Miami-Dade County, adjacent cities, the region, the state, and any other governmental entity.
2. Land development activities adjacent to the City's corporate limits within Miami-Dade County or nearby cities.
3. Regulatory framework and implementation of affordable housing programs.
4. City land development activities adjacent to the unincorporated area of the county, or nearby cities.
5. Potential annexation issues.
6. Area-wide drainage and stormwater management master plan, proposed improvements, and implementing programs.
7. Managing level of service impacts of new development and tourism on major transportation linkages and critical intersections impacting the City and adjacent areas.
8. Level of service standards for transportation and infrastructure system impacting the City and adjacent areas.
9. Conservation of natural and historical resources.
10. Regional road and transit improvements that significantly alter or otherwise impact existing traffic circulation patterns and congestion in the City.

Policy 8.1.8

The City shall, when appropriate, utilize the conflict resolution procedures established by the South Florida Regional Planning Council (SFRPC), the dispute resolution process as established pursuant to F.S. 186.509, and/or Miami-Dade County conflict resolution forums to bring closure in a timely manner to intergovernmental disputes.

~~Objective 2.2:~~Policy 8.1.9

The City should utilize coordinating mechanisms to review, comment upon, and process the City's position on the plans and actions of adjacent local governments, Miami-Dade County, and other various public and private entities.

Policy ~~2.2-1:~~8.1.10

The City shall continue to provide utility services to governments with which the City has formed agreements and will continue to exchange information with surrounding governments regarding relative items that affect the standing of such service agreements.

Policy ~~2.2.2:8.1.11~~

~~The City should r~~Resolve annexation issues by utilizing the annexation portion of the Miami-Dade County Code. Where resolution of such issues go beyond the scope or cannot be resolved by the Miami-Dade County Code, the affected governments shall establish an ad-hoc committee of the governments affected, appointed by the local elected bodies to study and offer a mutually acceptable solution to the problem(s). The ad-hoc committee members shall be appointed by the local elected bodies.

Policy ~~2.2.3:8.1.12~~

~~The City shall a~~Adopt new coordinating mechanisms to define the City's position on issues that cannot be resolved with existing mechanisms.

Improve Communication Efforts**GOAL 2 Objective 8.2**

To monitor the plans and activities of any adjacent or higher-level government or entity, to ensure that negative impacts are averted or mitigated, and beneficial projects promoted.

Monitoring and Evaluation:

- Annual updates to the consolidated contact list of designated representatives.

Objective ~~2.1:Policy 8.2.1~~

~~Within one year of adoption of the amended Comprehensive Plan adoption, the City shall coordinate and annually revise a consolidated contact list of designated representatives request that the City be placed on the mailing lists of all surrounding governments and higher-level entities having jurisdictional control in the City. The City and said agencies will establish appropriate contacts within departments to receive and exchange information on projects which may impact the City and said agencies it.~~

Policy ~~2.1.1:~~

~~Communicate in writing to all such governments and entities the City's desire to be placed on agenda and other mailing lists, and provide them with the appropriate contact departments or staff within the City.~~

Coordinated Land Development Activities**Objective ~~2.3:8.3~~**

~~The City should r~~Review plans and/or projects of adjacent local governments (including Miami-Dade County) or other relevant entities as they are made available. North Miami shall provide written comments, including recommended solutions, to those agencies and entities on any areas of concern to the City, and recommend solutions.

Monitoring and Evaluation:

- City participation in plan review of adjacent local governments when impacting the City.

Policy 2.3.1:8.3.1

North Miami shall identify City staff persons who will act as liaisons to adjacent local governments, Miami-Dade County, the SFRPC Regional Planning Council and other higher entities. These City staff persons shall be responsible for in any written and/or verbal communications with these governments and entities to facilitate and expedite the plan or project review process.

Policy 2.3.2:

~~Utilize the Regional Planning Council's mediation process to resolve any conflicts with other local governments, which cannot be resolved by the respective local elected bodies.~~

Policy 2.3.3:8.3.2

Require that any plans for development and redevelopment within the City's coastal zone be reviewed and acted on by the entities having specific regulatory jurisdiction over said coastal zone.

Policy 8.3.3

Coordinate all transportation improvements proposed by new development and redevelopment with FDOT, DCA, SFRPC, Miami-Dade County, and other state and regional agencies concerned with assessing traffic impacts of proposed development.

Policy 8.3.4

Continue to cooperate with the US Census Bureau, the DCA and the Miami-Dade Property Appraiser's office, as requested by these agencies the City shall provide appropriate development information, including but not limited to building permits.

Maintain Level of Service Standards**Objective 2.4:8.4**

Continue to utilize existing coordination mechanisms between the City and State, regional, County and of other appropriate agencies, to review and comment on proposed level of service standards for any public infrastructure that would impact the City's operation(s).

Monitoring and Evaluation:

- Annual review of level of service standards for public infrastructure impacting the City.

Policy 2.4.1:8.4.1

Through meetings or via letter, The City shall provide input and alternate solutions to state, regional, county and or other appropriate agencies on the establishment of new proposed levels of service for public infrastructures under their jurisdiction, which could detrimentally affect City operations or City residents, and recommend alternate solutions.

Policy 8.4.2

The City shall participate in the development of a Regional Water Supply Plan in conjunction with the SFWMD. The City shall also incorporate the ten year water supply plan into the Comprehensive Plan's Infrastructure Element and Capital Improvements Plan within one year of the effective date of the Regional Water Supply Plan.

Policy 2.4.2:8.4.3

The City and SFWMD shall develop a ten and twenty year adopted local water supply plan in accordance with State statute, which shall reflect policies and strategies of water use and alternative water supplies in the regional water supply plan. The City shall also meet with the SFWMD to continue to identify mutual concerns and long-term goals.

Policy 8.4.4

The City Manager or a designee shall prepare and review the annual level of service monitoring report in the adopted concurrency management system. The purpose of this report is to provide the affected entities with information in order to evaluate and coordinate level of service standards.

Policy 8.4.5

The City Manager or a designee shall recommend procedures to be undertaken if an outside entity that has maintenance responsibility for a public facility serving the City does not plan for the necessary improvements in a timely manner in order to maintain the City's adopted level of service.

Policy 8.4.6

In situations where other public or private entities are providing a public facility or service within the City for roads, water, sewer, drainage, parks or solid waste, the City will coordinate its adopted level of service standard with the applicable entity within the parameters allowed by the Capital Improvements Element of this Plan.

Policy 8.4.7

North Miami shall coordinate with Federal, State, and County authorities to ensure the City receives its fair share of revenue sharing allocations, and facilities and services improvements.

Policy 8.4.8

The City should actively pursue public and private grant opportunities that will enhance City services and facilities.

Coordination with Transportation Authorities

Objective 8.5

North Miami shall coordinate with government agencies that provide transportation facilities and services to ensure the City receives its fair share of funding and improvements.

Monitoring and Evaluation:

- City participation in regional transportation planning activities.

Policy 8.5.1

The City shall work with FDOT, Miami-Dade County MPO, and Miami-Dade County (including Miami-Dade County Transit), to promote multi-modal transportation plans and programs to adequately provide future capacity for the City.

Policy 8.5.2

North Miami should participate in pedestrian and bicycle planning programs of the Miami-Dade County MPO and District VI of the FDOT.

Policy 8.5.3

The City shall support Miami-Dade County in efforts to improve existing transit systems, including expanded routes and increased frequency of service.

Policy 8.5.4

The City shall use its position as a voting member on the Miami-Dade Metropolitan Planning Organization (MPO) Governing Board to advocate for the City's transportation initiatives to encourage the implementation of transportation projects within the City of North Miami.

Communicate North Miami's Plans

Objective 8.6

Ensure that the impact of North Miami's plans and programs in the Comprehensive Plan are fully communicated and considered through coordination mechanisms with adjacent communities, Miami-Dade County, the region and the State.

Monitoring and Evaluation:

- Maintenance of regular communication channels with affected governmental agencies, communities and private landowners.

Policy 8.6.1

The review of proposed development and redevelopment within the City of North Miami shall include findings, where appropriate, indicating any significant impacts on adjacent communities.

Policy 8.6.2

The City of North Miami's City Manager or his designee shall be the designated liaison to disseminate information on proposed growth management amendments by the City, which affect any of the entities associated with the City.

Policy 8.6.3

The City shall identify, develop and pursue areas where intergovernmental land use planning and level of service agreements are needed between respective governments or private entities.

Policy 8.6.4

Any intergovernmental planning agreements shall include provisions for review and comment on the City of North Miami's land use plans along jurisdictional lines, facility planning for water, sewer, roads, and any other public facilities that may have an impact on other entities or cause inconsistencies between comprehensive plans.

Policy 8.6.5

North Miami will continue to participate in cooperative planning programs with other governmental entities and coordinate planning activities mandated by various Elements of the City's Comprehensive Plan with other affected communities.

Policy 8.6.6

The City shall maintain an up-to-date hurricane evacuation plan and meet the required 24-hour hurricane evacuation time or other applicable state standard for hurricane evacuation.

Policy 8.6.7

The City shall coordinate all disaster preparedness programs with the Miami-Dade County Office of Emergency Management (OEM) to ensure consistency with the County's Comprehensive Emergency Management Plan and the Miami-Dade Local Mitigation Strategy (LMS).

Policy 8.6.8

Within one year of the effective date of the Comprehensive Plan, the City shall adopt the Miami-Dade County Local Mitigation Strategy for hazard mitigation. Within two years of the effective date of the Comprehensive Plan, the City shall evaluate and adopt a Post Disaster Redevelopment Plan to increase public safety and reduce damages and public expenditures.

EAR-Based Comprehensive Plan Amendments

Volume I: Goals, Objectives, and Policies Economic Element

9. Economic Element

THE ECONOMIC ELEMENT IS AN OPTIONAL ELEMENT WHICH IS NOT REQUIRED BY F.A.C. 9J-5.

GOAL 9

The City of North Miami shall strive to create an economic environment that will enhance the economic prosperity of local businesses and attract new business while improving the quality of life for all of its citizens.

Market North Miami

Objective 9.1

Increase the City's presence in the region by identifying and promoting its own unique image and identity.

Monitoring and Evaluation:

- Creation of a new City logo by September 2008.
- Start marketing program by January 2009 that will expand North Miami's presence in the South Florida business community.
- Identify and prioritize areas that require new signage. Prepare a design for the signage and start initiating the requirements by December 2008.
- Annually identify the number of partnerships established between the City and other public or private sector agencies throughout the region, and evaluate any joint ventures undertaken.

Policy 9.1.1

Create a unique and attractive logo by September 2008 for all City communication and marketing materials.

Policy 9.1.2

The City shall support the Community Redevelopment Agency's (CRA) "Get to NoMi" program which will expand North Miami's presence in the South Florida business community in partnership with local businesses, chambers of commerce, and other interested parties.

Policy 9.1.3

Install appropriate and attractive signage and wayfinding for the Central Business District, City offices and facilities, Arts District, universities, and other areas of economic importance.

Policy 9.1.4

Take advantage of ethnic diversity in the City by promoting it as a theme and publicize community fairs and festivals to showcase the vibrancy of the City.

Policy 9.1.5

Promote public and private sector partnerships to fortify the pro-business image of the City.

Policy 9.1.6

The City/CRA should market its environmental sensitivity and green redevelopment strategies.

Retain and Expand Existing Businesses**Objective 9.2**

Retain and expand existing businesses by developing incentive and assistance programs.

Monitoring and Evaluation:

- Annually evaluate number of commercial façade grants made. Set financial goals for 2009 and create an action plan to achieve the target goals.
- By March 2009 evaluate through surveys/meetings reasons why businesses relocate out of North Miami. Prepare policies to decrease that trend and present to the City Council and Chamber of Commerce for adoption.

Policy 9.2.1

Prepare and adopt policies to provide assistance and incentives for existing business owners to continue operating in North Miami.

Policy 9.2.2

Continue commercial façade program to improve aesthetics of existing businesses.

Policy 9.2.3

Establish partnership with other agencies such as Miami-Dade County and the South Florida Regional Planning Council to access resources that could benefit local businesses.

Policy 9.2.4

Provide assistance for relocation of businesses when they must move due to rehabilitation, demolition, or acquisition by the Community Redevelopment Agency.

Policy 9.2.5

By January 2009 the City will collaborate with the CRA to develop a “one stop shop” resource portal via the internet that identifies local, State and Federal funding sources that may provide grant assistance to existing businesses.

Recruit New Businesses and Industries

Objective 9.3

Recruit new businesses and industries that will provide services needed by the community or pay better wages and in general augment the quality of life in North Miami.

Monitoring and Evaluation:

- By December 2008 identify the target industries. By July 2009 prepare a marketing strategy and identify a funding source within the City's General Fund budget. Implement the marketing program depending on the available funding.
- Recruit at least five new businesses (net) and fifty new employees (net) annually
- Develop methodology for determining quality of life by August 2009.
- Annually evaluate number of new licenses and business permits issued to measure the success of incentives/assistance programs.

Policy 9.3.1

Partner with the Community Redevelopment Agency, North Miami Chamber of Commerce, Miami-Dade Chamber of Commerce, the South Florida Regional Planning Council, the Beacon Council and other interested parties in efforts to identify targeted industries that will provide a range of employment opportunities.

Policy 9.3.2

The City/CRA should seek to develop a comprehensive effort in branding and advertising promotional activities and other marketing techniques to attract target businesses to the City.

Policy 9.3.3

Research quality of life indicators such as, but not limited to air quality, travel time to work, and living conditions and compare quality of life annually.

Policy 9.3.4

The market study should evaluate whether the height limits within the City are appropriate for the recommended target businesses.

Integrate with Future Land Use Element

Objective 9.4

Identify future land use needs and allocate adequate residential, commercial, and industrial acreage that may be needed to support future development.

Monitoring and Evaluation:

- Installation of a Geographic Information System that can provide parcel level information for land use analysis by December 2009.
- Prepare a report of land use analysis with regards to the economic development and present to the Chamber of Commerce and the City Council.

Policy 9.4.1

Cooperate with organizations representing the target industries to determine the future economic and land use needs of those industries on an annual basis.

Policy 9.4.2

Introduce employment generating uses along major transportation corridors. Ensure that employment generating land uses are compatible with neighborhood character through revisions in development regulations and permit review requirements.

Policy 9.4.3

Develop a parcel level Geographic Information System which can be used to analyze land for its potential to accommodate future uses.

Policy 9.4.4

Where appropriate, encourage parcel aggregation and allow abandonment of right-of-way to encourage redevelopment within the Central Business District.

Policy 9.4.5

The data from the needs assessment and objective market analysis detailed in the Community Redevelopment Agency Phase I plan should be used to develop land use strategies that will help to strengthen the City's economic base.

Policy 9.4.6

Create land use designations and zoning regulations that encourage the retention, attraction and expansion of business and industry.

Policy 9.4.7

The City should make the development review process easier to understand by creating a user-friendly information manual and flow chart for the different types of development review and permit processes.

Policy 9.4.8

The City/CRA should adopt an industrial policy and facilitate the preparation and implementation of a development plan for the City's industrial areas.

Ensure Necessary Infrastructure to Facilitate Economic Development**Objective 9.5**

The City/CRA should strive to maintain a high quality system of public infrastructure including transportation, parks, water and sewer, and other services to encourage planned economic development

Monitoring and Evaluation:

- Complete feasibility study for providing wireless internet services Citywide by December 2008.
- Complete feasibility study for providing a fiber optic network Citywide by July 2009.
- Adopt capital improvement program on a yearly basis to ensure adequate infrastructure.

Policy 9.5.1

Assure that the Transportation Element, the Transportation Master Plan, and the Capital Improvement Program harmoniously focus and address the transportation needs of the existing and future business community, specifically, providing adequate parking and access to employment providers.

Policy 9.5.2

The City shall promote federal commuter tax incentives that are available to local employers who provide public transit assistance to employees through services such as Van pools, Ride share, free Bus Passes or free Tri-rail Passes. Federal law allows employers to deduct the cost of providing transit assistance as a business expense. The City should primarily market these tax incentives to employers within the City's RAC and TOD areas.

Policy 9.5.3

The City/CRA should identify infrastructure improvements needed to support existing and new businesses and incorporate infrastructure priorities into the city's capital planning process.

Policy 9.5.4

By 2009 have in place a contingency plan to address telecommunication service failures during post-storm periods.

Policy 9.5.5

Conduct feasibility study for providing a fiber optic network and wireless internet services Citywide.

Policy 9.5.6

Provide for a range of housing options for existing and future residents.

Policy 9.5.7

Encourage adequate child care and adult care facilities to support the young population comprising the workforce.

Workforce Training**Objective 9.6**

Ensure basic and advanced educational opportunities for residents and business owners.

Monitoring and Evaluation:

- Annually evaluate the number of adult education and language courses offered and enrollment within the City.
- Annually evaluate the number of facilities offering adult education and number of rooms dedicated for adult instruction. If feasible add more rooms or move classes to larger rooms depending on student registration levels.

- Annually evaluate number of store front classes being offered and their attendance. Formulate policies to increase outreach to local residents.

Policy 9.6.1

Coordinate with Miami-Dade Public School Board to ensure accessibility of adult education and English language courses for non-native speakers throughout the City.

Policy 9.6.2

Provide to the extent possible classroom space in City facilities for adult education and language courses.

Policy 9.6.3

Encourage local colleges and universities to offer adult education classes in storefront universities.

Policy 9.6.4

Encourage local colleges and universities and City facilities to offer courses that train residents in skills required by the target industries mentioned in Policy 9.3.1.

Policy 9.6.5

Promote education of unemployed/underpaid workforce with skills that may be useful for the target industries mentioned in Policy 9.3.1.

Policy 9.6.6

Conduct Business Continuity and Disaster Recovery Planning training program for local businesses to mitigate negative impacts from storms and other disasters.

Policy 9.6.7

The City shall encourage the development and training of young professionals by providing internship opportunities within City government and through partnerships with the Chamber of Commerce to contribute to the development and progress of North Miami's youth

Policy 9.6.8

The City/CRA will seek to participate in and coordinate its programs with local organization's activities that facilitate the interaction between citizens and businesses, designed to enhance the sense of community and promote the cooperation between residents and businesses.

EAR-Based Comprehensive Plan Amendments

Volume I: Goals, Objectives and Policies Public School Facilities Element

10. Public School Facilities Element

GOAL 10

Realizing that education plays a crucial role in defining the quality of life in the community, the City of North Miami shall ensure that its citizens are provided with quality educational opportunities that meet the current and future needs of the student population.

Educational Facilities

Objective 10.1

Actively coordinate with the Miami-Dade School Board, charter school developers, and private school developers in the siting and management of educational facilities and services throughout the City.

Monitoring and Evaluation:

- Reduction in school overcrowding in City schools to below 125 percent of permanent design capacity by September 2010, and to not exceed 100 percent of enhanced program capacity by September 2015.
- Complete elimination of the need for re-locatable student stations by the year 2011.
- Record of City's participation in meetings with Miami-Dade School Board staff and other appropriate agencies regarding school siting.

Policy 10.1.1

Continue to work proactively with the Miami-Dade School Board, charter school developers, and private school developers to substantially reduce overcrowding in the City of North Miami schools and improve educational quality through the improvement of existing schools, the creation of new schools, and school boundary changes when necessary.

Policy 10.1.2

Continue to work with the Miami-Dade School Board according to the amended and reinstated "Interlocal Agreement Between the School Board of Miami-Dade County, Florida and the City of North Miami, Florida" in the development and construction and opening of the new K-8 center by August 2008, with amenities to be completed and ready to open for the August 2010 school year..

Policy 10.1.3

Coordinate with the Miami-Dade School Board to ensure construction of the replacement facility for North Miami Senior High School is completed by August 2009.

Policy 10.1.4

Institute an expedited development review process for all proposed school projects within the City of North Miami.

Policy 10.1.5

Participate in the Miami-Dade School Site Planning and Construction Committee (SSPCC) as needed, and review potential sites for new schools, proposals for significant renovation, additions to existing buildings and portables, and any planned closure of existing schools.

Policy 10.1.6

Attend the annual planning forum hosted by the Miami-Dade School Board's Site Planning and Construction Committee (SSPCC), when City of North Miami schools are discussed.

Policy 10.1.7

Evaluate any potential school site acquisition or expansion in the City within 45 days of written notice from the School Board for consistency with the City's Comprehensive Plan and Land Development Regulations (LDR), consistent with Florida Statutes.

Policy 10.1.8

Provide comment to the Miami-Dade School Board on all proposed construction or expansion of public educational facilities within the City's jurisdiction no later than 60 days after receipt of a complete site plan for consistency with the City's Comprehensive Plan and Land Development Regulations (LDR).

Policy 10.1.9

Coordinate with the Miami-Dade School Board to address any on-site and off-site improvements necessary to support new schools, proposed significant expansion of existing schools, or mitigate any existing adverse traffic and other impacts around schools.

Policy 10.1.10

Coordinate with the Miami-Dade School Board to ensure construction of the new Biscayne Landing High School (BLHS) to be completed and ready to open for the August 2009 school year.

Policy 10.1.11

The City shall advocate and pursue strategies to encourage the development of green schools that are constructed according to the U.S. Green Building Council Leadership in Energy and Environmental Design standards, and/or any nationally recognized green standards acceptable to the City.

Policy 10.1.12

The City shall work with the Miami-Dade School Board District to develop and implement a Safe Routes to School Program for applicable North Miami area schools.

Alternative Opportunities

Objective 10.2

Expand the use of non-traditional (non-public, charter and private) school facilities throughout the City as alternative opportunities that offer some relief to public school over-crowding and provide more quality educational options for North Miami's school age and adult population.

Monitoring and Evaluation:

- Number of new student stations added in new or expanded non-public charter, and private schools.

Policy 10.2.1

Encourage area businesses to work with the City to identify any foreseeable educational needs and develop cooperative strategies to help meet them.

Policy 10.2.2

Encourage universities, colleges, non-profit education providers and the Miami-Dade School Board to establish college-level and adult education facilities and programs in, or in close proximity to the City of North Miami.

Policy 10.2.3

Explore opportunities for expanding existing and creating new charter schools within the City that are funded through private businesses, non-profit agencies, and/or the City.

Policy 10.2.4

Support the Miami-Dade School Board, developers, and private and charter school operators in initiating creative solutions for addressing additional student capacity generated by new residential development, including, but not limited to, school construction by private businesses and the leasing of existing buildings for schools.

Location and Accessibility

Objective 10.3

Locate and design new schools and improve existing educational facilities to maximize accessibility and safety for residents and children, while protecting neighborhoods and encouraging the joint use of educational and ancillary facilities, including the co-location of schools with parks, recreational facilities, cultural facilities, libraries, environmental pathways/walking trails, bikeways and community centers.

Monitoring and Evaluation:

- Number of shared facilities within the City.
- Development of a coordinated system of new sidewalks and other pathways connecting schools with parks and neighborhoods.

Policy 10.3.1

Traditional and non-traditional elementary and secondary educational facilities shall be permitted in all land use categories on the adopted Future Land Use Map and in all zoning districts in the Land Development Regulations (LDR).

Policy 10.3.2

Encourage the location of schools in proximity to residential neighborhoods provided adverse impacts to neighborhoods are mitigated.

Policy 10.3.3

Provide a safe system of sidewalk, trail, and bikeway linkages between schools, parks, libraries and other public facilities, and neighborhoods, including connections to transit stops.

Policy 10.3.4

Coordinate with the Miami-Dade School Board to co-locate and share use of civic facilities including parks, libraries, recreational facilities, and community centers, auditoriums, learning centers, museums, performing arts centers, and stadiums with schools, where feasible.

Policy 10.3.5

Develop co-location joint use agreements with the Miami-Dade School Board and other entities that have entered into such agreements to make certain educational facilities available for use by residents when school is not in session.

Policy 10.3.6

Consider co-location and shared use opportunities when preparing future capital improvement plans, and when planning and designing new or renovated community facilities.

Policy 10.3.7

The City of North Miami shall coordinate with the Miami-Dade School Board when preparing the Capital Improvement Plan to identify and prioritize funding for mutually beneficial improvements or opportunities for co-locating or sharing of facilities.

Intergovernmental Coordination**Objective 10.4**

The establishment and implementation of mechanisms for on-going coordination and communication between the City of North Miami, Miami-Dade School Board and other appropriate jurisdictions to ensure the adequate provision of public educational facilities.

Monitoring and Evaluation:

- Record of City's participation in meetings with Miami-Dade School Board staff and other appropriate agencies to resolve school facility issues pursuant to the Interlocal Agreement.

Policy 10.4.1

Work closely with the Miami-Dade School Board to implement the “Interlocal Agreement for Public Facility Planning in Miami-Dade County.”

Policy 10.4.2

As part of the Interlocal Agreement between the City of North Miami and the Miami-Dade School Board, the City will work with the School Board to plan future public school sites within the municipal boundaries and ensure adequate lands are available proximate to neighborhoods to accommodate current and future student residents.

Policy 10.4.3

Consistent with the provisions of the Interlocal Agreement between the City of North Miami and the Miami-Dade School Board, the City will solicit input from the School Board on local school impacts resulting from land use plan amendments and rezoning applications that increase residential density on existing and planned public schools, prior to the first public hearing for such amendments or applications.

Policy 10.4.4

Establish a joint process for collaborative planning and decision-making on population projections and public school siting to ensure consistency between the City’s Comprehensive Plan and the long range plans of the Miami-Dade School Board.

Policy 10.4.5

Upon request, the City of North Miami shall supply socio-economic information to Miami-Dade County and the Miami-Dade School Board in order to facilitate accurate and updated annual student enrollment projections for the City.

Policy 10.4.6

Consistent with the provision of the Interlocal Agreement for Public School Facility Planning between the City of North Miami and the Miami-Dade County School Board, the City shall provide an annual report on growth and development trends within the City to the Miami-Dade School Board.

Policy 10.4.7

Encourage universities, colleges and non-profit education providers to establish college-level and adult education facilities in the City of North Miami.

Policy 10.4.8

Coordinate with neighboring jurisdictions to address public school issues of mutual concern.

Policy 10.4.9

Work closely with the Miami-Dade School Board to review and revise, if appropriate, the student generation rates used in assessing the residential component of mixed used development projects.

Policy 10.4.10

Invite a Miami-Dade School Board staff representative to participate in Local Planning Agency (LPA) meetings, as a non-voting member to give input whenever Comprehensive Plan amendments or rezonings are being considered that, if approved, would increase residential density.

Policy 10.4.11

Whenever possible, attend Miami-Dade School Board staff meetings and workshops open to the public where issues impacting the City are addressed.

Policy 10.4.12

Participate in staff working groups as required in the “Interlocal Agreement for Public School Facility Planning in Miami-Dade County.”

Policy 10.4.13

Annually review and evaluate the Miami-Dade School Board’s Tentative District Educational Facilities Plan, and provide comment on the plan’s consistency with the City’s Comprehensive Plan and Land Development Regulations (LDR).

School Concurrency**Objective 10.5**

Adopt a school concurrency program pursuant to state requirements to ensure a healthy and economically viable community.

Monitoring and Evaluation:

- Develop and begin implementing a school concurrency program by December 1, 2008.

Policy 10.5.1

Coordinate with the Miami-Dade School Board and its municipalities to establish a uniform district-wide school concurrency system to include all public schools in the district and all portions of the district pursuant to paragraph 163.3180(13), F.S.

Policy 10.5.2

Based upon the phased schedule for adoption established by the Florida Department of Community Affairs, by January 1, 2008, coordinate with the Miami-Dade School Board and its municipalities in updating the Interlocal Agreement for Public School Facility Planning in Miami-Dade County to implement public school concurrency pursuant to paragraph 163.3177(12)(i), F.S and 163.3180(13)(g), F.S. The Interlocal Agreement shall reflect consensus on level of service standards, concurrency service areas, maximum utilization of capacity, annual adoption of public schools capital facilities program, options for proportionate-share mitigation, and implementation procedures.

Policy 10.5.3

By January 1, 2008, the City of North Miami shall update the Public School Facilities Element to implement public school concurrency pursuant to paragraph 163.3177(12)(i), F.S., ensuring consistency with those public school facilities elements adopted by the other local governments within Miami-Dade County. The updated Element shall address correction of existing deficiencies, ensure adequate school capacity for the 5-year and long term planning periods, coordinate school location with residential development, ensure necessary supporting infrastructure, include options for proportionate-share mitigation, and procedures for school site selection.

Policy 10.5.4

With the Miami-Dade School Board, jointly establish level-of service standards for elementary, middle, and senior high schools, as well as special purpose school facilities.

Policy 10.5.5

Within 5 years of adoption of school concurrency, the City of North Miami shall apply school concurrency on a less than district-wide basis using school attendance zones or concurrency service areas.

Policy 10.5.6

Upon adoption of an amendment to impose school concurrency, the City of North Miami shall also update their Capital Improvement Element setting forth a financially feasible public school capital facilities program based upon the established service area.

Policy 10.5.7

Through the school concurrency program, ensure that adequate school capacity to support new development either exists or will be in place or under actual construction within three years after the issuance of final subdivision or site plan approval, or the functional equivalent.

Policy 10.5.8

Upon the Miami-Dade County School Board's adoption of proportionate-share school mitigation options, policies, and procedures to mitigate the impacts on public school facilities, the City shall include such in the Public School Facilities Element and the Interlocal Agreement for Public School Facility Planning in Miami-Dade County.

Policy 10.5.9

Once school concurrency is implemented, the City of North Miami shall work closely with the Miami-Dade School Board to ensure that residential developers execute legally binding development agreements to mitigate school impacts with contributions directed to a school capacity improvement identified in the 5-year district work plan which satisfies the demands created by that development.

Policy 10.5.10

Create maps identifying the general locations of planned schools for 5-year and long-term periods and adopt within the Public School Facilities Element.

Policy 10.5.11

Annually update the Capital Improvement Element to reflect modifications to the public school capital facilities program.

Policy 10.5.12

Annually review and comment on the School Board's tentative Five-Year Capital Facilities Plan and provide information to the School Board on the plan's consistency with the Comprehensive Plan.

EAR-Based Comprehensive Plan Amendments

Volume I: Goals, Objectives, and Policies Capital Improvement Element

11. Capital Improvement Element

(Supercedes existing Capital Improvement Element)

GOAL 11

Provide adequate and timely public facilities and infrastructure capacity to accommodate existing and future residents within the City of North Miami, maximize the use and value of existing facilities, and effectively manage future growth consistent with the level of service (LOS) standards established in the Comprehensive Plan.

Fiscal Resources

Objective 11.1

Maximize fiscal resources available to the City for public facility improvements necessary to accommodate existing development, redevelopment, and planned future growth, and to replace obsolete or deteriorated facilities.

Monitoring and Evaluation:

- Steady growth in funding sources available for capital improvements.
- Number of grants applied for and received.

Policy 11.1.1

Ensure capital revenues and/or secured developer commitments are in place to maintain all public facilities at acceptable LOS standards prior to the issuance of building permits.

Policy 11.1.2

Utilize a variety of funding sources to implement capital improvements, within the limitation of existing law. These methods may include ad valorem taxes, general revenues, enterprise revenues, assessments, tax increment financing, grants, and private funds.

Policy 11.1.3

Ensure that new development bears a proportionate cost for public facility improvements by utilizing a variety of mechanisms to assess and collect impact fees, dedications and/or contributions from private development.

Policy 11.1.4

Aggressively seek all realistic grant opportunities to fund Capital Improvement Program projects.

Provision of Public Facilities

Objective 11.2

Provision of the necessary capital improvements to replace worn-out or obsolete public facilities, correct service deficiencies and accommodate planned future growth consistent with the adopted LOS standards.

Monitoring and Evaluation:

- Annual update and implementation of the Five-Year Capital Improvement Program (CIP).
- Number of capital improvements constructed.

Policy 11.2.1

Prepare and adopt a Five-Year CIP as part of the City's annual budgeting process.

Policy 11.2.2

Coordinate planning for City improvements with the plans of state agencies, the South Florida Water Management District (SFWMD), Miami-Dade County and adjacent municipalities when applicable.

Policy 11.2.3

Designate those projects identified in the other elements of the Comprehensive Plan, determined to be of relatively large scale (\$50,000 or greater), as capital improvement projects for inclusion within the Capital Improvement Program (CIP) of this Element. All capital improvements in the Capital Improvement Element (CIE) will be included in the Five-Year Capital Improvements Program (CIP) and Annual Capital Budget.

Policy 11.2.4

Implement the Five-Year CIP and update the CIP Schedule through an Annual Update and Inventory Report (AUIR).

Policy 11.2.5

Evaluate and rank the proposed capital improvement projects listed in the Five-Year CIP, prioritizing them according to the following guidelines:

1. Protection of public health, safety and welfare;
2. Fulfills the City's legal commitment to provide facilities and services;
3. Corrects existing deficiencies;
4. Maintains adopted LOS;
5. Provides for the most efficient and effective use of existing and/or future facilities;
6. Provides new capacity to accommodate future growth consistent with this Plan;
7. Prevents or reduces future improvement costs; and
8. Promotes cost-effective use of time and revenue.

Policy 11.2.6

Consider the following amendment guidelines if one or more of the funding source(s) identified in the Five-Year CIP is not available:

1. Adjust the schedule by removing projects, which have the lowest priority.
2. Delay projects until funding can be guaranteed.
3. Do not issue development orders that would continue to cause a deficiency on the public facility's adopted LOS standards.
4. Pursue alternative funding sources.

Policy 11.2.7

Use the City's Land Development Regulations to ensure that all decisions regarding land use planning and the issuance of development orders and permits consider the availability of public facilities and services necessary to support such development at the adopted LOS standards concurrent with the associated impacts.

Policy 11.2.8

Coordinate with road, utility and infrastructure service providers within the City to ensure that necessary capital improvements are implemented to support new construction and redevelopment.

Policy 11.2.9

Repair, rehabilitate, and replace the City's capital facilities according to generally accepted engineering principles and guidelines and ensure that facilities and services provided by other agencies are held to the same standard.

Policy 11.2.10

Assess new development a pro rata share of the public facility costs necessary to accommodate the impacts of new development without exceeding the adopted levels-of-service through the enforcement of existing public facility funding mechanisms and impact fees. Public facilities include potable water, sanitary sewer, solid waste, drainage, parks and roadways.

Policy 11.2.11

Review and update the Capital Improvement Element on an annual basis in order to maintain a financially feasible Five-Year Capital Improvement Program.

Debt Management**Objective 11.3**

Develop and implement a debt management program to assist the City in providing adequate and timely revenues for scheduled capital improvements.

Monitoring and Evaluation:

- Implement a debt management program by December 2009.

Policy 11.3.1

Incur debt within generally accepted municipal finance principles and guidelines, and only in relation to the City's ability to pay for a new capital asset or to significantly extend the life expectancy of a capital asset.

Policy 11.3.2

Ensure that any increase in operating costs for a new or additional facility is also considered when evaluating the debt to be incurred for a facility.

Policy 11.3.3

The City will not provide a public facility, nor accept the provision of a public facility by others, if it is unable to pay for the subsequent annual operation and maintenance costs of the facility.

Policy 11.3.4

Total debt service expenditures shall be no more than thirty percent of total revenue.

Policy 11.3.5

Outstanding capital indebtedness shall be no more than ten percent of the City's property tax base.

Policy 11.3.6

Debt payment shall not exceed the anticipated useful life of an improvement, and in no case, shall exceed fifty years.

Levels of Service Standards and Concurrency Management**Objective 11.4**

Base decisions regarding the issuance of development orders or permits, in part, on the availability of infrastructure facilities and essential services which meet the adopted LOS standards concurrent with the impacts of the development as measured by the adopted Concurrency Management System, and require new development to pay a proportionate cost of facility improvements to maintain the LOS standards.

Monitoring and Evaluation:

- Number of capital improvements built to meet adopted levels of service.

Policy 11.4.1

As indicated in the applicable Elements of this Plan, the City of North Miami has adopted the minimum LOS standards shown in Table 11.1.

Table 11.1: Recommended Level of Service Standards for City of North Miami

<u>Public Facility</u>	<u>Level of Service Standard</u>
<u>Potable Water^a</u>	<p><u>User LOS</u> - The system shall maintain the capacity to produce and deliver 165 gallons per capita per day.</p> <p><u>Water Storage</u> - The City shall provide total storage capacity equal to no less than 15 percent of the service area average daily demand.</p> <p><u>Water Pressure</u> - The City shall maintain a minimum water pressure at the water meter of 30 pounds per square inch.</p> <p><u>Water Quality</u> - Water quality shall meet all federal, state, and county standards for potable water.</p>
<u>Sanitary Sewer^a</u>	<p><u>User LOS</u> - The system shall maintain the capacity to collect and dispose 185 gallons per capita per day.</p>
<u>Stormwater Drainage</u>	<p><u>Water Quality Standard</u> - Stormwater facilities shall meet the design and performance standards established in Chapter 62-25, Rule 25.025, Florida Administration Code (FAC), with treatment of the runoff from the first one inch of rainfall onsite to meet the water quality standards required by Chapter 62-302, Rule 862-302.500, FAC.</p> <p><u>City-owned system</u> - Maintain 5-year design storm with a 24-hour duration.</p> <p><u>Private systems</u> - Minimum 25-year design storm with a 72-hour duration with new development.</p>
<u>Solid Waste^a</u>	<p><u>Service population</u> - Collection of 4.5 lbs of solid waste per capita/day.</p>
<u>Recreation/Open Space</u>	<p>The City shall provide a level of service for parks, recreation, and open space of 2.75 acres per 1,000 residents.</p>
<u>Transportation: FIHS Roadways</u>	<p>All Florida Intrastate Highway System (FIHS) roadways must operate at LOS D or better (at peak hour), except where 1) exclusive through lanes exist, roadways may operate at LOS E (at peak hour), or 2) such roadways are parallel to exclusive transit facilities or are located inside designated transportation concurrency management areas (TCMA's), roadways may operate at LOS E (at peak hour). Constrained or backlogged limited and controlled access FIHS roadways operating below the foregoing minimums must be managed to not cause significant deterioration.</p>
<u>Transportation: County Roadways within the Urban Development Boundary (UDB), but Outside the Urban Infill Area (UIA)</u>	<p>All major County roadways must operate at LOS D or better, except where mass transit service having headways of 20 minutes or less is provided within ½ mile distance, then a roadway shall operate at or above LOS E at peak hour. When extraordinary transit service such as commuter rail or express bus service exists, parallel roads within ½ mile shall operate at no greater than 120% of their capacity at peak hour.</p>
<u>Transportation: City Streets</u>	<p>Roadways with no mass transit service - LOS E</p> <p>Roadways with mass transit with headways of 20 minutes or less - LOS E+20</p>

Public Facility	Level of Service Standard
	Roadways with extraordinary transit - LOS E+50
Public Schools ^b	Less than 125 percent of permanent design capacity by 2010 and less than 100 percent capacity by September 2015.

Notes:

^{a.} These public facilities and services are provided by Miami-Dade County and are subject to the level of service standards established in the Miami-Dade County Comprehensive Development Master Plan (CDMP). The City of North Miami will adopt these same level of service standards to be consistent with the CDMP, as amended.

^{b.} The level of service standard for public schools is established by the Miami-Dade County Public School District.

Policy 11.4.2

Monitor and ensure adherence to the adopted LOS standards and the availability of public facility capacity using the following Concurrency Management System:

1. *Sanitary Sewer, Solid Waste, Drainage and Potable Water:* Prior to the issuance of any development order for new development or redevelopment, sanitary sewer, solid waste, drainage and potable water facilities needed to support the development at adopted LOS standards must meet one of the following timing requirements:
 - The development order includes a condition that at the time of the issuance of a certificate of occupancy or its functional equivalent, the necessary facilities and services are in place and available to serve the new development; or
 - The necessary facilities and services are guaranteed in an enforceable development agreement, pursuant to Section 163.3220, F.S., or an agreement or development order issued pursuant to Chapter 380, F.S., to be in place and available to serve new development at the time of the issuance of a certificate of occupancy or its functional equivalent.

2. *Parks & Recreation:* Prior to the issuance of any development order for new development or redevelopment, parks and recreation facilities needed to support development at adopted LOS standards must meet one of the following timing requirements:
 - The necessary facilities and services are in place or under actual construction; or
 - The development order includes a condition that at the time of the issuance of a certificate of occupancy or its functional equivalent, the acreage for the necessary facilities and services to serve the new development is dedicated or acquired by the City or CRA, or funds in the amount of the developer's fair share are committed; and
 - The development order includes the conditions that the necessary facilities and services needed to serve the new development are scheduled to be in place or under actual construction not more than one year after issuance of a

- certificate of occupancy or its functional equivalent as provided in the adopted five-year Capital Improvement Program; or
- The necessary facilities and services are the subject of a binding executed agreement which requires the necessary facilities and services to serve the new development to be in place or under actual construction not more than one year after issuance of a certificate of occupancy or its functional equivalent; or
 - The necessary facilities and services are guaranteed in an enforceable development agreement, pursuant to Section 163.3220, F.S., or an agreement or development order issued pursuant to Chapter 380, F.S., to be in place or under actual construction not more than one year after issuance of a certificate of occupancy or its functional equivalent.
3. Transportation: Prior to the issuance of any development order for new development or redevelopment, transportation public facilities needed to support the development at adopted LOS standards must meet one of the following timing requirements:
- The necessary facilities and services are in place or under construction; or
 - The development order includes the conditions that the necessary facilities and services needed to serve the new development are scheduled to be in place or under actual construction not more than three years after issuance of a certificate of occupancy or its functional equivalent as provided in the adopted Five-Year Capital Improvement Program.
 - The necessary facilities and services are the subject of a binding executed agreement which requires the necessary facilities and services to serve the new development to be in place or under actual construction no more than three years after the issuance of a certificate of occupancy or its functional equivalent; or
 - The necessary facilities and services are guaranteed in an enforceable development agreement, pursuant to Section 163.3220, F.S., or an agreement or development order issued pursuant to Chapter 380, F.S., to be in place or under actual construction not more than three years after issuance of a certificate of occupancy or its functional equivalent.

The application of the above requirements must ensure the availability of public facilities and services needed to support development concurrent with the impacts of such development.

Policy 11.4.3

Manage and improve the City's concurrency monitoring system, as part of the Land Development Regulations, to:

1. Determine whether necessary facilities identified within the City's Capital Improvements Element, including potable water, sanitary sewer, solid waste, stormwater management, recreation and open space, and transportation are being constructed in accordance with the Capital Improvement Program, as amended.
2. Annually update existing LOS, committed capacity as defined in the Land Development Regulations, and facility needs to maintain adopted LOS prior to and in conjunction with the annual update of the City's Capital Improvements Element and Capital Improvement Program, and preparation of the Annual Budget.

Policy 11.4.4

Public facilities and services must meet or exceed the LOS standards established in this Element of the Comprehensive Plan. Public facilities must be available at the adopted LOS standards when needed for development. If facilities are not available at the time of approval, development orders or permits are to be conditioned upon the availability of public facilities and services, or the necessary facilities must be guaranteed either in an enforceable development agreement adopted pursuant to Chapter 163, F.S. or in a development order issued pursuant to Chapter 380, F.S.

Policy 11.4.5

Evaluate proposed Plan amendments and requests for new development or redevelopment according to the following guidelines:

1. Will the action contribute to a condition of public hazard as described in the Infrastructure Element?
2. Will the action exacerbate any existing public facility capacity deficiency, as described in the Transportation, Infrastructure, or Recreation and Open Space Elements?
3. Will the action generate public facility demands that may be accommodated by capacity increases, which will maintain adopted LOS standards either planned in the Five-Year Capital Improvement Program or by developer commitment?
4. Is the action consistent with the goals, objectives and policies of the Future Land Use Element, including the Future Land Use Map?
5. If the City provides public facilities, in part or whole, is the action financially feasible pursuant to this Element?

Capital Improvement Program

The following Capital Improvement Program is the mechanism by which the City of North Miami can effectively stage the timing, location, projected cost, and revenue sources for the capital improvements derived from the other comprehensive plan elements, in support of the Future Land Use Element. The Five-Year Schedule of Capital Improvements together with the Annual Budget Report are used to document the economic feasibility of the City's Comprehensive Plan. The Capital Improvement Element must be reviewed and updated on an annual basis in order to maintain a financially feasible Five-Year Capital Improvement Program.

~~CAPITAL IMPROVEMENT ELEMENT~~

~~GOAL 1:~~

~~THE CITY SHALL PROVIDE FOR OR ENSURE THAT ADEQUATE PUBLIC FACILITIES ARE AVAILABLE TO THE POPULATION WITHIN ITS BOUNDARIES AND/OR SERVICE AREA, BY MAINTAINING THE QUALITY OF EXISTING FACILITIES, AND BY PROVIDING NEW FACILITIES AS NEEDED.~~

~~OBJECTIVE 1.1:~~

~~Capital improvements shall be carried out to maintain existing facilities at an operational level and prevent capacity deficits such that the minimum Level of Service Standards outlined herein under 95-5.007, 95-5.001, and 9J-5.014 are maintained.~~

~~POLICY 1.1.1:~~

~~Secure funds and implement the capital improvements identified in the 5-year Schedule of Improvements, within the proposed time frame, to maintain existing facilities operational and to prevent capacity deficits.~~

~~POLICY 1.1.2:~~

~~The City's maximum ratio of total debt service to total revenue shall not exceed 1.~~

~~POLICY 1.1.3:~~

~~The City's maximum ratio of outstanding capital indebtedness shall not exceed 1.~~

~~POLICY 1.1.4:~~

~~Within one year following plan adoption identify other capital improvement needs resulting from policies contained in the other plan elements, and develop fiscal policies to direct expenditures to these needs.~~

~~OBJECTIVE 1.2:~~

~~Proposed capital improvement projects shall be ranked according to three (3) main criteria:~~

- ~~1) the project is needed to protect the public health and safety;~~
- ~~2) the project would increase the efficiency with which existing facilities operate;~~
- ~~3) the project is a logical extension of an existing facility and is needed to accommodate growth in the service area.~~

~~POLICY 1.2.1:~~

~~The five-year Capital Improvement Program shall be reviewed annually by the City Council and the implementation timeframes accelerated for those projects for which funding have been secured.~~

OBJECTIVE 1.3:

~~In connection with new development and redevelopment, assess the utility impact and connection fees required by Section 28 of the City Code entitled "Water and Sewers," to cover the cost of needed facility improvements resulting from such development.~~

POLICY 1.3.1

~~Collect utility and connection impact fees to be used for related facility improvements.~~

POLICY 1.3.2:

~~Review the fee structure every two years to meet cost increases.~~

OBJECTIVE 1.4:

~~The City will monitor and pursue potential funding sources to construct the capital improvements identified in the 5-year Capital Improvement Project Schedule contained in this Plan.~~

POLICY 1.4.1:

~~The City shall establish a special taxing district for capital improvements, as allowed by City Charter, and as identified in the 5-year Capital Improvement Project Schedule.~~

POLICY 1.4.2:

~~The City shall make efforts to secure County, State and Federal grants to finance the identified needed capital improvements.~~

OBJECTIVE 1.5:

~~Land use decisions or development orders which will adversely affect the established Level of Service Standards, shall be complemented by the necessary commitments to upgrade the potentially affected infrastructures to the established level of service standards(s). These commitments shall be made conditions of the issuance of development orders, approvals, or permits, shall be constructed in conjunction with the development, and shall be in place prior to the impacts of development. The minimum Levels of Standard shall be as outlined below in Policy 1.5.1.~~

POLICY 1.5.1:

~~Utilize the following level of service standards to determine the extent of facility improvements needed:~~

- ~~• Domestic water supply at a Level of Service Standard of 125gallons/capita/day shall be delivered to users at a pressure of not less than 30 p.s.i. at the meter.~~
- ~~• Fire flow improvement projects shall be designed to meet the following standards:~~

<u>Use</u>	<u>Minimum Fire Flow</u> (gall./min.)
Single Family	500

Duplex	750
Townhouse	1,500
Multi-Family, Offices, Hospitals, and Schools	2,000
Commercial	3,000
Industrial	3,000

~~*Lesser flows may be approved on an interim basis by the Dade County Fire Department.~~

- ~~The sewage collection system's capacity shall have the following minimum Level of Service Standards:~~

<u>Use</u>	<u>Gallons/day</u>
Single Family	350/(2 bedrooms)
Townhouses	150bedroom
Apartment or Condo Unit	150bedroom
General Office Buildings	10 gallons/1100 sq. ft.
Other Uses	Set forth in Policy 2.2.1 of the Sanitary Sewer Element

- ~~The capacity of the sewage collection system shall be designed to operate at a minimum level of service to 100 gallons/capita/day.~~
- ~~Pressure sewers 12" in diameter and under shall be designed to allow for a flow velocity of not more than 5 ft./sec. Capacity shall be computed as noted above for the gravity sewers.~~
- ~~The level of service standards for each City controlled roadway shall be 1 "C."~~
- ~~The level of service standards for state and county roads within the City shall be as set forth in Objective 1.7 of the Traffic Circulation Element herein.~~
- ~~The level of service standard for the garbage and trash collection systems shall be .8 tons of solid waste/capita/year.~~

- ~~The combined level of service standard for parks, recreation and open space areas shall be on a minimum ratio of 2.75 acres of land devoted to these uses per 1,000 population.~~

- ~~Levels of service standards for drainage facilities shall be as follows:~~

~~City Collector Streets and All Other City Streets— Provide protection to dispose of a two-year design storm return frequency, with a 24-hour duration.~~

†

~~Areas Other Than Streets— Impervious areas shall be drained to a collection system or to pervious areas that have sufficient percolation, and on a minimum ratio of 1 square foot of effective pervious area for each 10 square feet of impervious area. Disposal of rainwater during any five minute period for each square foot of impervious area. In areas regulated by the State, additional or more stringent requirements may apply.~~

~~POLICY 1.5.2:~~

~~Development approvals and related infrastructure improvements shall be cognizant of plans of the South Florida Water Management District and of state agencies having jurisdiction over said approval or improvements, and conform with applicable law.~~

~~GOAL 2:~~

~~TO IMPROVE THE EXISTING LIBRARY PROGRAM SUCH THAT IT WILL MEED THE INFORMATIONAL, EDUCATIONAL, CULTURAL, RECREATIONAL AND REHABILITATIVE NEEDS OF THE RESIDENTS AND BUSINESSES IN NORTH MIAMI.~~

~~OBJECTIVE 2.1:~~

~~Continue to develop library holdings to make available, the range of print and non-print materials in the various formats necessary to met accepted standards, as contained in the Florida Library Association's "Standards and Guidelines for Florida Public Library Services," and the needs and interests of North Miami residents and businesses.~~

~~POLICY 2.1.1:~~

~~Provide a full range of library services and programs to all age groups as individuals and as members of groups and organizations, by the year 2000.~~

~~POLICY 2.1.2:~~

~~By the year 2000, improve access beyond current levels to library services and resources for special clientele who cannot use traditional library materials or facilities through literacy collections and programs, books-by-mail service, telephone reference, talking books service, telecommunications, the large print collection and foreign language materials.~~

OBJECTIVE 2.2:

~~Complete interior work on the library and install furnishings by 1955, the funding for which shall be a combination of the following sources: federal aid; state aid; private donations; general obligation bonds; or increased library tax subject to City Council approval.~~

POLICY 2.2.1:

~~Provide competent professional and support staff in sufficient numbers as identified in the Florida Library Association's "Standards and Guidelines for Florida Public Library Services" by the year 2000, as funding becomes available, to facilitate optimum use of resources and services.~~

POLICY 2.2.2:

~~Extend and improve library service through the use of available technology such as automation, to include managerial and day-to-day operations and participation in interlibrary cooperation and resource sharing on the local, regional, and state levels by 1995.~~

OBJECTIVE 2.3:

~~Continue promoting effective public awareness of library resources and services through cooperation with federal, state and local library, educational, and community organizations.~~

POLICY 2.3.1:

~~Continue to coordinate with the Friends of the North Miami Public Library, Inc., in promotional and public relations efforts.~~

POLICY 2.3.2:

~~Participate in campaigns and promotional efforts sponsored by the American Library Association, the State Library of Florida, the Council of Florida for Libraries, and other appropriate entities.~~

POLICY 2.3.3:

~~Continue to provide staff support to the Library Board such that it is kept knowledgeable of library needs and current library issues.~~

OBJECTIVE 2.4:

~~Develop plans and procedures which will establish a continuous and systematic evaluation of library services by 1992.~~

POLICY 2.4.1:

~~Conduct surveys to determine if changes in the needs of library patrons have occurred and if so, modify or improve procedures.~~

CAPITAL IMPROVEMENT PROJECT SCHEDULE (continued)

<u>Project</u>	<u>Total Dollar Cost 1989-90 —and Beyond</u>	<u>1989- 90</u>	<u>1990- 91</u>	<u>1991-92</u>	<u>1992- 93</u>	<u>1993-94</u>	<u>Funding Source</u>

12. Monitoring and Evaluation

Concurrency Management System and Public Facility Monitoring

The City of North Miami has established a Concurrency Management System (CMS) that insures the availability and sufficiency of public facilities and services at the time that the impacts of development occur and provides a program to prevent a reduction in the levels of service (LOS) below the adopted LOS standards. Furthermore it assures the proper timing, location and design of supportive urban service systems concurrent with the impacts of new development. The following benefits may also be realized with the adoption of a CMS:

- Support consistency of the Capital Improvements Element with the Future Land Use Element;
- Provide for the orderly and cost-effective expansion of public facilities;
- Supplement capital improvements expenditures and taxing structures for capital improvements; and
- Reduce the possibility of damage to the environment from the use of overburdened facilities.

The Concurrency Management System, which is incorporated in the Future Land Use Element and Capital Improvement Element, includes guidelines for interpreting and applying LOS standards to applications for development orders and development permits. It also establishes development review procedures in the City's Land Development Regulations that may make development approval contingent on the City's ability to provide facilities and services or may require that the developer provide facilities and services in order to maintain adopted LOS standards. Petitioners must supply public facility impact information with their development applications. City staff then reviews and verifies the project information, comparing it with public facility capacity data and anticipated committed development impacts to ensure that adopted LOS standards will be maintained if the development application is approved. If LOS will not be maintained, the petition is denied unless the applicant presents revised plans demonstrating that the new development shall:

- Be serviced with all requisite public facilities concurrent with the impacts of development;
- Provide LOS for all requisite facilities which is compliant with the City's adopted LOS standards; and
- Shall not cause a reduction of LOS for existing infrastructure below minimum adopted thresholds.

Plan Monitoring, Evaluation and Appraisal Process

The City of North Miami will formally evaluate and appraise this Comprehensive Plan every five to seven years, pursuant to State Statutes, beginning with the original plan adoption in 1991 under the 1985 State Growth Management Act, as amended. This process begins about eighteen months prior to the fifth year anniversary of the prior Comprehensive Plan adoption date. The components of this comprehensive process are the updating of socioeconomic and development data, which is evaluated to determine if projections were accurate and to identify any trends that may have developed. The Goals, Objectives, and Policies of the adopted Plan are then examined for updating and compliance with current law. At this time, introduction of new initiatives for the next planning period may also be included in the Plan. In addition, City staff annually monitors Comprehensive Plan implementation with respect to goals, objectives and policies as part of the budgeting process.

Public participation is built into the entire process, which results in a final Evaluation and Appraisal report (EAR) that is reviewed and adopted by the Local Planning Agency and City Council, and transmitted to the Florida Department of Community Affairs (DCA) for review. Once the final EAR is approved by all agencies, EAR-based Comprehensive Plan amendments are initiated and completed through the State-mandated process.
